CAREER OBJECTIVE

To obtain a challenging position as a Embedded Software Engineer where I can utilize my experience in Embedded software development.

PROFESSIONAL SUMMARY

- Having a good knowledge in C, C++, C# and Embedded C Programming Languages.
- Design and implement software of Embedded devices and systems from requirements to production.
- Proficient in GUI development using QT Creator, with practical hands-on experience.
- Good knowledge on OOP's in C++ and also has the ability to test software for resolving problems.
- Developing software application using QT-widgets and integrating them with components.
- Knowledge on various communication protocols like SPI, UART, I2C and TCP/IP.
- Familiar with OS concepts like Multithreading, Process and Socket Programming.
- Exposure to ARM architecture and offline based database SQLITE-3.
- Ability to adapt quickly to an existing, complex environment and ready to accept any challenges.
- Good team player, quick learner, capable of working in high-demand work environments.
- Strong explore on Software Development Life Cycle (SDLC) and agile methodology.

WORK EXPERIENCE

- Embedded Software Engineer with 2+ years Exp. at **Ciesto Information Technologies Pvt. Ltd.**, from SEP 2021 to Till Now.

TECHNICAL SKILL

- Programming Languages: C, C++, Embedded C.
- Software Tools : Qt Creator, Visual Studio.
- Operating System : Linux (UBUNTU) & Windows.
- Protocols : UART, I2C, SPI & TCP/IP.
- Data base : SQLite.

PROJECTS EXPERIENCE

Project 1: **Developing a data connectivity framework for efficient transmission.**

- Role : Developer
- Environment : C++, Linux, QT Creator, ARM Cortex A.

DESCRIPTION

The primary purpose of this system is to digitalize and manage product details efficiently. It enables seamless communication between two sections, ensuring timely data exchanges through well-structured

inter process communication, achieved using socket programming.

RESPONSIBILITIES

- Maintained detail documentation of the process, flowcharts for the required problems and solutions.
 - Designed and deployed the UI (User Interface) using QT-Creator.
 - Spotting and rectifying C++ software coding issues and resolved with minimal guidelines.
 - Collaborating with the team to ensure project success.
-

Project 2: HMI based Smart Portable Dispenser System.

- Role : Developer.
- Environment : QT IDE, C++, Linux, ARM Cortex A.

DESCRIPTION

The project's central component is the Centralized Liquid System, which efficiently manages and dispenses branded formulation powders by mixing them with liquid. This is achieved by selecting individual settings on the Human-Machine Interface.

RESPONSIBILITIES

- Worked with cross-functional teams to gather product requirements.
 - Designed and implemented the multiple user interface screens using the Qt framework.
 - Developed operational code in C++ based on the finalized design.
 - Actively participated in resolving software issues & team meeting to express the opinion.
-

Project 3: Monitoring multiple ADC sensors Intelligence System.

- Role : Developer
- Environment : Embedded C, .

DESCRIPTION

The product is designed to monitor and collect data from multiple sensors in real-time, ensuring secure storage of the data in memory in various formats for later analysis and retrieval.

RESPONSIBILITIES

- Reviewing related documents about the product.
 - Peripheral devices interfacing and debugging on proteus.
 - Protect data through encryption and authentication.
 - Handle errors and ensure system resilience.
-

EDUCATIONAL QUALIFICATION

- B.E. (Electrical & Electronics Engineering) at Nalla Narasimha Reddy Education society's group of institutions (JNTUH) in 2021 with 7.18.
 - Intermediate (MPC) at SR Junior College for Girls in 2017 with 89.9.
 - 10th from Krishnaveni Talent School in the year of 2015 with 8.8.
-

PERSONAL DETAILS

- Nationality : Indian.
 - Marital Status : Single.
 - Languages : English, Telugu and Hindi.
-
