SUMMARY

OBJECTIVE Willing to work as a key player in challenging and creative environment, which will help me to explore myself & to provide my participation in the organization growth.

PROFESSIONAL SUMMARY

- Having 5.1+ years of working experience on Atlassian Products like **JIRA, JSM, Confluence, Agile, Bit bucket, ITSM, ITIL, SDLC**, in **Windows & Atlassian Cloud**.
- I have very good exposure in Jira, Confluence, **Installation, up gradation, migration** merging in **Windows** and **Atlassian Cloud**
- Assisted Scrum & Teams in preparing the Sprint backlog, planning the issues.
- Very good exposure in Agile project implementation, Sprints and Epics.
- Designed, created, and managed detailed test cases using Zephyr for Jira to ensure comprehensive test coverage for various software development projects.
- Good experience in creating various projects like Basic, Scrum and Kanban.
- Good exposure in implementing **Issue types, Workflows, Screens, Custom field's implementations, permissions, notifications** etc.
- I have implemented Mail configuration in Jira in **Incoming & Outgoing** emails.
- I have implemented the **Application Links, DVCS links, Webhooks**.
- Installed and tested various add-ons.
- I have very good knowledge in Database clustering and taking the Jira, Confluence DB backups.
- Preparing documentation plan, estimating work, and assigning work to the team.
- Good exposure in Dashboards and Filter implementation.
- Good experience in creating Reports.
- Worked on JQL (JIRA Query Language) filters, Dashboards, Gadgets for users.
- I have good knowledge in implementing Version Controllers like GIT.
- I have good experience in implementing Confluence Spaces, Pages, Child pages and performed Import and Export operations.
- I have Very Good knowledge in **Script runner, JSU, Structure, Configuration manager for JIRA, Dynamic Forms, Insight, JETI, JMWE, Extension for JIRA service desk** and **X-Ray**.
- I have Experience Working on **Atlassian Server, DC and Cloud**.
- I have **installed JIRA, Confluence, JIRA Service Desk** in **Windows & Cloud**.

- Worked on Issue Types, Workflows, Screens, Custom Fields, Permissions, Resolutions, Priority, Issue Security Levels, and Notification Schemes for JIRA Projects.
- Setup new project and shared configurations template in scratch onwards.
- Conducted regular patch management and system updates across multiple Linux distributions (e.g., Red Hat, Ubuntu, CentOS) to ensure security compliance and system stability.
- Setup User management like user creation, Groups and Access.
- Created events, email Notification Schemes, and Assigned Project Roles in JIRA.
- Created custom dashboards, advance filters and formula-based fields.
- Created the Permission Schemes to restrict the users in Project level.
- Troubleshoot network connectivity issues using tools like ping, traceroute, netstat, tcpdump, and nmap.
- Setup Agent & Portal view in JIRA Service Desk projects.
- Familiar in building responsive and interactive user interfaces using REACT.
- Exp in JIRA Installation, Upgradation, Migration & Plug-in's as well

Jira Upgradation	Server & DC
Jira Migration	Server, DC to Cloud

EXPERIENCE

- Currently Working as a **JIRA Developer** in **LINOVA INFO PVT LTD (Nov 2019 to till date)**

EDUCATION

- B. SC Computer Science in **SV University** at **2020**.

TECHNICAL SKILLS

Software's & Tools : JIRA, JSM, JWM, Confluence, Bitbucket and Agile.

Operating System : Windows & Cloud.

PROJECT
DETAILS

Project -2

Client : Myntra.

Role : JIRA Developer

Atlassian Tools : JIRA, Confluence, JSM, JWM, Agile Methodology.

Responsibilities:

- Regularly performed re-indexing of JIRA to optimize performance and maintain data integrity.
- Configured workflows using the JSU (JIRA Suite Utilities) plugin to automate processes and enhance workflow management.
- Developed Groovy scripts to meet specific JIRA requirements, improving automation and efficiency in task execution.
- Installed and maintained various plugins (e.g., Groovy Scripting, Extension for JIRA) to extend functionality and meet business needs.
- related new JIRA projects based on user requests, configuring project workflows, issue types, and custom fields to align with project requirements.
- Cloned JIRA projects and issues as needed to replicate configurations and streamline project setup.
- Managed creation of new JIRA users and groups, assigning appropriate permissions and roles to ensure secure and efficient access management.
- Implemented advanced JIRA workflows with features such as Post Functions, Conditions, and Validations to enforce business rules and improve workflow efficiency.
- Configured Field Configurations, Notification Schemes, Screen Schemes and Permission Schemes across multiple JIRA projects.
