Linux Administration	4 Years
Devops tools	3.5 Years

Objective

Experienced Cloud/linux and System Engineer with 4+ years of expertise in cloud infrastructure & automation. Seeking a challenging role as a **Cloud Infra Engineer** to leverage my deep knowledge of **AWS, VMware, and Hybrid Cloud solutions**, along with my proficiency in **infrastructure-as-code, CI/CD pipelines, and disaster recovery strategies**. Passionate about designing, implementing, and optimizing hybrid cloud environments to drive business innovation and operational efficiency.

Professional Experience:

ConnectWise LLP

April 2024-April2025

System Engineer L2

- Managed 15 AWS accounts, including the setup and configuration of **EC2 instances, RDS databases, VPCs, ELBs, CloudFront distributions, Route 53 hosted zones, and health checks**.
- Automated infrastructure deployments by developing **8 Bash scripts**, reducing deployment time by **80%**.
- Improved system reliability by automating manual processes using **65 Ansible modules**, resulting in an **80% reduction in average response time** for critical alerts.
- Enhanced security posture by implementing **multi-factor authentication (MFA)** on **21 administrator accounts**, mitigating the risk of unauthorized access.
- Provided technical support to **10 clients**, designing and implementing solutions leveraging various **AWS services** to address their specific needs.
- Assisted in the migration of **on-premises resources to AWS**, ensuring minimal downtime and a smooth transition for critical applications and data.
- Created **infrastructure-as-code (IaC)** to deploy the **Veeam for AWS solution** for our partners.
- Developed and implemented a **disaster recovery plan** using the **Veeam Data Platform**, including backup solutions, recoverability testing, and security audits.

Professional Experience:

ConnectWise LLP

April 2022 – June 2023

System Engineer L1

- **Assisted in the management of AWS accounts**, performing routine tasks such as monitoring EC2 instances, RDS databases, and VPCs.
- **Supported the deployment of cloud infrastructure** by executing pre-written scripts and following established procedures.
- **Contributed to the automation** of manual processes by assisting with the implementation of Ansible playbooks, leading to a 80% improvement in response time for specific tasks.
- **Participated in security initiatives** by implementing of multi-factor authentication (MFA) for administrator accounts.
- **Provided basic technical support** to our international clients, troubleshooting common issues and escalating complex problems to senior engineers.

Professional Experience:

Wipro Technologies

February 2021 – April 2022

Desktop Support Engineer

- Installation, Maintenance, Administration and troubleshooting of RedHat, CentOS, Linux, Windows systems on virtual and physical environment.
- Provide 24x7 on call duties on a rotation basis with the other system engineers as part of incident management.
- Filesystem management, system upgrade, software patches using yum and rpm tools.
- Utilized Active Directory to add/remove users, unlock accounts and reset passwords.
- Provide deskside support in person, on the phone and remote using MS Teams/Skype.

Key Skills:

- **Cloud Platforms:** Azure (Virtual Machines, Storage, Networking, SQL PaaS), AWS (EC2, RDS, VPC, ELB, CloudFront, Route 53).
- **Automation Tools:** Proficient in **Ansible, Terraform, PowerShell, and Bash scripting.**
- **DevOps Practices:** Hands-on experience with **CI/CD pipelines, Jenkins, and Git** for version control.
- **Backup & Disaster Recovery:** Skilled in **Veeam Backup & Replication** and implementing disaster recovery solutions.
- **Networking:** Strong knowledge of **Layer 2/3 networking, NAT Gateway, VPN, and VPC management.**
- **Identity & Access Management (IAM):** Expertise in **Microsoft Entra ID Connect, Azure AD DS,** and designing secure IAM policies.
- **Monitoring & Optimization:** Proficient in monitoring cloud performance, cost, and security using native and third-party tools.
- **Linux Administration:** Advanced skills in **Linux system administration, shell scripting, and PowerShell.**

Other skills:

- Ability to learn new technologies quickly to meet project demands.
- Excellent verbal and written communication skills, with a strong ability to explain technical solutions to

customers and work effectively with cross-functional teams.

Projects:

- Deployment of Veeam Agent in linux distributed systems and windows machines please refer below git repository: https://github.com/Raghul716/Ansible_Lab/tree/main/Project/DeployVeeamBackupAgent
- Deployment of Multi-Service Docker Compose Setup please refer below git: <https://github.com/Raghul716/docker/tree/main/dockerprojects/DockerComposeProject>

Professional Courses & certifications:

AWS Certified solution architect associate SAA – C03 Validation no:376a6c0c809d4c8d80d53cbe3b6a9615.

Ultimate AWS Certified Solutions Architect Associate SAA-C03 by stephane Maarek –Udemy

Dive Into Ansible - Beginner to Expert in Ansible – DevOps by James Spurin -Udemy

DevOps MasterClass 2023: Terraform Kubernetes Ansible & More by Imran teli -Udemy

Education:

Bachelor of Engineering
(Mechanical)

Solapur University, Solapur

March 2018

Vidya Vikas Prathisthan Institute of
Engineering and Technology
