About Me

Highly motivated and skilled Java Developer with 2.2 years of experience in designing and developing robust software applications using **Java**, **Hibernate**, **Microservices**, **Spring Boot**, and **Spring MVC RESTful API**. Strong expertise in delivering clean and efficient code while adhering to best coding practices.

Professional Experience

Gainsight Software Pvt Ltd,
Bengaluru

Key responsibilities:

- Designed, developed, and maintained **Java**-based **microservices** using **Spring Boot** framework.
- - Implemented **Hibernate** for efficient data persistence and retrieval from the database.
- - Collaborated with cross-functional teams to actively participate in the creation of user stories and design/code discussions.
- Fixed system and data issues promptly to ensure seamless application performance.
- - Utilized object-oriented design principles to build scalable and maintainable software solutions.
- - Improved existing solutions by identifying areas for optimization and implementing enhancements.

Accomplishments

JetBlue Airlines, Client Name:- JetBlue

(Gainsight Software Pvt Ltd)

- Developing a microservices-based flight reservation system using **Java 8**, **Spring Boot**, and using **Microservices architecture**.
- Implemented scalable microservices for managing flight information, bookings, reservations, and passenger details.
- Managed **sprint planning**, stand-ups, and reviews with **ER diagrams** for **API**.
- Configured customizable database(**MySQL**) connections and settings for maintenance.
- Handled flight operations, bookings, pricing, and real-time updates.
- Built **Rest Controller**, **Service**, and **ServiceImpl** for **robust APIs**.
- Implemented **pagination** and efficient database communication using **Hibernate**.

Education Background

- Greater Noida Institute Of Technology(ECE)
- Completed in 2020

Hard Skill

- Programming Languages: Java, J2EE
- Frameworks/Libraries: Hibernate, Spring Boot, Spring MVC API
- Microservices Architecture
- Database Management: MySQL
- RESTful API, JSON
- ORM (Java Persistence API)
- Version Control: Git
- Test Automation: JUnit, Maven
