EXPERIENCE

DXC Technology

Analyst II Software Engineering

Aug2022- Feb2025

Bengaluru, India

VFS Visa Immigration

- Built a serverless file scanning solution using **AWS Lambda**, S3, and Clam AV, automating real-time threat detection and improving security efficiency by 40%.
- Optimized event-driven virus scanning with metadata tagging, enhancing efficiency by 70% and ensuring a 99% accuracy rate in threat classification.
- Deployed the solution on AWS and **Yandex Cloud**, ensuring cross-platform compatibility and reducing cloud-specific dependencies.
- Integrated **Boto3** for seamless S3 interactions, automating metadata tagging, file scanning, and SNS-based real-time threat alerts.
- Performed post-deployment validation by monitoring **tag status** updates and analyzing log files, ensuring reliable scan execution.
- Utilized **Pillow** for enhanced file processing, enabling efficient handling of various file types during scanning operations.

DBaaS Support Services

- Designed and developed Python-based automation scripts, optimizing system performance and efficiency.
- Integrated **Swagger** for API documentation, enabling seamless debugging and interaction. Leveraged **Postman** to analyze responses, troubleshoot API issues, and enhance backend performance.
- Orchestrated deployment workflows and configuration management using Ansible, enhancing automation and system reliability.
- Restructured API architecture using **Flask Blueprints**, improving maintainability and scalability.
- Utilized **PostgreSQL** to store and manage provisioning work orders, ensuring data integrity and query performance.
- Implemented APIs to handle dynamic JSON payloads, ensuring seamless PostgreSQL data storage and retrieval, optimizing provisioning workflows.

PROJECTS

ML-Based Password Strength Analysis | [\[IEEE LINK\]](#)

July 2022

- Created an ML-based password strength analysis system to evaluate security levels.
- Implemented Decision Tree and Logistic Regression models to assess password length, character diversity, and vulnerability patterns.
- Designed a real-time feedback mechanism to enhance security, prevent weak passwords, and ensure compliance with security standards.
- Integrated the system seamlessly into web and mobile applications for enhanced user experience and protection.

Wildlife Organization Management System | [\[Link\]](#)

August 2021

- Developed a web-based system to manage employees, projects, and finances in a wildlife organization.
- Enhanced conservation efforts by improving protected area management and operational efficiency.
- Implemented user authentication, role-based access control, and secure database management.
- Streamlined resource tracking to support biodiversity protection and organizational growth.

EDUCATION

New Horizon College of Engineering

Bachelor of Engineering in Information Science and Engineering, CGPA: 7.9/10

JULY 2018 – AUG 2022

CERTIFICATIONS

- AWS Certified Cloud Practitioner – [Link](#) (Issued: 2023)
- Microsoft Certified: Azure Fundamentals (AZ-900) – [Link](#) (Issued: 2023)

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C, SQL

Frontend, Backend & API Development: Fast API, Flask, HTML, CSS, React, Angular, RESTful APIs, Swagger, Postman

Cloud & Virtualization: AWS (Lambda, EC2, S3, CloudWatch, SNS), Docker, Kubernetes, Azure

Databases & Data Handling: PostgreSQL, MySQL, JSON, Pandas, NumPy

Security, Automation, CI/CD & Test Automation: Boto3, Ansible, Jenkins, PyTest, Shell Scripting

Version Control: Git, GitHub Actions, Bitbucket

Tools & Technologies: VS Code, Jupyter Notebook, Jira, Matplotlib, Seaborn
