SUMMARY

Data-driven information management professional with over 14 years of experience, specializing in translating business requirements into impactful products. Seeking Salesforce roles as a Technical Project Manager, Solution Architect, or Engineering Manager.

EXPERIENCE

Technical Consultant (Software)

Tata Consultancy Services

July 2021 - Present, Hyderabad, India

- Leadership Technical Expertise: Demonstrated leadership in workshops and proficiency in User Journey preparations, Data Modeling, Apex Design Patterns, LWC, and modern UI techniques.
- Strategic Consultation: Trusted advisor to clients, guiding conversations with Enterprise Architects, shaping architectural vision, and establishing program roadmap.
- Facilitated stakeholder collaboration and partnership development, successfully negotiating solutions with third-party vendors, which resulted in a 15% increase in project efficiency and customer satisfaction.
- Implemented software solutions for clients, increasing system efficiency by 25% through comprehensive needs analysis, custom application development, and integration of cutting-edge technologies such as cloud computing and AI-driven analytics.

Consultant

GSS Pvt. Ltd.

September 2019 - July 2021, Ahmedabad, India

- Digital Transformation & Risk Management: Led digital transformation initiatives on the Salesforce platform, identified and mitigated risk areas, and ensured timely resolution of issues.
- Solution Collaboration: Collaborated extensively with stakeholders to design and implement customized technology solutions, ensuring alignment with client needs and project objectives.
- Effectively prepare Business Process, Process Flow Analysis, Requirements Definition, Configuration Workbook, Data Models, Detailed Functional Design, Executive Summaries and Project Plans.
- Developed comprehensive roadmap planning strategies, resulting in a 25% increase in project completion rates using Agile methodologies over a 12-month period.

Business Analyst & Team Leader

Pacifica Companies

August 2013 - August 2019, Ahmedabad, India

- Executing solution design activities such as object modeling and data modeling/mapping, page layout design and rule logic definitions.
- Managing Salesforce testing and validation efforts to ensure that the Salesforce configuration and development meets the business requirements and solution design.
- Lead technical requirements and design gathering sessions and writing technical requirements and design documents.
- Partner closely with stakeholders, effectively utilizing CRM tools within an agile development environment, resulting in a notable 23% increase in company profits.
- Spearheaded a process redesign initiative that reduced project delivery time by 30% over 6 months, utilizing Lean Six Sigma methodologies and collaborative workshops involving cross-departmental teams.

Consultant (ERP/WEB)

Advantage Solutions

August 2012 - July 2013, Ahmedabad, India

- Experience in moving code from lower sandboxes to production environment and address issues related to functionality, integration, etc.
- Streamlined dashboard metrics by unifying data from multiple systems, enhancing business forecasting and pinpointing performance improvement opportunities.
- Assisted development and testing teams throughout project life cycle by preparing documentation and obtaining sign-off at various stages.
- Identified gaps in ERP system functionality, increasing process efficiency by 25% over six months by leveraging SQL and Power BI for comprehensive data analysis.
