SUMMARY

Experienced software engineer with 3.8 years of passion for developing innovative programs that expedite the efficiency and effectiveness of organizational success. Writing code to create systems that are reliable and user-friendly. Professional to build software programs and effectively track changes.

EDUCATION

Bachelor of Technology

April 2019

Jawaharlal Nehru Technological University

Rajeev Gandhi Memorial College of Engineering And Technology, Nandyal, Andhra Pradesh

Relevant coursework: Electronics And Communication Engineering

TECHNICAL SKILLS

Programming: Java, Java8, Collections, J2EE, JDBC

Frameworks: Hibernate, Spring MVC, Spring Boot and Rest API's

Databases: MySQL, Elasticsearch and Cassandra

Build Tools: Gradle and Maven

Version Control: Git, GitLab and Bitbucket

Servers: Tomcat Server

Microservices

JavaScript and jQuery

Jenkins and Docker

AWS

Debugging skills

React

Kafka

PROFESSIONAL EXPERIENCE

Yupp Video Services India Pvt. Ltd., Hyderabad, India: Software Engineer

May 2023-September 2024

- Design and implement user-facing features to ensure a seamless and responsive user experience across various applications
- Design, implement and maintain databases to store and manage application data efficiently, ensuring data integrity and scalability
- Develop server-side logic and databases to support front-end functionalities and ensure smooth data processing
- Deploy application to production environments and collaborate with DevOps teams to optimize deployment processes and ensure continuous integration and delivery(CI/CD)
- Maintain version control systems to manage and collaborate on codebase, ensuring code quality and consistency and easy collaboration within development teams
- Conduct thorough testing and debugging of application components to ensure reliability, security and optimal performance across different environments
- Document codebase, APIs and technical specifications and collaborate effectively with cross-functional team including designers, product owners/managers and other developers(MyReco API service, MyReco data engine) to ensure alignment with project requirements and timelines

Ojas Innovative Technologies Pvt. Ltd., Hyderabad, India: Software Engineer

January 2021-April 2023

- Collaborate with cross-functional teams to understand business requirements
- Optimize and enhance existing applications to meet evolving business needs
- Work on innovative projects to solve real-world business challenges
- Strong experience in working on highly scalable systems
- Design and establish software patterns to solve key business and technology problems

PROJECTS

MyReco Management Console and Event Collector

May 2023-September 2024

Java Hibernate SpringMVC SpringBoot Rest API's JavaScript Ajax calls jQuery MySQL Elasticsearch Cassandra Git Bitbucket Tomcat server Jenkins Docker Gradle and Maven S3 bucket and EC2 instance.

- Collaborate with project managers, designers and other developers to ensure the successful delivery of applications and understanding the functional requirements and detailed designed document from other team(MyReco Engine and MyReco API Service) and client
- Prepared High Level Document(HLD) of new features which is discussed to be design, develop and implemented software applications from MyReco Management Console and Event Collector
- Deploy jars into all layers of servers and check after developing the requirement
- Conduct through testing and debugging of applications to ensure they meet quality standards after implementing the functionality before proceed to QA
- Fixing the issues which was reported by QA
- Involved in bug fixing
- Perform application maintenance and updates as needed
- Analyzed client requirements to develop software solutions, and created technical specifications

Contarct AI

January 2021-April 2023

Java Hibernate Spring SpringBoot Microservices MySQL GitLab Bitbucket Tomcat server Maven.

- Involved in requirements, gathering, analysis, high-level and low-level design
- Implemented REST activities and their implementations using Web services
- End to End use cases and reviewed them with relevant stack holders
- Implemented business logic based on the requirements
- Involved in fixing the issues reported by QA and client
