Key Skills	Experience
Service Delivery Expert	Total 6+ Years in service delivery 4.3 Years
Change and incident	4 Years
Azure Active Directory	4 Years

Summary

- 6+ Years of experience in IT Infrastructure, , Azure, AVD, Citrix, Virtualization, System Administration.
- Experience in administering and supporting Azure Virtual Desktop, Citrix Cloud, Virtual Apps and Desktops 7.X/19.12 LTSR, Azure Virtual Desktop, FSLogix, PVS and NetScaler ADC environments.
- Excellent experience in managing and configuration of Citrix MCS and NON-MCS servers in the Azure environment.
- **Worked with Project teams for major changes that need to be implemented in the environment.**
- Creation of multiple Delivery groups and Machine Catalogs for corresponding departments within organizations.
- Worked with vendors on problem resolution to include Microsoft, citrix and application vendors.
- Performed Citrix NetScaler ADC's upgradation and migrations.
- **SCCM based AVDs management, for security & applications patches and deployments, upgrades, and updates.**
- Experienced with administration of Windows 2008/2012/2016/2019 servers, patching and monitoring.
- Worked with vendors on problem resolution to include Microsoft, citrix and application vendors.
- Experience in administering and supporting VMware ESXi Servers (6.x/7.0) and Citrix XenServer (7.X) environments.
- Expertise on ESXi and ESX Architecture, guest OS installation, setting up of VM priorities, Cloning and Snapshots
- **Ability to manage Incident, Change & Problem Management.**
- Provide on-call support to resolve emergency issues outside normal business hours.
- Work with internal technical teams to identify and documents future system enhancements.

Technical Expertise/Trainings/Certificates:

- AZ-104: Microsoft Azure Administrator
- AZ-140: Configuring and Operating Microsoft Azure Virtual Desktop
- 1Y0-204: Citrix Certified Associate - Virtualization (CCA-V)

Experience:

- Worked as Technical Support Engineer in TCS (Payroll Company: TeamLease Digital) from 3rd August 2022 to 30th April 2024.
- Worked as System Engineer in HGS (Hinduja Global Solutions Limited), Bangalore from 17th December 2014 to December 2021

Project #1: HGS

Roles and Responsibilities:

- Administration and monitoring the health of around 300 citrix servers via Citrix AppCenter console and PowerShell script daily.
- Monitoring the health of around 1000+ vdi machines via citrix studio and director.

- DDCs and PVS Serves were implemented in three different geographical regions.
- Maintaining multiple citrix farms including XenApp 6.5/7.15 LTSR, XenDesktop7.15 LTSR, and PVS 7.15 LTSR.
- Manage server access rights, policies, and permissions following current standards.
- User Support on various issues through Service now Tickets
- Coordinate with End-User Services team to maintain XenDesktop image updates.
- Upgrade Master image on PVS as per the respective team request and make sure the image is load balanced on all the PVS servers.
- Performing changes on the server as per Change Management process
- Creating Change Requests as per business requirement
- Management of VMware infrastructure for assigned applications.
- Guiding the team on all technical aspects and providing training to meet the expectations.
- Deploy and manage Virtual Desktops, Published Applications and Thin Clients in global office and manufacturing locations.
- Solving daily users' issues like Drive mapping issue, Printer mapping issue, Application launching issue, Server Hung, Session hung, with the ITIL process.
- Escalate and handle escalated issues by taking ownership.
- Remote Support engineer & providing technical support for internal users.
- Identify and troubleshoot a variety of technical issues, including PC configuration, password resets, printers, scanners VPN and LAN access.
- Manage user rights in Active Directory.
- Provide end-user support via telephone, email, remote-assistance, and desk-side.
- Monitoring Windows Servers and working with different teams for Alerts.
- Working on VMware and Nutanix VM Build and Decommission requests.
- Coordinating with the multiple vendors for replacement of the Hardware materials in case of Failure or up gradation.
- Troubleshooting desktop issues & user related issues.
- Support as necessary on a 24-7 basis to limit system downtime during internal or external outages and peak enrolment periods.
- Handling Service Now ticketing tool. Assigning the tickets to concerned person and solving the tickets as per SLA.

Solving daily users' issues like Drive mapping issue, Printer mapping issue, Application launching issue, Server Hung, Session hung, with the ITIL process

Location: Bangalore

Project#2

Rexel Canada

Description:

- Administration and monitoring the health of around 2000+ citrix VDI machines via Citrix Director console and PowerShell script daily.
- Monitoring the health of around 150+ XenApp servers via SCOM and director.
- Creating multiple Delivery groups and Machine Catalogs for corresponding departments within organizations.
- Installed and published the applications in delivery groups on citrix controllers for the required AD groups.
- DDCs and PVS Serves were implemented in three different geographical regions.
- Coordinate with End-User Services team to maintain XenDesktop image updates.
- Upgrade Master image on PVS as per the respective team request and make sure the image is load balanced on all the PVS servers.
- Provided support for performance issue, slow login issues connectivity issue on Citrix cloud.
- Troubleshooting application related issues in AVD
- Creating Host pools and adding session hosts into it
- SCCM based AVDs management, for security & applications patches and deployments, upgrades, and updates.

- Operations & maintenance of Virtual Machines in Azure IAAS
- Troubleshooting connectivity and OS related issues in AVD
- Working on NSG/ASG creations and modifications.
- Monitor the failures cloud machines and trouble shoot for the root cause.
- Have knowledge and working hands on Azure cloud portal on cloud virtual machines.
- Perform troubleshooting activities and profile renaming in Azure portal as part of troubleshooting.
- Monitor the resource performance and status in both Citrix cloud portal and Azure portal.
- Remote user machine to troubleshoot applications \ software issues.
- Monitor and send health Check reports on hourly basis.

Project#3

Client: Coca-cola

Description and responsibilities:

- Migrated On-premises citrix 6.5, 7.15 LTSR, 7.1912 LTSR environment to citrix DaaS in citrix cloud.
- Onboarded and managed Citrix NetScaler ADCs with Citrix cloud ADM service.
- Involved in Azure Cost optimization and Azure VDI Automation developments.
- Administering Azure AVD with Nerdio Manager and Azure portal, providing applications, desktops and adding new VM to host pool.
- Providing 'Level 3' operational support to infrastructure services in the event of major incidents or complex technical issues
- Migrated the 300 plus Windows Virtual servers from VMware to Nutanix/ Azure
- Worked with Project teams for major changes that need to be implemented in the environment.
- Worked with vendors on problem resolution to include Microsoft, citrix and application vendors.
- Working on NSG/ASG creations and modifications.
- Administering FSLogix User profile management Azure AVD environment
- Managing and deploying updates via Azure Update Manager
- Support and executed two projects from requirements gathering to implement and provide support after go-live
- Migrated web-base, in house customize application from on-premises datacenter to Azure.
- Planning, design, and document for datacenter migration from Hyper-V, VMware to Azure using Azure site recovery and Double-Take migration tool.
- Responsible to work on Azure Backup server to backup Azure virtual machines, files and folders and protect Azure VM into the Azure cloud using recovery vault.

Education:

- B. Com (Computers), with 75% from Rani Channamma University, Belagavi, Karnataka
