IT PROFESSIONAL

~Technocrat with **7 years of experience in Software Testing**, targeting challenging assignments in **Software Testing** with the organization of high repute~

CORE SKILLS

Software Testing
Requirement Gathering
Test Design & Development
Cross-functional
Coordination
Work Under Pressure
Team Player

PROFILE SUMMARY

- **Quality Assurance Engineer** with 7 years of extensive experience in the IT industry, demonstrating expertise in comprehensive testing methodologies, automation frameworks, and quality assurance strategies across diverse projects in both **product and service-based environments**, recently with the Printers and Financial Technology sectors.
- Proficient in API Automation using **Rest Assured**, and Web Automation using **Selenium**, leveraging **Java** as the primary programming language. This facilitates end-to-end testing and validation of multiple REST APIs, ensuring robust functionality and reliability of software systems.
- Expertise in **Cloud-based Testing** including AWS IoT Shadows Testing, demonstrating proficiency in replicating and synchronizing cloud and device data, validating IoT shadows, and ensuring seamless data collection and synchronization processes.
- Proven **Leadership Skills** showcased through effective team coordination, task delegation, and resolution of roadblocks, while serving as an internal lead, ensuring efficient project execution and delivery.
- Extensive Exposure to **Financial Technology Testing** encompassing manual and automation testing within the Charles Schwab project, collaborating on microservices, automation frameworks, database validations, and compliance with scrum guidelines for optimal testing outcomes.

WORK EXPERIENCE

Aug'21-Mar'24 **Mphasis Limited as a Senior Software Engineer**

Skills: Java, Rest Assured, Selenium, Jenkins, Postman, AWS, and Cucumber BDD - TestNG framework

Project: **Charles Schwab - Advisor Services Technology**

- Collaborated within the Mavericks team, overseeing Submitter and Response Processor microservices, while enhancing automation by introducing new functionalities like Equity and Options trades, and optimizing code structure.
- Utilized Bitbucket for code management and Bamboo for streamlined CI/CD processes, ensuring efficient development and deployment workflows.
- To diagnose any issues that arose throughout the test, logging technologies such as Splunk and PCF were employed.
- Employed Zypher to upload developed test cases to designated Jira tickets, automating sanity, regression, and functional tests in the QA environment using the Maven build tool.
- Managed manual testing, leveraging Schwab desktop apps like Mercury UI and mainframe software such as Bluezone, while utilizing RabbitMQ and Kafka as a messaging system in a publish-subscribe model. Additionally, I ensured meticulous validation of database entries in Toad for Oracle DB and Toad for DB2, maintaining test integrity.

Project: **HP - Web Print Platform (Printers)**

- Spearheaded comprehensive testing initiatives for HP Smart Printers on the cloud, ensuring synchronized interactions between cloud and devices, along with replication of device data into AWS IoT Objects, including Fax blocked numbers and system configurations. Used AWS SQS as a messaging system.
- Automated multiple REST APIs(Shadows), employing REST-Assured framework for end-to-end testing within an IoT platform, simultaneously implementing Selenium automation for cloud printing flows.
- Led an internal team, delegating tasks effectively, overseeing Jenkins-based test job builds, managing failures while maintaining meticulous bug reporting in Jira, and overseeing test case management via the Testrail tool.

PRIOR EXPERIENCE

Jan'19-Jul'21	Airtel Digital Limited as Software QA Engineer	2 years & 6 months
---------------	--	--------------------

Skills: Java,AWS(EC2,S3), Performance Testing, and Cucumber-Rest Assured-TestNG framework

Project: **Wynk Music Application - Airtel Thanks – Airtel Xstream**(Video Streaming App)

- Orchestrated end-to-end testing for Android and iOS platforms, leveraging Xcode, Android Studio, and Gerbil for comprehensive performance analysis encompassing memory, CPU, battery, and network usage.
- Spearheaded API automation with Rest Assured, managed production bug debugging, and job execution via Jenkins, ensuring seamless backend/WCF release testing, and overseeing regression test execution.
- Additionally, provided mentorship and support to the team, effectively delegating tasks and resolving roadblocks.

Dec'16-Dec'18	Lava International Limited as Senior Executive Quality
---------------	--

2 years

Skills: Manual, Functional, and Performance Testing, Jmeter, Agile, AWS services

Project: **Lava Devices - Hive Launcher - Lava Minus One Page**

- Conducted extensive test case execution on multiple Lava devices, performed performance testing using JMeter, and utilized various tools for device analysis.
- Contributed to EMI Solution project, ensuring secure client-server interactions and server-side checks.
- E2E testing for Hive Launcher module analytics using SQLWorkbench, PGAdmin3, and AWS technologies.

CERTIFICATIONS

- Database Concepts - Alison | 2017

EDUCATION

- B.E. – CSE | Bhopal Institute of Technology and Science | 2012 - 2016
