Summary

- A results-driven **Talent Acquisition Specialist with over 4+ years of progressive experience in full-cycle recruitment**, specializing in sourcing and hiring top-tier talent across diverse domains such as **Semiconductor, Embedded Systems, VLSI, Engineering Services, IT, Automotive, Banking & Financial Services, and more.**
- **Extensive 2+ years of hands-on experience** in recruiting for **Embedded Systems and VLSI roles**, including positions like **VLSI Engineers, Embedded Software Developers, and Hardware Design Engineers**, leveraging deep domain knowledge to identify and engage top technical talent.
- Proven ability to source and **hire technical and non-technical roles globally**, including leadership positions like Architects, Directors, and VPs.
- Serve as the **primary point of contact** with hiring managers during the sourcing and interviewing process, ensuring alignment with technical and business requirements.
- **Trained 5 Jr recruiters** in utilizing internet resources, referrals, and internal databases (e.g., Recruiter) to identify, interview, screen, and hire potential technical consultants.
- Exposure to various verticals like **IT Consulting, Financial Services, Banking, Healthcare, Manufacturing, Engineering Services, and Industrial sectors.**
- Expertise in **leadership hiring** for high-level positions such as **Architect, Director, and VP**, ensuring precise alignment with organizational goals.
- Skilled in **reducing hiring costs** and improving retention rates through advanced recruitment technologies and ATS platforms like **Workday, Bullhorn, and Job Diva.**
- Strong track record of meeting or exceeding corporate staffing goals, with a focus on **diversity hiring** and strategic initiatives to promote inclusive recruitment practices.

Key expertise includes:

- **Americas Region Recruitment:** Extensive exposure to global clients like Apple, Boeing, Honeywell, and DXC, successfully sourcing and hiring for roles in the **US and Canada**. Skilled in understanding regional market trends and developing customized strategies to attract high-caliber candidates.
- **Semiconductor Industry Recruitment:** Hands-on experience hiring for semiconductor roles such as **VLSI Engineers, Embedded Systems Developers**, and related technical positions, leveraging domain knowledge to identify and engage top talent.
- **Embedded Systems & VLSI Recruitment:** Over 2 years of specialized experience in hiring for **Embedded Systems, VLSI, and related semiconductor roles**, with a deep understanding of technical requirements and market trends in these domains.
- **Diversity Hiring & Strategic Initiatives:** Actively contributed to **diversity recruitment strategies** by utilizing unconventional sourcing channels, participating in hiring events, and promoting inclusive hiring practices. Partnered with clients to improve diversity hiring ratios through strategic sourcing efforts.
- **Technical Savviness:** In-depth knowledge of cutting-edge technologies such as **5G, IoT, Artificial Intelligence, and Cloud Computing**, combined with technical certifications in **Python with Django** and engineering expertise (B.E. in Electronics and Communication). This enables a comprehensive understanding of technical requirements and precise candidate evaluation.
- **Innovative Sourcing Techniques:** Proficient in Boolean searches, LinkedIn recruiting, and advanced ATS platforms like **Workday, SAP Fieldglass, Bullhorn, and Job Diva**, ensuring efficient and effective talent acquisition processes.
- **Stakeholder Collaboration:** Adept at partnering with hiring managers, recruiters, and business leaders to define recruitment strategies, provide market intelligence, and align talent acquisition efforts with organizational goals.

- **Reporting and Analytics:** Skilled in preparing recruitment metrics and reports using **Excel and PowerPoint**, providing actionable insights to stakeholders for optimizing hiring strategies.
