

Moole Venkateswara Reddy

POWER BI DEVELOPER

E-Mail: reddyvenky063@gmail.com

Contact No: +91-7780291842

OBJECTIVE

Seeking a challenging position as a Power BI Developer and Data Analyst, leveraging my technical skills, expertise in data modeling, ETL, and SQL, and proficiency in Power BI tools to drive organizational growth while ensuring job satisfaction.

PROFESSIONAL EXPERIENCE

- Over 1.8 year of professional experience in the IT industry with a focus on Data Warehousing projects using Power BI Desktop & Power BI Service at Vedhas Technology Solutions Pvt Ltd.

AS A REPORT DEVELOPER:

- Proficient in connecting to multiple data sources, including SQL Server, Azure Data Lake, and Excel, using Power BI to create complex datasets.
- Expertise in performing ETL activities within Power Query, including data filtering and transformation.
- Skilled in using various Power Query transformations such as Merge Queries, Append Queries, Pivoting Columns, Unpivoting Columns, Adding Custom Columns, Splitting Columns, and Merging Columns.
- Strong experience in data modeling within Power Pivot, including creating new columns, measures, and tables using DAX expressions.
- Extensive use of DAX functions, including Time Intelligence, Filter, Date, Logical, Text, Number, and Statistical functions, for creating informative reports.
- Proficient in building graphical visualizations using different visualizations in Power View.
- Hands-on experience with visual-level, page-level, report-level, and drill-through filters for data filtering.
- Expertise in creating hierarchies and drilldown reports, sorting data in visualizations, and grouping and binning data in Power BI.
- Experience in creating APP Workspaces and managing content in Power BI Service.
- Skilled in publishing reports to Power BI Service and setting up necessary connections.
- Proficient in creating dashboards using multiple reports and configuring data refresh with On-Premise Data Gateway.
- Implemented Row-Level Security (RLS) for data security in Power BI.
- Experienced in sharing reports and dashboards with end-users.
- Strong skills in writing SQL and NoSQL queries for data testing.

- Excellent communication, presentation, interpersonal, troubleshooting, and organizational skills.

ACADEMIC PROFILE

- M.B.A from St. Mary's Group of Institution, Chebrolu.

TECHNICAL SKILLS

- BI Tools: Power BI Desktop, Power BI Service
- Databases: MS SQL Server, Azure Data Factory, MongoDB
- Languages: SQL, Node.js, JavaScript
- ETL Tool: Power Query
- OLAP Tool: Power Pivot
- Visualization Tool: Power View
- Operating System: Windows

PROJECTS

Project: 1

Client: Vero Technologies

Project name: Lever Auto

Role: Power BI Developer & Data Analyst

Team Size: 2

Environment: Power BI, MongoDB, and Azure Data Lake.

Project Description:

Collaborated with Vero Technologies, a commercial lending platform, to develop custom and interactive Reports and Dashboards in Power BI for Quality and Error reports of auditors. Transformed data from MongoDB and Azure Data Lake for better modeling and visualization.

Responsibilities:

- Gathered and understood business requirements, building data relationships within Power Pivot.
- Performed data transformations suitable for improved modeling and visualization.
- Created various visualizations such as donut charts, pie charts, bar graphs, waterfall charts, and card visualizations.
- Implemented different filters (visual level, page level, report level) based on reporting needs.
- Utilized bookmarks, drilldown, drill through, and parameters to enhance user experience.
- Developed DAX measures for key metrics and implemented Row Level Security (RLS) for data access control.

- Published reports to Power BI server and scheduled refresh as per customer instructions.
- Generated alerts based on specified data thresholds.
- Created App Workspaces for easy report visualization as per client requirements.

DECLARATION

I hereby declare that the above information is true, correct, and complete to the best of my belief and knowledge.
