- Performed **data cleansing to rectify any incorrect data** (duplicate data, obsolete records, etc.
- Using Microsoft Excel to data validation, conditional formatting and graph and chart manipulation the property data.
- Conduct **quality assurance activities regarding data cleansing processing using ETL**

**Educational Qualifications:**

- **BTech (Electronics and Communication Engineering)** from AIET Alwar (Raj.) – Year 2014.

**Professional Experience:**

- Working as Software Engineer at Payworld Utility Service Pvt Ltd, From Feb 2023 to till date,
- Worked as Software Engineer at Rapipay Fintech Pvt Ltd, From Feb 2020 to Jan 2023,
- Worked as Associate Software at One 97 Communication LTD From Nov-2016 to 31st Jan 2020

### **Technical Skills:**

- **RDBMS Tools** : SQL Server 2014/2016/2017/2019
- **Reporting Tools:** Power BI, Excel and SSRS
- **Office Applications:** MS Word, MS Excel, MS Access.
- **ETL Tools** : SSIS
- **Data Warehousing Tools** : SSAS

### **Project #1**

**Project Name** : Star Health

**Client Name** : Star Health

**Role** : Software Engineer

**Environment** : SQL Server and Power BI

### **Project Description:**

The objective of the application is to extract data, securely transmit it to a data Warehouse, standardize the content, and generate reports. The project includes around 10-12 data sources whose data is merged together and put into a single database using various business logics to develop a complex cube with various perspectives and measure groups. It also involves complete understanding of their business and sales cycle model.

### **Responsibilities:**

- Performed performance tuning and optimization of SQL queries to improve query performance and to reduce runtime.
- Integrated Custom Visuals based on business requirements using **Power BI desktop**
- Well Versed In Excel Formulas, Vlookup, Hlookup, Conditional Formatting, If Formulas Nesting, Pivot Table Functions, Macros, Data Validation, Data Consolidation Chart, Sort & Filter Data Etc.
- Scheduled reports for daily, weekly, monthly reports for executives, Business analyst and customer representatives for various categories based on business needs
- To manage and develop reports and services to support business needs involving building queries, views, objects and testing reports. Development of new and enhancing existing reports using SQL and reporting services.
- Manage the analysis of data / reporting issues, engaging with other teams, understanding and resolving issues at the root cause. Record and regularly report on data / reporting issues.
- To Maintained Data as Per Requirement of Management Authority By Use of Various Aspects Like Preparation of DashBoard Graphs, Progress & Program Bar Charts Financial Reports And Excel

PivotTables.

- Participate In Cross-Functional Meetings To Resolve Recurring Customer MIS Issues and Provide Strong Reporting And Analytical Information Support To Management Team.

## **Project #2**

**Project** : Billing  
**Client** : Way Star  
**Role** : Software Engineer  
**Environment** : Power BI , SSRS and SQL Server

### **Project Description:**

This application is developed to schedule an appointment for a patient to a doctor (Provider). The availability of time, day and Leave are analyzed in this application. This Application helps a medical office to maintain patient records and their appointment with a single provider or a group (Medical office). This module integrated with resources (X-ray, ECG etc) and employee (Technicians), Ambulate scheduling and preventive maintenance.

### **Roles & Responsibilities:**

- Performed performance tuning and optimization of SQL queries to improve query performance and to reduce runtime.
- Integrated Custom Visuals based on business requirements using **Power BI desktop**
- Pivot Table Functions, Macros, Data Validation, Data Consolidation Chart, Sort & Filter Data.Etc.
- Scheduled reports for daily, weekly, monthly reports for executives, Business analyst and customer representatives for various categories based on business needs
- To manage and develop reports and services to support business needs involving building queries, views, objects and testing reports. Development of new and enhancing existing reports using SQL and reporting services.
- Manage the analysis of data / reporting issues, engaging with other teams, understanding and resolving issues at the root cause. Record and regularly report on data / reporting issues.
- To Maintained Data as Per Requirement of Management Authority By Use of Various Aspects Like Preparation of DashBoard Graphs, Progress & Program Bar Charts Financial Reports And Excel PivotTables.
- Participate In Cross-Functional Meetings To Resolve Recurring Customer MIS Issues and Provide Strong Reporting And Analytical Information Support To Management Team.
