Bangalore, Karnataka 560050

Career summary

DevOps Engineer at TCS with over 3.6 years of experience in designing and automating large-scale deployments. Specializes in leveraging tools such as **Jenkins**, **Ansible**, **Docker**, **Kubernetes**, and Terraform to optimize **CI/CD pipelines** and enhance configuration management. Demonstrates strong proficiency in **AWS** for infrastructure provisioning using **Terraform** and **CloudFormation**, alongside expertise in **Python** and **Bash scripting**. Committed to driving operational efficiency while reducing costs through effective resource management in **Linux environments**.

Skills

- | | |
|---|--|
| <ul style="list-style-type: none">• AWS: EC2, S3, EKS, EFS, EBS, VPC, IAM, SNS, ALB• CI/CD Tool: Jenkins• Containerization: Docker, Kubernetes• IaaS: Terraform• Configuration: Ansible• Build Tool: Maven• Version Control: Git, GitHub | <ul style="list-style-type: none">• OS: Linux, Windows, Ubuntu• Scripting: Shell Scripting, Groovy• Servers: Apache Tomcat 8, JBoss 7• Monitoring: Cloud Watch, Cloud Trail, Prometheus, Grafana• Database: RDS (MySQL 8)• Language: YAML, Python |
|---|--|

Experience

TATA Consultancy services - Bangalore, India
DevOps Engineer

27/01/2022 to present

- Utilized the **AWS Cloud** platform for **DevOps** workflows, managing services like **EC2**, **EKS**, **ECR**, **Lambda**, **S3**, **RDS**, **CloudWatch**, **IAM**, **EBS**, **VPC**, **Auto Scaling**, and **Load Balancing** to optimize performance and reduce costs.
- Implemented **backups** and **read replicas** for **MySQL databases** in **AWS RDS**.
- Managed EC2 machines, including **creating AMIs**, and **EBS snapshots**.
- Built and maintained CI/CD pipelines using groovy in **Jenkins**, increasing deployment efficiency.
- Managed **S3 buckets** and **object lifecycles**.
- Set up **CloudTrail** for monitoring user activity for compliance.
- Set up **SNS topics** for email notifications.
- Created **VPCs** and configured **peering connections** as needed.
- Installed and configured Jenkins master and slave nodes.
- Integrated **Git** with Jenkins and scheduled jobs to manage **CI/CD pipelines**, with email notifications for build success or failure.
- Created branches and tags in Git, and managed user access.
- Developed and implemented **Ansible playbooks** using **YAML** for efficient server configuration and management.
- Built and packaged code using **Maven** into **WAR** files for deployment on web or app servers.
- Deployed applications in **Docker containers** using **Docker Compose** and **Docker-file**.
- Conducted oversight of infrastructure through **CloudWatch tools**.
- Supported three development teams as a **DevOps Engineer**, managing multiple simultaneous software releases.
- Created **IAM groups**, **roles**, and **policies** in AWS.
- Worked with container management and orchestration tools, like **Kubernetes**.
- Utilized infrastructure as code (**IaC**) tools, specially **Terraform**, to efficiently provision and manage AWS infra.

Education

Marathwada Institute of Technology (MIT), Ch. Sambhaji nagar, Maharashtra
Bachelor of Technology

2018 - 2021
CGPA: 7.62

Accomplishment

TCS Best team award
