

Purnima Kadate

Software Engineer

 purnima.kadate7@gmail.com

 8208128591

 Pune, India

SKILLS

- Problem Solving
- Management
- Handling Pressure
- Leadership

TECHNOLOGY

- HTML & CSS 
- JavaScript 
- React JS 
- Node & Express JS 
- Mongo DB 
- Bootstrap 
- Material UI 

EDUCATION DETAILS

- Bachelor of Engineering-
Shivaji University.

CAREER OBJECTIVE

To associate myself with a progressive organization that gives me scope to update my knowledge and skills.

PROFESSIONAL SUMMARY

- An accomplished professional with **4+** years of experience in Development using Front-end-technologies.
- Having technical expertise and exposure on UI development using **HTML-5, CSS, Bootstrap, JavaScript** and **React Js** - React Hooks, React-Router, React-Redux and Saga.
- Knowledge of **Node JS** and framework **Express Js**. Understanding of server-side templating languages and basic API creation as well as **MongoDB** database for developing application.
- Thorough understanding of **ReactJs** and its core principles.
- Implementation of connectivity with API services by using **Axios** and **Fetch**.
- Working experience in **GitHub**, Visual Studio Code and **Agile** methodology – **Scrum**.
- Ability to work on challenging innovative products and delivering the solution within stipulated timeframe under any given environment.
- Extensive knowledge and experience in all the stages of the software development beginning from initiation and definition to till deployment and support.
- Ability to learn quickly new technologies and methodologies.

TECHNICAL SKILLS

Frontend Technology: HTML, CSS, Bootstrap, JavaScript, React JS

Backend Technology: Node JS, Express JS

Database: MongoDB

Tools: Visual Studio, Git-Hub, JIRA

Operating Systems: Windows 10/9/8

Other Tools: MS Office, MS word, MS Excel

WORK EXPERIENCE

1. **COFORGE BUSINESS PROCESS SOLUTIONS(JULY-2023 TO TILL DATE)**
2. **INFLUXARENA TECHNOLOGY(JAN- 2021 TO May-2023)**
3. **DHANAPRAKASH INDUSTRIAL CORPORATION, INDIA (DEC 2018 TO DEC 2020)**

Software Engineer

Project #4: Post Office-UK

Client: Post Office-UK

Role: Frontend Developer

Technologies: React JS, Router, Redux, HTML-5, JavaScript, Bootstrap, MongoDB, Node & Express

Description: Post Office Limited is a retail post office company in the United Kingdom that provides a wide range of products including postage stamps and banking to the public through its nationwide network of post office branches. It directly manages almost 200 of the more than 10,000 post office branches.

Roles and Responsibility:

- Actively participated in daily scrum calls, understanding the business requirements.
- Understand the complete source code flow of the application.
- UI development by using React JS with React Hooks.
- Managing application-level state by using Redux and Redux hooks – useDispatch, useSelector.
- Responsive web design by using React Bootstrap, HTML5, CSS3.
- Used Props and state to interact components each other.
- Created different forms using the React JS.
- Created databases using MongoDB database.
- Worked with Node and Express to create API.
- Worked with React-Router for routing.
- Implemented state management using Redux.
- Implementation of connectivity with API services by using Axios / Fetch.
- Pushing and Pulling code to GitHub repository.

Project #3: United Airline, USA

Client: United Airline, USA

Role: UI React JS-Software Developer

Technologies: React JS, Router, Redux, HTML-5, JavaScript, Bootstrap, MongoDB, Node & Express

Description: United Airlines, Inc. is a major American airline headquartered at the Willis Tower in Chicago, Illinois founded in 1926. United operates a large domestic and international route network spanning cities large and small across the United States and all six continents.

Roles and Responsibility:

- Actively participated in daily scrum calls, understanding the business requirements.
 - Understand the complete source code flow of the application.
 - UI development by using React JS with React Hooks.
 - Managing application-level state by using Redux and Redux hooks – useDispatch, useSelector.
 - Responsive web design by using React Bootstrap, HTML5, CSS3.
 - Used Props and state to interact components each other.
 - Created different forms using the React JS.
 - Created databases using MongoDB database.
 - Worked with Node and Express to create API.
 - Worked with React-Router for routing.
 - Implemented state management using Redux.
 - Implementation of connectivity with API services by using Axios / Fetch.
 - Pushing and Pulling code to GitHub repository.
 - Improved performance using Lazy loading.
 - Design and develop static or dynamic components based on the requirements from product owner.
-

Project #2: Specsavers, UK

Client: Specsavers, UK

Role: UI React JS-Software Developer

Technologies: React JS, Router, Redux, HTML-5, JavaScript, Material UI, CSS

Description: Specsavers Optical Group Ltd is a British multinational optical retail chain, which operates mainly in the UK, Ireland, Australasia, Canada and the Nordic countries. The chain offers optometry and optician services for eyesight testing and sells glasses, sunglasses, and contact lenses. It also sells hearing aids. In the United Kingdom in 2012 it had the largest single market share of the four major opticians, with 42% of the market.

Roles and Responsibility:

- Attending daily stand-up meeting, estimation meeting to analyze the project requirement.
 - Front end development using React JS, Redux, Saga, HTML-5, CSS-3 and Bootstrap.
 - Created different forms using React JS.
 - Implemented React-Router for routing.
 - Share logic between Component using State and props
 - Implemented React-hooks, Context API
 - Used functional Component and Class Component for App Development.
 - Used GitHub for version control Management.
 - Used Fetch for making API calls.
-

Project #1: Dhanaprakash

Client: Dhanaprakash

Description: Dhanaprakash industrial corporation is engaged in Manufacture of Automatic Oil / Gas Fired Heating Systems of Industrial & Commercial use which is established in 1984. The organization has full-fledged Designing & Manufacturing facilities from concepts to commissioning in India.

Roles and Responsibility

- UI development by using React JS with React Hooks ·
- Managing application-level state by using Redux and Redux hooks – useDispatch, useSelector.
- Responsive web design by using React Bootstrap, HTML5, CSS3.
- Highly complex components designing by using React with minimum usage of third party NPM packages.
- Designing and using dynamic and reusable components.
- Implementation of connectivity with API services by using Axios / Fetch.
- Pushing and Pulling code to GitHub repository.
- Design and develop static or dynamic components based on the requirements from product owner.
