

Prasad Reddy
Power BI Developer
Email: prasad90.bi@gmail.com
Phone :9154451931

An experienced and highly motivated IT professional having around 6+ years of experience in analysis, design, development, testing, and support of Business Intelligence products and services in Microsoft Power BI, Power Query, SQL Server. Hands-on experience in the development, administration, managing, designing, and testing of enterprise-wide reporting systems. Strong data architecture, business requirement analysis using agile methodologies Possesses exemplary technical problem-solving skills and is accustomed to delivering results under considerable pressure, remaining calm and effective, and prioritizing wisely.

Professional Summary:

- Involved in various phases of Systems Development Lifecycle methodology: Requirement Analysis, Development, Implementation and Production Migration.
- Experienced in developing Power BI reports and dashboards from various Data Sources like SQL Server, PostgreSQL, SAP Hana databases, SharePoint and Excel files etc. And data design, data modelling (star-schema modelling, snowflake schema modelling and fact & dimension tables), development, ETL or ELT and reporting in Power BI.
- Created efficient reports, dashboards using Power BI Desktop by using of attractive & interactive visualizations, using custom visuals and prepare dashboards.
- Knowledge working with Map Reports and Stacked Reports
- Knowledge on Power Query
- Knowledge on DAX Functions and Usage
- Knowledge on DAX Measures and Calculations
- Dashboarding and Dataset Refresh using Gateways (Personal), Used Power BI Gateways to keep the dashboards and reports up to date
- Knowledge using Content Packs.
- Created Scorecards, Bookmarks.
- Worked with Edit Interactions and Sync slicers
- Having knowledge on Text Analytics
- Worked on creating different types of relationships between two or more tables in the Power BI data model.
- Implemented Database Testing to evaluate Power BI report data after development, report testing support and direction for the UAT and Quality teams
- Good at database concepts (joins, sub queries, set theory, views, and procedures)
- Understanding with writing user stories and Sprint execution Power BI reporting stack understanding
- Knowledge on Power BI Licenses and Gateway Types
- Imported Data from SQL Server DB to Power BI to generate reports
- Creating Row level security with power bi and integration with power bi service portal
- Scheduled Automatic refresh and scheduling refresh in power bi service
- Worked on all kind of reports such as Yearly, Quarterly, Monthly, and Daily
- Worked on Tabular model in SQL Server Analysis Services by using Visual Studio and deploying in server.
- Knowledge on creating the apps for business purpose in Power Bi Service

Professional Experience:

- Working as a Power bi Developer to the client Persistent Systems from Dec 2017 to Till Date.

Scholastics

BSC (Computer Science) from SVU, Tirupati, 2010.

Technical Skills

Operating Systems	Windows family
BI Tools	Power BI Desktop, Power Query Editor
Databases connected	SQL server, PostgreSQL, SAP Hana, AWS, Excel and SharePoint
Languages	SQL, DAX
Data Modeling	Star Schema, Snow Flake Schema.

Professional experience:

Client: Persistent Internal

Project: Contract Dashboard

Environment: Power BI, SQL server, PostgreSQL, SharePoint.

Role: Lead Software Engineer.

Responsibilities:

- Created an Innovative BI reports to have all the operations related reports under a single roof.
- Worked on the requirement gathering of the reports for contracts and deals in various operations.
- Created Apps in service to embedded in URL'S.
- Used Power BI, Power Pivot to develop data analysis prototype, and used Power View to visualize reports.
- Analyzed the database tables and created database views based on the columns needed.
- Created parameters, filters, buttons, and actions.
- Visuals containing Bookmarks to show Top N new bookings, new cancellations based on products, top customers based on their sales.
- Created graphs like Line, bar and Column and Pie charts etc.
- Implemented calculations and parameters wherever needed.
- Published Reports to Power bi service and scheduling refresh for reports.

Client: Persistent Internal

Project: Monthly Score Card Report

Environment: Power BI, SQL server, PostgreSQL, SharePoint.

Role: Lead Software Engineer.

Responsibilities:

- Imported data from SQL Server DB to Power BI to generate reports.
- Created Dax Queries to generated computed columns in Power BI.
- Generated computed tables in Power BI by using Dax.
- Involved in creating new stored procedures and optimizing existing queries and stored procedures.
- Used Power BI, Power Pivot to develop data analysis prototype, and used Power View and Power Map to visualize reports.
- Published Power BI Reports in the required workspace and Made Power BI Dashboards available in Web clients and mobile apps.
- Explore data in a variety of ways and across multiple visualizations using Power BI
- Used Power BI Gateways to keep the dashboards and reports up to date.
- Installed and Configured Enterprise Gateway in Power Bi Services.
- Published reports and dashboards using Power BI.
- Bridging gap in domain understanding between the client and technical team by translating the requirement.
- Responsible for sprint planning, product backlog creation and roadmap planning

Client: HCL Tech

Project: PHR

Environment: Power BI, SQL.

Role: Software Developer

Responsibilities:

- Understand business requirements of BI context and design a data model to transform raw data into meaningful insights
- Use Power BI to create dashboards and interactive visual reports
- Identify key performance indicators (KPIs) that have clear goals and consistently monitor them.
- Analyze data and present it.
- Convert business requirements into technical specifications and implement them through reports that support decision making
- Worked on Report Design and Visualization
- Worked with Decomposition tree chart, scatter chart.
- Created filters, Visual level, Page level, Report level on the report data.
- Created Dax Measures and Calculations
- Worked on enhancement of the report
