

PRIYANKA BEHERA

Storage Test Engineer

✉ priyankabehera221@gmail.com

☎ 8908679098

📍 Bengaluru

Objective:

A growth-oriented profile by obtaining a challenging position, which can best utilize my experience and skills endeavoring towards organizational success and individual growth.

Professional Summary

Software QA Tester with over 3.5yrs of experience in server & storage testing, Expertise in storage QA & HW Platform validation coverage via manual & automated approach.

Strong knowledge of the SDLC environment, and QA testing Process. hands-on experience in managing large SAN, NAS and ISCSI & FC storage box such HPE Nimble storage Arrays, NetApp, Emc storage Arrays.

Strong skills in Network Appliance, Intel, Mellanox, RAID, AIC cards, and drives such as SSD,NVME & M.2

Technical skills:

- **3.5 Years** of experience in the IT industry – **Storage &Server QA Testing.**
- Involved in **Manual** and Automated testing.
- Experienced in Participating in the entire QA life cycle, mainly involved in the primary frame of designing, developing, and running the entire execution flow in the QA cycle.
- Experienced in **writing test plans & test cases as per the Platform intention & release requirement.**
- Hands-on experience with **BMC, BIOS, UEFI validation** on different platforms.
- Experienced in **QA procedures and methodologies, as well as software development fundamentals.**
- Work experience in **VIRTUALIZATION** Technology.
- Experienced in raise defects and tracking the bug or issue appropriately using the JIRA tool.
- Experience in **Executing** automated scripts and analyzing the entire script in case of any failure for debug. Experience in setting up **DAS and SAN** - installation, configuring, and troubleshooting.
- Validating HW components on NX Platforms (SSD, NIC, BIOS, BMC)
- Performed Certifications for Riverbed products.
- Experienced in creating Luns using different storage arrays such Emc storage Arrays,netapp, HPE Nimble storage Arrays
- Experience in virtualized environments such as VMware, Citrix, Hyper-V, & KVM

Work Experience

Designation: Software Test Engineer

Mphasis, Bangalore

From Aug / 2023 – Till date/Ongoing

Designation: Software QA Engineer

Nutanix, Bangalore

From Oct/ 2020 – Aug 2023

Project Summary:

Overview:

Steelhead appliance or steelhead-box leading towards the network optimization & appliance performance solution over wide area network. It increases the bandwidth of business productivity. It enhances data & application streamlining.

Project 1: Riverbed Acceleration Team

Riverbed Steelfusion Appliance

release version- 9.15.1

Mphasis, Bengaluru

Project 2: Riverbed Acceleration Project

Riverbed SCC Appliance

Release version-6.5.0

Mphasis, Bengaluru

Project SW & HW Details:

Appliance: Riverbed Steel Central Controller Box & Steelhead Box

OS : RIOS(Riverbed Operating System)

Storage Array: HPE Nimble Storage Arrays, Netapp array, EMC

Storage Protocol: ISCSI, FC

IO tool : IO meter

Guest OS: Esxi , Linux 8.9, 9.0

Virtual drive: SATA SSD

Project involvement:

- Develop and implement test plans for Functional validation based on product requirements.
- Define validation strategies, test cases, and procedures to ensure comprehensive coverage of functionality.
- Conduct functional, performance, and sanity testing of systems.
- Validate SAN protocols ISCSI, FC, configuration & troubleshooting.
- Troubleshoot and analyses test results to identify and report issues.
- Participate in the improvement of validation processes & Triage customer issues.
- Involved in appliance bringing up to start the test execution.

Project Summary:

Nutanix Platforms Support all workloads and use-cases across public and private clouds, hypervisors, and containers to ensure the delivery of compute, storage, database, and virtual network services.

Project 3:

NIC/Ethernet Adapter validation

Vendor- Mellanox, Intel,

Nutanix, Bengaluru

Project 4:

Raid Adapter Validation

Vendor-LSI 3008

Nutanix, Bengaluru

Project SW & HW Details:

Project Name: NIC\Ethernet adapter validation

Product name: Intel X500 & x700 series Ethernet adapter

Platform used: NX-3060-G6, NX-8155-G6/G7, Nx-3170-G6 OS Used:

Windows2019/2022, RHEL8.0,9.0, ESXi8.0

Tools Used: Network traffic benchmark tool-Iperf3

Bug Tracker: JIRA

Test scope: regression, Sanity Milestone Coverage

Drives: SSD, NVME

RAID: LSI 3008 HBA & Perc H740 Adapter

Project involvement:

- Executed Storage and ISCSI& Disk drives, and technologies-related test cases.
- Did various feature compatibility testing with different OS.
- Verified various RAID modes supported by the storage controller.
- Did various functional testing on Raid controller cards.
- Did various storage and network testing using different firmware and driver releases.
- Actively involved to triage, debug & Reproduction of some customer issues.
- SUT setup & Configuration Preparation.
- Validate Network controller cards using vSphere Web client.
- Involved in defect tracking & reporting.

Education

- Completed MCA from college of Trident Academy of Technology, Under BPUT University with 8.3 CGPA in 2019.
- Completed BCA from the Institute of Professional Studies & Research, Odisha with 70% in 2017.

Interests

My area of interest includes visiting new places, Listening to songs & games.
