

Key skills	Experience
Java	4 Years
Spring	4 Years
javascript	4 Years
react JS	1 Year

Professional Summary

Detail-oriented software professional with 4.9 years of combined experience at SANEMI TECHNOLOGIES PVT. LTD, as a Java FullStack software developer . Skilled in Fullstack development using Java, Spring, Spring Boot, Spring MVC, Hibernate, and MySQL , Microservices and frontend Technology Html,Css,Javascript,React.js. alongside a strong foundation in software quality assurance. Adept at identifying and resolving bugs to enhance software quality and implementing robust backend solutions to improve performance and scalability. Proven ability to work collaboratively within agile teams to deliver high-quality software solutions. Committed to continuous learning and applying best practices to achieve optimal results

Technical Skills

- Working experience on **Core Java**.
- Working experience of Core Java **OOPs Concept**.
- Good Knowledge on implementation of Core Java **Design Patterns** like **Façade Design, Factory, Prototype, Adapter ,Strategy**.
- Working experience on **MicroServices Architecture**.
- Working experience on **Spring Boot**.
- Working experience on **Spring web MVC Module**.
- Working experience on **Spring Core Container Module**.
- Working experience on **Spring IOC**.
- Working experience on **ORM** technology like **Hibernate Framework**.
- Good knowledge in Frontend based technologies like **Html, CSS, JavaScript, React**.
- Experience in version control tool like Microsoft **GIT**.
- Good knowledge in build tools like **Maven**.
- Experience on servers like **Tomcat 7.0 and Jboss 6.0**.
- Working experience on IDE's like **Eclipse**.

Professional Experience:

SANEMI TECHNOLOGIES PVT. LTD

Bangalore,India

Feb 2020– Present

- Developed and maintained Frontend & backend services using Java, Spring, Spring Boot, Spring MVC, Hibernate, Html, Css, Javascript and React.js.
- Designed and optimized MySQL databases for improved performance and scalability.
- Collaborated with cross-functional teams to define, design, and ship new features.
- Implemented RESTful APIs to support web and mobile applications.

Projects Details:

Credit Score Analysis Tool, Swedbank (Sweden)

feb-2024 to till date

Description: Automated credit score evaluation platform integrating data from multiple sources to provide real-time scoring and predictive analytics. Utilized microservices architecture for scalability and efficiency.

Responsibilities:

- Worked on the implementation of real-time credit scoring using Kafka, enhancing decision-making speed.
- Collaborated with the team to develop REST APIs and implement business features for seamless functionality
- Integrated OAuth for secure user authentication, ensuring robust system security
- Utilized Redis cache for efficient data caching, optimizing application performance and reducing database load.
- Contributed to the design and development of the microservices architecture, enabling easy deployment and maintenance.

Skills - Core java, jpa ,Spring boot microservice ,Html,css,Javascript,React.js

Claims Processing System, Statewide Insurance Group USA

Oct -2022 to Jan-2023

Description: It is a centralized platform designed to efficiently manage and process insurance claims, incorporating real-time updates and automation to streamline the claims handling process.

Responsibilities:

- Worked as a backend developer with springboot and java as a core technology.
 - Developed real-time claim status updates to enhance transparency and client satisfaction.
 - Working on the REST APIs and developing business features.
 - Implemented JWT for secure user authentication, improving system security.
 - Integrated Memcached for efficient data caching, significantly boosting application performance and reducing database load.
 - Contributed to the development of a monolithic architecture, streamlining deployment and maintenance processes.
 - **Skills** : Core java Spring Boot Mysql
-

Project : Payment Manager

April-2021to Sept2022

Domain : Internal Banking

Technologies : Java, SpringMVC, Spring Integration, SpringIOC, Hibernate, Oracle,IBM WAS.

Client : Bank of America

The Payment Manager is developed to perform transactions such as hitting the credit cards for the amount billed, check accounts with cheque and credit card payment. This automatically hits the credit cards of accounts for respective amount for previously scheduled to complete the payment process. The payment manager is built with the mechanism to interrupt or restore accounts in case of need. This also gives access to monthly income reports for the billing team to keep a check on the financial gain.

Skills : Core java hibernate spring Boot mysql

Responsibilities:**1. Requirement Analysis:**

- Study the functional requirements, business logic, and system architecture of the Payment Manager.
- Collaborate with the development and business teams to understand the payment processing workflows (credit card debits, cheque payments, etc.).

2. Test Case Creation:

- Write detailed test cases based on the functional and technical specifications of the Payment Manager.
- Ensure that test cases cover both positive and negative scenarios (e.g., successful payment processing, failed transactions, error handling).

Description :

Custom club admin captures the golf kits and custom kits inventory, customer details, request placed, track request, ordering custom kits depends on customer order. These requests are placed by admin people on behalf of customers. It contains lie angle putters, heads, grips, shafts for both Left hand and right hand composition and services. Application has Spanish translation for both Golfsmith and golf town

Educational Qualification

- **Highest Degree: BE Aug-2018 with 57% from RTMNU University,**
Nagpur, Maharastra.- 2018
