Developer | Assistant Consultant | 7.9Years | Bengaluru, India

CAREER OBJECTIVE

To secure a responsible career to fully utilize my technical and management skills while making a significant contribution to the success of the company as well as to enhance my knowledge about new emerging trends in the IT sector.

PROFILE SUMMARY

- Having 7+ Years of experience in the development of web-based applications using Core Java and java script and having 6+ years of experience in the development of Rest API using Spring boot micro-services.
- Experience in configuring and deploying Web Applications using Tomcat and docker.
- Good Experience in DB2 and basic knowledge on SQL and Mongo DB.
- Basic knowledge on DevOps branch management.
- Possesses good analytical, logical ability and systematic approach in problem solving.
- Excellence in managing the onsite-offshore model projects and supporting production systems.
- Skills to identify and resolve root cause of software failures with knowledge of E2E Functional & Technical Flow.
- Gained significant exposure by working on development and maintenance software projects with experience in exception handling, debugging, and tracing the application run-time issues.
- Insightful experience in project management activities including project scoping, estimation, planning, risk management, finalization of technical / functional specifications, resource administration and quality management of the product / software application.
- An effective communicator with excellent analytical / logical skills and ability to relate to people at any level of the business and management.

TECHNICAL SKILLS

Programming Languages	:	Java / J2EE,
Database Connectivity	:	JDBC, Hibernate
Database Skills	:	SQL, DB2, Mongo DB
Technologies	:	Spring Boot, Spring Microservices, Struts, Hibernate , SOAP Xml, Json, JPA , NodeJS (learning ReactJS)
Web Technologies	:	HTML5, CSS3, Java script
Tools	:	Eclipse, Jenkins, SonarQube, Git, Postman Apache Tomcat
Cloud Technologies	:	DevOps
Server	:	Tomcat, Docker

CERTIFICATIONS

- Domain: Wings2 Product Specialist Telecom - BSS (Business Support Systems) Curriculum Pre-requisite
- Process: Agile Way of Working Foundation
- Metamorph: Certificate in INS domain
- Digital: Google Analytics Foundation
- Digital: Maven Foundation
- Foundation: Java API Management & Microservices Intermediate
- Digital: Continuous Integration and Continuous Delivery Intermediate
- Digital: Cloud Computing (General)_Foundation

ORGANISATIONAL EXPERIENCE

Since 26TH SEPTEMBER 2016 with TATA CONSULTANCY SERVICES, Bengaluru (7+ Years)

Client: [PNB MetLife Insurance](#)

PNB MetLife is a life insurance company which provides Life insurance to customers with various plans and our project includes on developing end to end UI screens and services for customers and agents as well.

Project 1: Developing Webservices using java (2016 Oct – 2018 Dec)

Role: Developer

Description: The project includes on developing various webservices and few UI screens which enables Underwriters to review and change the user policy details using java, JavaScript, html, and servlets with DB2 interaction on storing and validating the data.

Responsibilities:

- Involved in High level and low-level design for overall project.
- Involved in Database design and optimization.
- Developed various Webservices using Java.
- Development of web applications using Java, HTML, CSS, and Java Script and provided support to UI team.
- Involved in Production bug fixes.
- Involved in DB design to store and manage customer data using DB2.
- Mentoring Junior associate and peer code review.

Tools: Eclipse, Putty, WINSCP

Solution Environment: Java, DB2, JavaScript, HTML,CSS.

Highlights: key development includes on integrating Aadhar and Pan services for validating customer data and integrating with other insurance company which provides health insurance plan as well under same life insurance policy provided from MetLife Insurance company.

Project 2: Developing Various Micro services using Spring boot framework with Mongo DB (2018 Dec – 2022 Aug)

Role: Developer and Team Lead

Description: The project includes on developing various Microservice which helps on storing and validation of customer data which includes personal, bank details, health details and required documents etc. using Spring boot - microservice with storing and validating data in mongo db. in the form of JSON.

Responsibilities:

- Involved in High level and low-level design for overall project.
- Involved in Database design and optimization.
- Developed microservice using Springboot and Java
- Development of application using Spring boot and provided support to UI team.
- Development of Data API, Spark Jobs for message processing.
- Involved in development of API to consume message from various queues like IBM MQ, JMS and process it via Apache Kafka and Spark
- Involved in client meeting for requirement gathering.
- Involved in Production bug fixes.
- Involved in DB design to store and manage customer data using MongoDB and Oracle.
- Mentoring Junior associate and peer code review.

Tools: Eclipse, Maven, GitLab, DevOps, Docker

Solution Environment: Spring boot, REST, JAVA 1.8, MongoDB, Angular

Highlights : Key developments includes on validating and handling customer documents where we can store the document in a server and generate a unique key before sending/receiving the docs with other systems/servers to avoid security breach as well memory issues and Microservice developed includes Data validation, Mongo DB interaction on storing , validating and Handling the customer and agent details, and also various other Rest/Soap service consumption and also few Oracle/SQL stored procedure.

Client: [Manulife/ John Hancock insurance](#)

John Hancock Life Insurance Company, U.S.A. is a Boston-based insurance company. Canadian multinational life insurance company [Manulife Financial](#) acquired John Hancock and operates it as an independent subsidiary. The company and the majority of Manulife's U.S. assets continue to operate under the John Hancock name.

John Hancock Life Insurance Company (U.S.A.) provides insurance products and financial services. The Company offers life insurance, mutual funds, college savings, long term care, retirement plan services, and institutional investment products.

Project 3: Developing and handling Micro services and mule soft applications. (2022-Aug – Till Date)

Role: Developer

Description: The project includes on developing various micro services for handling and passing customer data across the system which includes Data base interactions, third party service interactions.

Responsibilities:

- Involved in High level and low-level design for overall project.
- Involved in Database design and optimization.
- Developed microservice using Springboot and Java
- Development of application using Spring boot, .Net, MuleSoft Tool and Node JS.
- Development of Springboot microservices to run with Schedulers for timely data transfer across different systems.
- Involved in development of API to consume message from various queues like IBM MQ, JMS and process it via Apache Kafka and Spark.
- Involved in client meeting for requirement gathering.
- Involved in Production bug fixes.
- Involved in DB design to store and manage customer data using MongoDB and Oracle.
- Mentoring Junior associate and peer code review.

Tools: STS, Maven, GitLab, Devops, Jenkins, Jira.

Solution Environment: Spring boot, REST, JAVA 1.8, NodeJS, MuleSoft, .NetCore

Highlights: Key developments include developing and managing various microservices where we will be fetching data from other systems and sending the same to intermittent system using schedulers, few of which are wsdl services. Worked on few MuleSoft applications, .Net core and node js applications on minor data fixes and API registry.

ROLES AND RESPONSIBILITIES

- Coordinated with on-site project specific client delivery leads to have smooth and time bound deliveries.
- Involved in requirement gathering, analysis for feasibility of the requirements.
- Lead a team with team size of 12+ for more than 3 years.
- Design, implementation, and deployment of code.
- End-to-end application technical bug fixing.
- Worked in CI/CD Pipeline – Prediction results are exposed using Flask API & deployment of application in production server using docker & Jenkins.
- Worked on Developing Web Applications using Core Java, HTML, Java Script.
- Worked on Developing Rest APIs using Spring Boot, Microservice.

ACHIEVEMENTS

- Awarded “Star of the Month” in Sep-2018 for on-time and on-budget delivery of the project.
- Awarded “On Spot Award” in Aug-2018, Nov 2022, Mar 2023 for on-time and on-budget delivery of the project.
- Awarded “Best Employee” Award from NGM India Insurance head in February-2019 for dedicated work and on time delivery for projects for “TCS – PNB MetLife Relationship”.
- Awarded “Star of the Quarter” in July-2021 for on-time and on-budget delivery of the CR for the project.
- Awarded “Best Employee” Award from NGM India Insurance head in August-2021 for dedicated work and on time delivery for projects for “TCS – PNB MetLife Relationship”.
- Awarded “Star Team Award” in July 2021 for on time deliveries and evaluating profiles for Project need.

EDUCATION

- **Graduated (B.E in Computer Science & Engineering) from PES College of Engineering, Mandya, Karnataka.**

PERSONAL DETAILS

Name	:	Rahul AN
Gender	:	Male
Date of Birth	:	25th February 1994
Nationality	:	Indian
Languages Known	:	Kannada, Hindi, and English,
Strengths	:	Quick learner, Flexibility and Adaptability
Address	:	Anivalu, Haraduru (Post), Periyapatna (Tq) Mysuru (Dst) Karnataka-571102
