Summery

Skilled DevOps Engineer with 14+ years of hands-on experience supporting, automating, and optimizing mission-critical deployments in AWS cloud services for leveraging configuration management, CI/CD, and DevOps processes.

- Working experience in Linux and windows servers hosted on cloud platforms AWS.
 - Implementing CI/CD processes for various clients.
 - Experienced in monitoring various servers hosted with different hosting providers.
 - Worked on cloud infrastructure provisioning using terraform, terragrunt and CloudFormation.
 - Automated build and deployment using Jenkins to reduce human error and speed up production processes
 - Ability to work within a team with strong-analytic, problem-solving and communication skills
-

Technical Skills

- Operating System: Linux (AWS, RHEL, Ubuntu).
- Cloud Computing Technology: Amazon Web Services (AWS).
- Container Technology & Management: Kubernetes, Docker.
- infrastructure as code tool: terraform, Terragrunt, CloudFormation
- Automation Server: Jenkins. AWS Code-Build, Code-Deploy, Code-Pipeline
- Configuration Management Tool: Ansible.
- Scripting Language: Bash-Shell Scripting.
- Web Technologies: Web services, HTML, Apache, Tomcat, Nginx.
- Version Control: GitHub, Git La
- Secret management tool: Vault
- Alert & monitoring tolls: Grafana, Prometheus,Loki ,Cloud watch and ELK stack.

Experience

Total Experience | 14 Years

Mouritech Technology LLC | Jan-2021-present | Technical Architect

- Automated application builds and deployment, driving efficiency of code development process.
- Applied best practices at all times and encouraged others to do same, which helped to maintain effective security.
- Creating and Managing Jenkins pipeline for Maven Project.
- Managing Nexus Repository for storing Maven artifact and docker images.
- Developing scripts for build, deployment, maintenance and related tasks using Jenkins, Maven, and Bash.
- Working on Release Engineering Activity, Handling all Environments deployment and code merge after production deployment.
- Working on Release Engineering Activity, Handling all Environments deployment and code merge after production deployment.
- Creating and managing infra using terraform on AWS, Google Cloud.

Myriad Cara Technologies (Freelancer) | March 2019-Dec 2020 | DevOps Engineer

Client: NSDL

- Automated application builds and deployment, driving efficiency of code development process.
- Applied best practices at all times and encouraged others to do same, which helped to maintain effective security.
- Working on From 60 project (Dockerise Application like Logstash, Elasticsearch, Kibana and Java Backend Application, NodeJS UI).
- Worked on Jenkins file with multiple stages like checkout a branch, building the application, testing, pushing the image into Custom Docker Registry.
- Worked on Terraform for Deployment of application to Docker Swarm cluster and Kubernetes Cluster.
- Creating and Managing Jenkins pipeline for Maven Project.
- Managing Nexus Repository for storing Maven artifact and docker images.
- Use the Kubernetes dashboard to monitor and manage the services.
- Built and maintained ELK and Loki stack to centrally collect logs that are used to monitor applications.
- Worked on vault secret management tool to store the secrets.

Hexaware Technologies | July 2018 -Feb-2019 | Sr DevOps Engineer

Client: Crisil Mumbai

- Automated application builds and deployment, driving efficiency of code development process.
- Create a continuous development environment that both enables **speedy development and deployment** and protects the future of the organisation.
- **Continuously evaluate, refactor, and iterate existing systems** while complying with industry standards, and **make recommendations for improvement with best practices** to increase the quality & velocity of deployments.
- Interaction with **client stakeholders over technical, functional requirements** and coming up with **plan and best tools** to implement the same. Develop and operate a **scalable distributed platform infrastructure** to be able to operate in AWS or other public clouds.
- Engage with and **drive a high-visibility, high-accountability DevOps process** including continuous integration and continuous deployment with zero-downtime upgrades across the fleet.
- Document and share technical best practices.
- Help shape the **DevOps Practice vision and road map**.

Magna Infotech | June 2017 -June-2018 | DevOps Engineer

Client: Atos Mumbai

- Design and implement **secure automation solutions** for development, testing, and production environments.
- Create a continuous development environment that both enables **speedy development and deployment** and protects the future of the organisation.
- Working on IOT project (Dockerise Application like InfluxDB, Telegraf, Chronograf and Kapacitor, NodeJS API).
- Working on Dell Edge Gateway 5000 Series.
- Document and share technical best practices.
- Help shape the **DevOps Practice vision and road map**.

Cuelogic Technologies | Sept 2016 -May-2017 | DevOps Engineer

- Automated application builds and deployment, driving efficiency of code development process for multiple projects
- Using Docker, Jenkins, Nexus Repository.
- Developing Docker images and pipelines to support Development; Jenkins, all feeding in to central Elasticsearch, Logstash and Kibana stacks for Logging and influxdb and Grafana for Monitoring and Alerting
- Working closely with architecture, development, test, security and IT Services teams
- Providing Monitoring, Logging and Alerting services using Elasticsearch and the ELK stack, Influxdb and Grafana
- Developing scripts for build, deployment, maintenance and related tasks using Jenkins, Docker and bash.
- Configure and manage Data at rest encryption using Luks open source.
- Configure and manage vault for secret (password) management.

BigTree (Bookmyshow) | Sept 2015 -August-2016 | DevOps Engineer

- Patching and installing updates on windows and Linux
- Manage Cyberoam and Fortinet Firewall.
- Manage Citrix NetScaler and HAproxy Load Balancer
- Develop script for Automation.
- Manage VM and maintain Machines
- R&D for new Infra and security

Serviz4u Networks | June 2008 -August-2015 | Sr. Support Engineer

- Working on Ansible Configuration Management tool
- Install and Configured VMware and Citrix Xenserver
- Create Cluster for High Availability (HA) and Distributed Resource Scheduling (DRS)
- Converting P2V and V2V using VMware Standalone Converter, Xenconvert
- Migration of virtual Machines using Vmotion.
- Moving VM's from one LUN to another LUN using storage Vmotion

Certification

- **AWS solution Architect**

Education

- BCA Yashwantrao Chavan Maharashtra Open University 2023 (B Grade)
 - HSC(12th) Jr. College Bhedshi Kokan Board (2006) (64%).
 - SSC (10th) New English School Bhedshi Kolhapur Board (2003) (58%)
-

Declaration

I do hereby declare that the above particulars of information and facts stated are true, correct, and complete to the best of my knowledge and belief.
