

DARSHAN D

Targeting opportunities as a Site Reliability Engineer, concentrating on the improvement of cloud infrastructure and the elevation of system performance in the technology sector to drive organizational growth.

Ph: +91 9740060926 | Email: darshancloud33@gmail.com

PROFILE SUMMARY

- **Extensive Cloud Expertise:** Results-oriented professional with nearly 3 years of experience; focusing on Site Reliability Engineering and DevOps methodologies, showcasing a dedicated approach to improving system reliability and overall performance.
- **Incident Response & Performance Optimization:** Spearheaded incident response strategies, reducing average response time to critical alerts by 40%, while ensuring compliance with SLA and SLO metrics in ServiceNow.
- **AWS Architecture & Infrastructure Management:** Architected and maintained a high-availability AWS environment with EC2 and S3, supporting 1M+ daily data requests, ensuring seamless service access and zero downtime.
- **Security & Compliance:** Designed and executed a secure AWS environment using Security Groups, ensuring compliance with industry standards, which resulted in a 25% reduction in security incidents.
- **Monitoring & Observability:** Enhanced system scalability by configuring Splunk to monitor system metrics and logs, enabling real-time performance analysis across 50+ applications, and improving overall system performance by 40%.
- **Containerization & Resource Optimization:** Orchestrated Kubernetes clusters (EKS) for optimized resource utilization, improving application performance by 15% and contributing to efficient resource management.
- **DevOps & Deployment Automation:** Automated deployment processes and system changes using Python and Terraform, reducing manual intervention by 50% and enhancing operational efficiency across development and operations teams.

CORE COMPETENCIES

Incident Management | Service Level Objectives (SLO) & Service Level Agreements (SLA) | High Availability Architecture | Disaster Recovery & Automation Frameworks | Root Cause Analysis & Capacity Planning | Monitoring and Observability | Performance Tuning | Continuous Integration Practices | Resource Allocation Strategies | Cross-Functional Team Collaboration

WORK EXPERIENCE

Mar'22 – Present | Site Reliability Engineer | Genpact, Bangalore

Key Result Areas:

- Driving the creation of a cutting-edge automation framework using HashiCorp Packer for Satori Apex AMIs, integrating seamlessly with Jenkins, which has resulted in a significant increase in AMI creation efficiency, with over 20 AMIs generated weekly.
- Designing and deploying a robust AWS environment, employing Security Groups to enforce stringent security protocols, achieving full compliance with industry standards, and reducing security incidents by 25%.
- Effectively mitigating production issues through prompt identification and resolution, introducing workarounds and permanent fixes, resulting in a 30% reduction in average incident resolution time.
- Continuously monitoring system health and performance via Splunk and AWS CloudWatch, ensuring a 99.9% uptime rate and delivering an optimal and stable user experience.
- Collaborating seamlessly with development teams to expedite the resolution of production issues, resulting in a remarkable 40% reduction in incident response time, enhancing team efficiency and performance.
- Designing and executing a secure AWS environment using Security Groups to enforce robust security protocols, ensuring stringent compliance with industry standards, and reducing security incidents by 25%.
- Building and maintaining real-time alerting systems to monitor latency, error rates, and SLA breaches, enabling early detection of performance issues, leading to proactive issue resolution before impacting services.
- Championing proactive scalability initiatives by enhancing system monitoring and performance frameworks, ensuring the seamless identification and mitigation of potential risks across production environments.

CERTIFICATIONS

- AWS Certified SysOps Administrator - Associate(SOA-CO2) | [certification_link](#)
- AWS Developer Certified Solutions Architect – Associate from Udemy |
- Introduction to Microsoft Azure Cloud Services | [certification_link](#)

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL
- **Developer Tools:** VS Code, Slack, Pager Duty
- **Technologies/Frameworks:** Linux, Jenkins, GitHub, Terraform
- **Cloud Provider:** AWS
- **Monitoring Tool:** Splunk, Prometheus
- **Containers and Orchestration:** Docker, Kubernetes

PROJECTS MANAGED

Shutterfly | [project_link](#)

Technologies Used: Python, Splunk, Git, AWS Cloud Console

- Configured customized alerts in Splunk to proactively notify teams of critical 4xx and 5xx error thresholds and latency issues, enabling swift response times and minimizing service outages or performance degradation.
- Developed and implemented robust Service Level Objectives (SLOs) and Service Level Agreements (SLAs) for mission-critical applications, ensuring optimal alignment with business objectives and stringent performance expectations.
- Streamlined the image creation and deployment process via Jenkins pipelines, reducing release times by 30% and minimizing deployment errors by 20%, significantly enhancing operational efficiency and system reliability.

Lifetouch

- Spearheaded the integration of Kubernetes into CI/CD workflows, accelerating release cycles by 30% and optimizing deployment processes for seamless scalability and high availability.
- Expertly administered a suite of AWS services, including EC2, S3, RDS, and Lambda, ensuring a robust infrastructure with guaranteed uptime, fault tolerance, and operational resilience.
- Managed and automated end-to-end CI/CD pipelines using Jenkins and GitHub Actions, enhancing deployment agility, minimizing rollback complexities, and ensuring consistent service uptime.
- Pioneered the adoption of Terraform 1.2 within CI/CD pipelines, automating infrastructure provisioning and seamlessly managing version transitions, significantly reducing manual overhead and improving operational efficiency.

Spoonflower

- Engineered over 10 sophisticated Splunk dashboards, driving actionable insights that empowered data-driven decision-making across the organization.
- Architected and integrated high-performance API endpoints capable of processing over 1 million queries daily, ensuring optimal scalability and responsiveness.
- Streamlined the development and deployment lifecycle by facilitating cross-functional collaboration and seamless code testing across diverse environments (dev, QA, staging, production).
- Pioneered real-time troubleshooting and incident resolution processes, addressing critical issues related to AMI builds, Jenkins pipeline failures, and AWS configurations, thereby maintaining a 99.9% uptime.

EDUCATION

- 2022: Master of Computer Applications
RV College of Engineering, Bangalore

PERSONAL DETAILS

- **Address:** Bangalore, India
- **Date of Birth:** 11th June 1998
- **Languages Known:** English, Telugu & Kannada
