Professional Experience :

Having a **7+ years** of experience as a devops engineer, using different cloud technologies like AWS, Microsoft Azure.

- Expertise in AWS Cloud Administration which includes services like: EC2, S3, EBS, VPC, ELB, AMI, SNS, RDS, IAM, Route 53, Auto scaling, Cloud Watch, Cloud Trail, Cloud Formation, OPS Work, Security Groups etc.,
- Having good exposure in Jenkins for CI/CD Automation.
- Using Jenkins Manage and Build code with Authorization.
- Deploy Jenkins to completely provision and manage AWS EC2 instances, Volumes, DNS, and S3.
- Proficient with container systems like Docker and container orchestration like EC2 Container Service, Kubernetes, worked with Terraform.
- Managed Docker orchestration and Docker containerization using Kubernetes.
- Used Kubernetes to orchestrate the deployment, scaling and management of Docker Containers.
- Maintaining and Monitoring the Application/Servers using Nagios.
- Configured and managing ELBs. Configured and managing S3 storage.
- Created RDS database. Workspace Setup and troubleshooting.
- Hands on experience on VPC, Subnets, and Route tables etc.
- Configuring Cloud Watch for Monitoring Instance, RDS, ELB's etc. Conducting Cost Optimization Audit for Clients AWS account.
- Create and configure S3 bucket with restricted policies.
- Designing and Deploying Highly scalable infrastructure using ELB and Auto Scaling services.
- Migrating and Managing DNS entries in Route 53 and various DNS providers.
- Hands on experience on VPC, Subnets, and Route tables etc.

Key Skills:

- **Cloud Technologies:** AWS, Azure, Google Cloud (GCP).
- **Operating Systems:** Linux (Red Hat 4/5/6,7), centos and Ubuntu , Windows.
- **Scripting languages:** Shell Scripting , PowerShell
- **Configuration Management:** Chef &, Ansible
- **CI/CD Tools:** Jenkins.
- **Version Control:** GIT and TFS.
- **Container Tools:** Docker, Kubernetes.

Education Details

- B-Tech (EIE) Jawaharlal Nehru Technological University (JNTU-A).

Work Experience

COMPANY: **SONATA SOFTWARE (OCT-2018 TO OCT-2020)**

Role : AWS/Devops engineer.

Roles & Responsibilities:

- Experienced in implementing Devops Automation by using **Azure Devops** for .net application.
- Created **Build** and **Release pipeline** by using **Azure Devops**.
- Assisted customers with common connectivity issues by reviewing subnet, security group, ACL, routing, **VPN, ELB, AutoScaling, RDS and Deployment** configurations
- Exclusively worked on windows & Linux AMI for hardening.
- Enterprise and Premium support for **EC2** infrastructure
- Worked closely with EC2 infrastructure teams to troubleshoot complex issues.
- Managed and supported AWS Security related issues, such IAM and S3 policies for user access
- Support for all other AWS products such as S3, RDS, Elastic Load Balancing, Route53 (DNS)
- Configured **Cloud watch** alerts for AWS resources.
- Created support case with AWS for any critical issues and follow-up.
- Deployed and monitor salable infrastructure on Amazon web services (AWS) & configuration management
- Launching and configuring of Amazon EC2(AWS) Cloud Servers using AMI's (Linux/Ubuntu) and configuring the servers for specified applications using Jenkins
- Installation and configuration of Git, merging code from develop branch to master branch and make it ready for deployment.
- Expert in **GIT** and **Jenkins** Continuous Integration of Server–Installation, Configuration, Design and Administration, and integrating these tools with other systems.
- Used scripting languages like **Shell Scripting**,

- Experience in **Devops** Engineering in automating, building and deploying of code.
- Installation and upgrade of **Ops-code** Chef Server and documenting steps.
- Installation and upgrade of **Chef Client** and Make sure servers are getting converge with chef-server.
- Creating of Organization, Environment, and users in **Chef Server**.
- Developed chef Cookbooks to manage systems configuration.
- Worked on the cloud automation framework namely CHEF the included automation of certain software installation processes in the form of **Ruby** code.
- Supported development sprints by automating instance provisioning using Cloud Formation and code deployments using **chef, Jenkins, Git hub**.
- Installed administered and configured **Jenkins** Continuous Integration tool.

COMPANY: **POWER SCHOOL INDIA PVT LTD (MAY 2015 TO AUG 2018)**

Role : Devops Engineer.

Roles & Responsibilities:

- Created CI/CD by using various devops tools like Jenkins and Octopus.
- Implemented octopus deployment process by using power shell scripts.
- Trouble shooting the application in iis level.
- Deploying the application in docker containers.
- Managing the end to end .net application in windows servers.
- Creating and managing Amazon ec2 instances by using terraform.
- Managing branching strategy in TFS as per the business requirement.
- Created Amazon ec2 instances , by using cloud formation templates, And managing different Amazon services like VPC, Lambda, security Groups, cloud watch, cloud trail , Api Gateway , Elastic load balancer Etc..

COMPANY: **WIFI NETWORK (NOV 2012 TO MARCH 2015)**

Role : Linux Administrator.

Roles & Responsibilities:

- Responsible in resolving the issues in Hardware and OS level.
- Scheduling of automatic repetitive Jobs with Crontab.
- User administration, creating, modifying and deletion. Resetting UNIX account password.
- Installing applications on Linux flavors.
- Applying Quota limit on the file system, giving permission to user though ACL.
- Attending call's as per the priority like P1 and P2 tickets and troubleshooting the issues.

- Resolving the home directory issue, resolving grub errors and file system problems.
- RPM package management, installing, upgrading and removing.
- Disk Management, partitioning tools like fdisk , etc. file system management ext3 file system & utilities (mke2fs, e2fsck, tune2fs) LVM physical volumes and logical volumes & volume groups extending file systems on LVM mount, unmount of file systems - /etc/fstab mount options disk quota.
- Diagnosing the system hardware issue and resolving.
