Profile Summary

Hardware Engineer with B.E in Electrical and Electronics specializing in electronics design and having 3+ years of work experience in Embedded and power electronics design and testing in automotive, industrial and consumer domains. Seeking a responsible position where I can utilize my educational & analytical skills in an industry that offers intellectual and professional growth, while being resourceful, innovative and flexible.

Work experience

Skills:

- Design, Develop, Test and Debug hardware circuits and systems, including schematic and PCB layouts.
- Manage inventory, overseeing procurement and tracking of hardware components.
- Engage in discussions and negotiations with manufacturers and distributors
- Pre-compliance testing
- Create and maintain comprehensive documentation for hardware designs, specifications, and test plans.
- Identify and implement opportunities for process improvement in hardware design methodologies.
- Work closely with cross-functional teams, ensuring seamless integration with software and firmware
- MS office
- Constraint setting

Career History:

L&T Technology Services: Aug 2021 - Present(3 years 5 months)

- Hardware Design Engineer (Jan 2023 - Present)
- Associate Hardware Design Engineer(Oct 2021 - Dec 2022)
- Intern(Aug 2021-Oct 2021)

Technical Skills:

- Excellent knowledge of Microcontroller/microprocessor based hardware design and associated subsystems such as the power supply, I/O interfaces, and communication protocols.
- PCB stackup, Viass and rules Structure design..
- Electrical Designing , review and verification
- Multitask on multiple development projects and work under tight deadlines.
- Good team player with strong project planning, problem- solving and creative skills.
- Hands on Experience in board bringing up, debugging and functional testing.
- Communication protocols - UART,I2C, SPI,RS485,CAN
- Experienced in Digital, Analog and Mixed signal design
- Experienced in making power budget, component selection, Bill of materials, Foot print review, Module and system level Test plans, Hardware Design Documents Simulation, DFMEA, Stress analysis of components.
- Experienced in Power electronics product design and development.
- Sound Knowledge of hardware design and simulation tools like KiCad, Altium, OrCad, TINA-TI, LTSpice, PSpice.
- Knowledge on lab equipments - Multimeter, DSO, Electronic Load
- Experienced in Soldering and Harness analysis
- Experienced in complete product development from requirement capture to Pre Compliance (EMI/EMC) testing of final product.
- Facilitate the procurement process for bill of materials (BOM) components.

Accomplishments

- **2 times "JURY Award"** from L&T in the Hackathon for the concept- Industrial shed Conventional ventilation system efficiency monitoring and Lunch Line management system.
 - **STAR OF THE MONTH award** for good performance in project delivery

Professional Career:

1. **Project 1 : E-Moisture Sensor : E-Moisture sensor is a prototype built do detect the moisture content in the Chiller pipes using camera sensor.**

- Schematic capture
- PCB veification
- Design and testing Documents

Project Duration: From Mar 2022 - Sep 2022

2. Project 2 : Battery Charger: To charge the battery inside transicold trucks.

- Schematic capture
- PCB verification
- Design and testing Documents

Project Duration: From AUG-2022 – Mar-2023

3. Project 3 : Data logger : Data logger device collects sensor data of AC Voltage, Current and Temperature and stores the data in the cloud through cellular communication.

- Schematic capture
- PCB Verification
- Design and testing Documents

Project Duration: From Mar-2023 – Dec 2023

4. Project 4 : DACT : DACT device communicates the events and data of the Fire alarm system with the Central Monitoring system of the Fire system

- Schematic capture
- PCB Verification
- Design and testing Documents

Project Duration: From DEC-2022 – Mar 2024

5. Project 5 : Inverter 6KW : Power Conversion Module provides supply to the compressors and heaters in the Transicold trucks. Consisting of Converter, 1KW DC-DC supply and power selector section.

- Schematic capture
- PCB Verification
- Design and testing Documents

Project Duration: From Jan-2024 – (current)

Education:

Qualification	Discipline	Percentage	Institution	Year of Passing
10th Grade	General Studies	93.28	K.H.E.P High School, Ambikanagar	2015
12th Grade	PCMB	93.83	Alvas Pre-University College, Moodbidri	2017
Bachelor of Engineering	Electrical and Electronics	7.93 CGPA	KLE Technological University, Hubballi	2021

Key Strengths	• Quick learner • Good communication • Good in analytical skills • Focused and Hard worker • Knowledgeable and Friendly
Personal Details	Date of Birth : 03-03-1999 Gender : Male Languages Known : English, Kannada, Hindi

Declaration

I hereby declare that the information furnished above is correct to the best of my knowledge.
