Location: Bangalore, India

Professional Summary

Experienced Data Engineer with 3+ years of expertise in building scalable data pipelines, automating ETL processes, and integrating cloud data platforms. Proficient in Python, PySpark SQL, Apache Airflow, and Snowflake, with a strong foundation in data modelling, transformation, and migration. Skilled at developing efficient, production-ready solutions that ensure data quality, reliability, and performance across complex systems. Committed to delivering high-impact data solutions that enhance decision-making and accelerate business growth.

Technical Skills

- **Programming:** Python (OOPs, Scripting), Pandas, NumPy, PySpark(Basics), SQL
- **Data Engineering:** Snowflake, PostgreSQL, MongoDB, Databricks (Basics), GBQ
- **ETL Tools & Orchestration:** Apache Airflow (DAGs), Rundeck.
- **Version Control & CI/CD:** Git, Bitbucket, Docker (basic), Jenkins (basic)
- **Cloud Platforms:** AWS(S3), GCP(Basics)
- **Testing & Debugging:** Unit Testing (Pytest), Logging, Exception Handling
- **Development Tools:** JIRA, PyCharm, VS Code, Jupyter Notebook, Postman

Professional Experience:

Project Engineer | Wipro Technologies – Bangalore

January 2022 – April 2025

Project: Cisco Data Migration - [April 2023 – April 2025] – Project 2

Domain: Data Engineering | Python Development

Tools & Technologies: Python, Pandas, NumPy, Oracle DB, MongoDB, Snowflake, PostgreSQL, Airflow, Rundeck, Bitbucket, Git, Cisco Conjur (Secret Management), JIRA, Jupyter Notebook, VS-Code, Excel.

Deliverables:

- Developed complex Python-based ETL pipelines for seamless data migration from on-premise OracleDB and MongoDB databases to Snowflake, aligning with modern cloud data architecture standards.
- Built reusable and modular code for handling schema mapping, data transformation, and validation to ensure consistency and eliminate data discrepancies during migration.
- Designed detailed logging, exception handling, and data quality reports, enabling real-time monitoring and fast troubleshooting of pipeline failures.
- Integrated Conjur secret management to dynamically retrieve credentials and replace static configuration files, improving security and supporting compliance.
- Automated pipeline executions and failure recovery using Apache Airflow DAGs, improving job reliability, traceability, and reducing manual intervention.
- Managed Git-based version control using Bitbucket and enforced code review workflows to maintain quality standards.

- Configured Rundeck for batch execution and deployment automation, ensuring smooth rollout of new features and fixes across different environments.
- Actively participated in sprint planning, retrospective meetings, and coordinated with cross-functional teams including DevOps, QA, and Business Analysts to prioritize technical tasks.
- Monitored job success rates and deployment logs on AWS S3, and collaborated with the DevOps team to implement health checks and alerting mechanisms.
- Delivered onboarding sessions for new team members and documented standard operating procedures to support knowledge retention and process standardization.

Project: Python & Selenium-Based Cisco IoT Web-UI Automation - [Jan 2022 – March 2023] – Project 1
Domain: Networking | Python Automation

Tools & Technologies: Python, PyATS, Selenium, Networking, L2/L3 Protocols, Manual and Automation Testing, TIMS, CDET, MSOffice, Linux, Switches, TIMS for test management, and CDET for defect tracking.

Deliverables:

- Led testing of Web-UI (Device Manager) for L2/L3 Cisco & Rockwell Industrial Switches (e.g., IE2K, IE4K, IE5K, RA5400, S5400, S5700), ensuring seamless functionality and configuration management.
- Collaborated closely with developers to perform sanity, regression, and integration testing on Web-UI, ensuring consistency across configurations via CLI.
- Worked on UI testing for Cisco Web-UI, ensuring a seamless user experience for device management.
- Performed manual testing of switches, verifying protocol configurations (PRP, PTP, SNMP, DLR, DHCP, MRP, TCP/IP, DNS,) through Web-UI and CLI.
- Automated 80% of manual test cases using Python and Selenium, resulting in a significant reduction of 100+ hours per release cycle.
- Developed robust Python scripts to optimize switch configurations, achieving a 30% reduction in system errors and improving overall test efficiency.
- Conducted comprehensive regression testing on new build ISO images for go-live validation, ensuring all features met quality standards.
- Proactively reproduced and documented customer-reported issues, logging defects, and verifying fixes post-release to ensure customer satisfaction.
- Collaborated with cross-functional teams, including project managers and engineers, to meet project timelines, improve product quality, and ensure customer requirements were addressed.
- Delivered knowledge transfer (KT) sessions to new team members, accelerating onboarding and ensuring they were equipped to meet project goals.

Education

- **Bachelor of Technology (B. Tech) - Computer Science & Engineering**
 Guru Jambheshwar University of Science and Technology, Hisar, Haryana 2021
CGPA: 6.5/10
- **Intermediate – Science Stream** | Sharda Sr. Sec. School, Fatehabad, Haryana 2017
Board: HBSE | **Percentage:** 63%
- **Matriculation** | Sharda Sr. Sec. School, Fatehabad, Haryana 2015
Board: HBSE **Percentage:** 76.8%

Internship:

- **Institute** : GATE EASY #5 Devi Bhawan Colony, Near F.C. College, Hisar-125001
Title : Machine Learning using Python
Duration : 6 weeks

Academic Projects:

- **Library Management System:** Built a web-based application using Django, Python, HTML, CSS, and JavaScript to manage library operations, including book issuance, return, and inventory tracking.
- **Hotel Management System:** Developed a console-based system using C for room booking, billing, and customer data management.
- **School Website:** Designed and implemented a responsive school website using HTML and CSS, focusing on user navigation and content organization.

Industry trainings & Certifications:

- | | |
|---|------------------------|
| • PRP (Project Readiness Program) - Python Programming | Wipro Internal |
| • 100 Days of Code: The Complete Python Programming - By Dr. Angela Yu | Udemy |
| • Learn Python Programming Beginner to Master – By Abdul Bari | Udemy |
| • The Complete Hands-On Introduction to Apache Airflow - By Marc Lamberti | Udemy |
| • The Complete SQL Bootcamp Go from Zero to Hero – By Jose Portilla | Udemy |
| • Git & GitHub Crash Course | Udemy |
| • The Complete Guide to HTML - Colt Steele | Udemy |
| • Networking Basics Crash Course - By Rick Crisci | Udemy |
| • Linux Administration | Udemy |
| • Jenkins: Beginner to Pro | Udemy |
| • Understanding APIs and RESTful Crash Course – Kalob Tauilen | Udemy |
| • 6 Week Training - Machine Learning Using Python | Gate Easy |
| • C for Beginners | Great Learning Academy |
| • The Fundamentals of Generative AI | Google Cloud Platform |

Deceleration:

I hereby declare that the above statements are true and complete to the best of my knowledge and belief.
