| • JavaScript | • Tailwind CSS | • Material UI | • JWTtoken |
| • Redux Toolkit | • Postman | • Vercel | • React Strap |
| • Node JS | • TypeScript | • Netlify | • Shopify Apps |
| • Express JS | • GitHub | • Render | • React Icons |
| • Mongo DB | • GitLab | • Heroku | • Razorpay Api |
| • Bootstrap | • Stripe | • Linux | Integration |
| • Ant Design | • Jira | • Animations | |

PROFESSIONAL EXPERIENCE

Scalacode, Noida sector 62 • MERN Stack / React JS Developer

Dec 2023 – May 2025

(1) Jupiter Website (<https://pronto.healthmonitor.com/>)

React.js, Redux Toolkit, Bootstrap, Ant Design, Node.js, Express.js, MongoDB, JWT token etc.

- **Jupiter Website:** Collaboratively developed a hospital management web application for handling work orders and maintenance tasks.

- Developed user-friendly and performance-optimized UIs using React.js, Redux Toolkit, and Bootstrap.
- Implemented efficient and scalable back-end services with Node.js, Express.js, and MongoDB.
- Implemented a system for generating and assigning **work orders** to technicians, tracking their visits to hospitals for instrument repairs.
- Developed an **appointment calendar** feature to manage and display all hospital appointments.
- Created a **survey result page** for tracking and displaying descriptions of various hospital devices and equipment.

(2) TipStars (<https://tipstars.vercel.app/>)

React.js, Redux Toolkit, Bootstrap, Ant Design, Node.js, Express.js, MongoDB, JWT token, Stripe etc.

- **TipStars PWA:** Individually developed TipStars, a Progressive Web App that connects artists and art enthusiasts through a tipping-based social platform.
- Engineered a full-stack application using React.js and Redux Toolkit for state management with a Node.js/Express.js backend.
- Implemented secure user authentication and authorization using JWT tokens for protected routes and user sessions.
- Designed and built artist profiles with customizable banners, galleries, and portfolio management capabilities.
- Created a seamless art upload system with metadata management and content categorization features.
- Integrated Stripe payment processing to enable direct monetary tipping between users and artists.
- Developed real-time social features including likes, follows, comments and private messaging between platform users.
- Built an interactive art discovery feed with skip, like, and share functionality for content curation.
- Incorporated Chart.js to visualize artist analytics, tipping history, and engagement metrics.
- Constructed a responsive UI using Bootstrap and Ant Design component libraries for cross-device compatibility.
- Designed and implemented a NoSQL MongoDB database architecture for efficient data storage and retrieval.
- Optimized application performance through code splitting, lazy loading, and efficient API request handling.
- Created an events management system for artists to promote exhibitions and art-related activities.
- Implemented comprehensive search functionality across artists, artworks, and events with filtering options.

(3) NXTGuest (<https://nxtguest.vercel.app/>)

React.js, Redux Toolkit, Bootstrap, Ant Design, Node.js, Express.js, MongoDB, JWT token, Stripe etc.

- **NXTGuest PWA:** Individually developed a Progressive Web Application for booking luxury Cabs from airport to hotel.
- Utilized React.js, Redux Toolkit, Bootstrap, and Ant Design for the front-end, delivering a responsive and intuitive user interface.

- Built a robust back-end using Node.js and Express.js, integrating with MongoDB for database management.
- Implemented secure payment processing using Stripe for seamless transactions.
- Developed and optimized multiple service forms, including Self-Service, Other Service, and Group Service forms.
- Integrated JWT token-based authentication for secure user sessions and data protection.
- Designed and implemented additional features such as Contact Us, Feedback, and View History to enhance user interaction.

GRNConnect, New Delhi • MERN Stack / React JS Developer

Jan 2023 – Dec 2023

(1) GRNConnect Website (<https://www.grnconnect.com/>)

React.js, Redux Toolkit, Bootstrap, Material UI, Ant Design, Node.js, Express.js, MongoDB, Chart.js

- **GRNConnect Website:** Developed a B2B **travel** domain platform for international hotel bookings, flight bookings, cab bookings, and activity reservations.
- Implemented the front-end using React.js, Redux Toolkit, Bootstrap, Material UI, and Ant Design for a dynamic, user-friendly interface.
- Utilized Node.js and Express.js for the back-end API, integrating with MongoDB for secure and efficient data handling.
- Integrated Chart.js for visualizing booking statistics and trends in a user-friendly manner.
- Streamlined the user journey for booking and managing travel services across multiple categories.
- Ensured seamless performance and responsiveness for optimal user experience across all devices.

(2) Evolve IAS (<https://evolveias.com/>)

Next.js, Bootstrap, API Handling, Node.js, Express.js, MongoDB, Animations

- Built a comprehensive Next.js project as part of a two-member team.
- Developed dynamic and responsive UIs using Next.js and Bootstrap.
- Managed API integrations and back-end services with Node.js, Express.js, and MongoDB.
- Implemented animations to enhance user experience and engagement.

(3) E-commerce Website (<https://e-commerce-global.vercel.app/>)

React.js, Redux Toolkit, Bootstrap, Ant Design, Node.js, Express.js, MongoDB, API Handling, Stripe

- Independently built a complete MERN stack e-commerce platform.
- Designed and developed responsive UIs with React.js, Redux Toolkit, Bootstrap, and Ant Design.
- Implemented secure and scalable back-end services with Node.js, Express.js, and MongoDB.
- Integrated Stripe for seamless payment processing.
- Deployed the back-end on Render and the front-end on Vercel.

ENS Enterprises, Noida sec 63 • MERN Stack / React JS Developer

Jan 2022 – Dec 2022

- **ONDC** - E-commerce dashboard on react.js including axios library for API handling and jwt authentication process. Working as part of team of 4 members.
- **ENS Website** - In house project on next.js including bootstrap, and styled components for styling, worked as a part of team of 2. s

- **Zip code validation** - UI revamp of app for Shopify website, independently, build on react.js including context API for State management and styled components for styling and axios library for API handling.
- **Tabicon** - UI revamp of app for Shopify website, build on react.js including context API for State management and styled components for styling and axios library for API handling. For changing the icon of store in shopify website. Team of 2 members.
- **OTP Validator** - UI revamp of app for Shopify website, independently, build on react.js including context API for State management and styled components for styling and axios library for API handling. For OTP validation on shopify website. Team of 2 members.

Strategic IP Information, Noida sector 2 • Research Analyst

Nov 2019 – Aug 2021

Pvt Ltd

- Conducted comprehensive prior art searches and patent landscaping using tools like Google Patents and USPTO.
- Analyzed patent claims, technical specifications, and legal status to assess novelty, infringement risk, and patentability.
- Supported IP strategy development by identifying patent trends and white spaces in specific technology domains.

EDUCATION
