📍 Coimbatore

Objective

To give effective as well as efficient efforts towards attainment of organizational goals with exploring wide scope of knowledge and intelligence. To work in an environment that provides a challenging and rewarding career ensuring a high- level job satisfaction. In the process apart from benefiting my employer, I also expect to learn for my overall development.

WORK EXPERIENCE

QUEST GLOBAL | Senior Software Test Engineer

May 2023 - July 2024

CYBRID TECHNOLOGIES | Software Test Engineer

Feb 2020 - May 2023

Experience Summary

- Having 4+ years of experience in Automation Testing and Manual Testing.
- Having experience in automation using JavaScript with Playwright.
- Hands-on experience in writing robust locators using CSS and XPath.
- Experience in web application automation testing using Page Object Model (POM).
- Experience with Playwright Test Runner and BDD using Cucumber (via Playwright-Cucumber integration).
- Good knowledge of API Testing using Postman and REST APIs.
- Experience in working with GIT, Jenkins, Collaborator, and ALM.
- Familiar with writing modular and reusable test code using Playwright framework.
- Experience in continuous integration setup for automation pipelines using Jenkins.
- Strong experience in Agile-Scrum Methodology.
- Proficient in defect tracking tools like Jira and Rally.

EDUCATIONAL QUALIFICATIONS

B.E-CIVIL ENGINEERING 2017 in SIET, Anna University.

MBA-International Business 2024 in Alagappa University.

ProjectExperience:

Project 1:

Project Name	: GE Healthcare
Period	: May 2023– July 2024
Role	: Senior Test Engineer
Client	: XE
Organization	: Quest Global

Project Description:

The primary objective of this project is to support and enhance Core Services HUB (XE) which consists of a set of components installed and deployed in different configurations to provide Imaging and Clinical data available across the enterprise. The solution supports retrieving data from various data sources, consolidating the data based on user input, and exposing data as a standard FHIR/JSON Rest service.

Roles and Responsibilities:

- Adapted the responsibility for ongoing project tasks upon joining the team, working with team to get understand on the issues found.
- Collaborated with the team members and analyzed project results, executing necessary actions to achieve desired outcomes and meet project objectives.
- Understanding existing test cases, test data and executing the test cases and validating the results.
- Created comprehensive test cases based on project requirements to ensure the functionality and Modifying and Executing scripts.
- Updating test cases in ALM and updating the results.
- Rally to track the user stories and tasks for each sprint iteration.
- Used different testing methods like functional, sanity and regression testing to check the performance.
- Used collaborator for creating Testing and BDD Template for the code review and for the review purpose.
- Used ALM for creating manual test cases and execution and creating test set id for collaborator for testing template.
- Raise a merge request to release branch, if any code changes are made.
- Status reporting.

Project 2:

Project Name	: Cybrid Technologies
Period	: Jan 2022 – May 2023
Role	: Senior Test Engineer
Client	: Little Canadian
Organization	: Cybrid Technologies

Project description: Little Canadian was started in 2017 as an online baby shop, hoping to provide parents with products and knowledge for all their baby needs. The website quickly became popular and people started flooding to the warehouse. Customers were asking to see the products in personas well as have them demonstrated. It became clear the next step was to open a location, and in March of 2019 the first Little Canadian retail baby store was opened in Mississauga.

Roles and Responsibilities:

- Analysing the user stories.
- Preparing the test scenarios, test cases, and preparing test data.
- Identifying which test cases can be automated and implementing automation using Playwright with JavaScript.
- Developing BDD-style tests using Cucumber with Playwright (featurefiles and step definitions).
- Creating Page Object Models and reusable components.
- Executing test scripts using Playwright Test Runner, debugging failed cases.
- Used npm scripts and Jenkins to build and execute test automation pipelines.
- Reporting and tracking defects through JIRA, and performing re-testing.
- Involved in testing the application using Agile/Scrum methodology.
- Participated in Sprint planning, stand-ups, reviews, and retrospectives.
- Reviewed test cases, participated in test case walkthroughs.

Project 3:

Project Name	: Cybrid Technologies
Period	: Feb 2020 – Jan 2022
Role	: Junior Engineer
Client	: Belavia
Organization	: Cybrid Technologies

Project Description: The project is Belarus based Airline which attracts the Top Tourist Destination. Headquarters is located in Minsk. It even services to over 52 international destinations in European cities and the Commonwealth of Independent States, as well as some Middle East destinations. The modules available are “Booking Ticket”, “Passenger Booking”, “Cancel Booking”, “Hotel Booking”.

Roles and Responsibilities:

- Analysing the user stories.
- Preparing the test scenarios, test cases and preparing test data.
- Raise and track defects until closure and Re-test resolved defects.
- Involved in testing the application utilizing the Scrum (Agile) methodology.
- Participated in the all-Agile ceremonies – Sprint planning, daily Scrum meeting, Sprint review and Sprint- retrospective.
- Defects reporting and daily status report.
- Reviewing the Test Reports and Preparing Test Summary Report.
- Test case walkthrough before client and development team.
