Email: ganesh.shelke0017@gmail.com

Career Objective:

To secure a position offering responsibility Challenges and personnel growth. A position where my talents can be effectively utilized to improve operations and contribute to company's goals.

Professional Summary

- Technically Sophisticated IT Professional with **9+** years of experience in Cloud and Linux technology.
- Solutions Architect level Experience in cloud platforms (AWS, Azure, NIC, Openstack) and infrastructure management tools.
- Experience with DevOps methodologies and tools such as Docker, Kubernetes, Jenkins, Git, Openshift etc.
- Strong Experience of CI/CD principles and best practices.
- Ability to troubleshoot complex issues and optimize system performance.

Training and Certifications:

- AWS certified Associate solution Architect Certification ID: RK66D3WBPFV4QC57
- Microsoft Certified: Azure Fundamentals Certification ID: H903-4590
- Red Hat Certified System Administrator Certification ID: 140-165-671.
- Red Hat Certified Engineer Certification ID: 140-165-671.
- Microsoft Certified: Microsoft Security, Compliance, and Identity Fundamentals.
- Completed IBM Cloud Advocate Essentials certification.
- Certified Oracle Cloud infrastructure foundation Associate.
- Pursuing AWS Certified Solutions Architect – Professional
- Pursuing Certified Kubernetes Administrator

Achievements

- Consulted approx. 20+ clients for hosting their Infrastructure on Cloud.
- Successfully implemented RHV and Openshift cluster setup for one of the PSU bank.
- Successfully Migrated Infrastructure from On-premises to AWS/Azure Cloud.
- Brought in DevOps Practice in Current Organization for the first time.
- Successfully restored 1.5TB corrupted data of one of PSU bank.
- Implemented near DC DR Switch over using Terraform.
- Designed and Implemented a Government Platform on NIC Cloud.
- Helped Organization achieve up to 40% savings in their annual Cloud Cost.
- Successfully implemented RHV and Openshift cluster setup for one of the PSU bank.
- Successfully shifted workload from DC to DR location during Chennai floods situation.
- Successfully integrated all AWS account with IBM radar for SIEM integration.
- Successfully resolved the 'UIDAI (AADHAR)' OTP issue.

Educational Qualifications:

- Bachelor of Engineering (Information Technology) from Mumbai University, 2014 with First Class.
- Diploma in Information Technology from Dr. D. Y. Patil Polytechnic, 2011 with First Class.

Organizational Scan:

1. Organization Name: NSEIT Ltd.

Designation: Technical Lead.

Duration: 8th January 2020 to till date

1. Project: Infrastructure cloud service (ICS)

Duration: 1st April 2021 to till date.

Roles & Responsibilities:

- Design, Deploy, manage cloud services (AWS, Azure) to optimize resource utilization and scalability while ensuring security best practices.
- Designed, Deployed, Managing "Office Of PSA MANTHAN PLATFORM". hosted on NIC cloud.
- Worked on 'UIDAI (AADHAR)' security implementation documents for BMass, Cmass, Vmass.
- Deployed and Managing PSU bank DC and DR Openshift, RHV setup.
- Designed, Deployed, Managing, Openshift and Kubernetes cluster on on-premises Server and AWS (ROSA), Azure (ARO).
- Designed and deployed and Managing Openstack setup (Private Cloud). (Kolla ansible method, Devstack, Packstack Methods)
- OS hardening.
- Active directory management.
- Develop and manage CI/CD pipelines to automate software builds, testing, and deployment across multiple environments. Implement and improve release management strategies to enable frequent and reliable software releases.
- Set up monitoring tools (e.g., Nagios, Prometheus, ELK Stack) to track system performance, identify bottlenecks, and implement optimizations. Troubleshoot and resolve issues related to application, infrastructure, or deployment processes.
- Work closely with development, operations, and quality assurance teams to foster a culture of collaboration and shared responsibility. Communicate technical concepts and strategies effectively to cross-functional teams and stakeholders. Handling a team of 10 members.
- Design, implement, and maintain infrastructure as code (IAC) using tools like Terraform, CloudFormation, or Ansible to automate provisioning and configuration management.

2. Project: NSE - International Financial Services Center (IFSC – GIFT CITY)

Duration: 8th January 2020 to 31st March

Designation : Senior Linux System Administrator

Roles & Responsibilities:

- File system management
- Installation and setup Linux as well as Window server as per client requirement
- LVM configuration (lv creation, lv extend)
- Patching Management
- Creating EC2 instance in AWS
- IAM rule configuration as per instance requirement
- Cloud watch management
- Troubleshooting
- Server performance monitoring
- Bonding configuration
- Adding or Deleting routes in server as per SD request.

- Data cleanup on local backup server
- NTP configuration on Linux server
- Server integration on satellite
- Linux OS hardening.
- Redhat Package Management (YUM repositories).
- User Administration (Create User and Group) Linux and Windows.
- Bitvisse configuration in windows
- IBM Bigfix configuration for windows patching

Virtualization Technology:

- VMware
- RHV
- KVM

Ticketing Tool:

- Service now

Monitoring Tools:

- ITRS, Nagios, Cacti, Prometheus grafana.

2. Organization Name: Zedo India Pvt Ltd.

Designation: Linux System Administrator.

Duration: 9th February 2015 – 31st December 2019.

Experience: 4 Yrs. 11 months.

Responsibilities:

- Responsible for the setup, installation, upgrade and implementation of Linux servers.
- Involved in Releases / Deployments, Escalations and Bug fixes on Production Services.
- Identifying and troubleshooting network issues using telnet, trace route and iftop commands.
- Writing the bash scripts to make the assigned task simple and for the instant resultants.
- Coordinating with data center via tickets and phone for multiple issues with server, IPMI console, Raid Failures.
- Also Created Production Server Report to Team Leads to keep track on server's functionality.
- Worked on database maintenance (production Postgres database vacuuming) and various releases like Tomcat based zedo target, Api, Adhoc.
- Sharing a directory using NFS as required.
- Scheduling tasks through Cron Jobs.
- Log Analysis, Maintaining documents of production server error log's reports.
- Maintaining AWS infrastructure and services within a managed service environment.
- Setting up EC2s, Installing & Configuring them with required software.
- Maintaining EC2 services like attaching volumes, configuring security groups, monitoring EC2 instance metrics like CPU Utilization, disk read/write operation and network.
- Experience with monitoring tool such as Cloud watch.
- AWS ELB Monitoring.
- Done Jenkins and Kubernetes Setup.
- Accountable for configuring and managing of:
 - Users, groups & permissions, create password less ssh logins on servers.
 - DNS (Addition and Deletion of Host Entries)
 - Disk space management
 - Raid management
 - Error Troubleshooting

- Worked towards monitoring of:
 - All hosts, services, switches, routers, Load Balancers by Installing, configuring and applying Service checks in Nagios.
 - Disk space, swap space, load, etc. on server by setting up threshold limit in Cacti in accordance of daily server usage.
- Accountable for installation of software's and packages on production and dev servers.
- Configuring and managing pingdom and smoking alert
- Configuring ssh tunneling

Personal Information:

- Date of Birth : 17th January 1993
- Languages Known: English, Marathi, Hindi.
- Hobbies: Listening music, Knowledge Gaining.
- Address:- 02/C-24, Sector-09, Ghronda, Ghansoli, Navi Mumbai.

Declaration:

I hereby declare that the information furnished above is true to the best of my knowledge.

Date:-

Place:- Navi Mumbai
