LinkedIn: www.linkedin.com/in/abhishek-747222171

Profile Summary:

- ❖ 5 years of experience as Software product developer in **Powertrain Electronics** in Robert Bosch Engineering and business Solutions.
- ❖ Experience in writing **Embedded C** programs for automotive embedded system.
- ❖ Knowledge about **Diagnostic Event manager (DEM)**
- ❖ Knowledge about **OBD services, UDS services**
- ❖ Experience in **Requirement analysis** and discussion with customer.
- ❖ Experience in **Autosar ECU configurations** such as I/O pin configurations, External Asics such as CJ970, CY329, L9959, DGDI chip etc configurations
- ❖ Experience in **Autosar OS configurations**: Configuration of Tasks, ISR etc.
- ❖ Experience in **MCAL configurations**
- ❖ Experience in **Software integration**: Integration of **Autosar packages**
- ❖ Experience in **HILS testing**: Testing such as I/O test, System test, Basic Function test
- ❖ Experience in **ECU resource management** both static and runtime resource
- ❖ Experience in **INCA prof** preparation for ECU flashing.
- ❖ Experience in **debugging** issues using **UDE**
- ❖ Experience in **ECU preparations** for development activities.

Experience:

Senior Software Engineer

Bosch Global Software Technology (PKA Robert Bosch Engineering and business solution)
AUG 2018 – Present

Onsite Experience - Japan Deputation: Key points

- Solving issues reported by customer
- First point of contact for customer
- Customer visit to discuss about the issues and counter measure to mitigate them in the future

Roles and responsibilities handled.

1. Software system designer-SWSD (6 CYL GDI) :

- Requirement analysis.
- Requirement clarification and OPL discussion with the customer.
- Delegation of requirement implementation to the function team and test case preparation.
- Debugging of SW issues.

2.Function developer for Nissan SWSH projects (6 CYL GDI) :

- Implementation of requirement from the customer and testing.

3. Software Product developer for Nissan SWSH projects (4Cyl PFI and 6 CYL GDI) :

- Software integration.
- Software build and testing of final Software in HILS using INCA and UDE debugger.
- Delivery of the Software and artifacts to the customer.

4. Lead integrator:

- Coordination of different function team to get the final packages for integration
- Integration planning
- Integration review
- Verification of final artifacts before delivery

5. HDS responsible:

- ECU configurations such as I/O configuration, ASIC configurations
- Autosar OS configuration- configuration of Os Tasks and ISRs
- ECU resource management

6. ECU handling:

- Development ECU preparation for both internal use and customer use
- Prof preparation for flashing through XCP and (X)ETK
- Boot container preparation for Series ECU preparation

Key Technical Skills:

- ❖ Programming Languages: Embedded C, Python
- ❖ Software tools : Ecu.worx, INCA, UDE, Canlyzer, Canoe, Eclipse, RTAOS editor, DDT
- ❖ Hardware: MG1 Ecu, Mx17 Ecu, Debugger, CANcase XL, ES410/ES415, VCI

Education:

- ❖ B.E. in Electronics and Communication, First Class with Distinction (76%)
Dayananda Sagar College of Engineering- Bengaluru
- ❖ PUC (10+2) in PCMB Stream, Distinction (91%)
Government PU college Chikmagalur, Karanataka
- ❖ SSLC High School, Distinction (92%)
Hoysala High School Belur, Karanataka

Honors & Awards:

- ❖ **One Time Achievement Award** (Department Yearly Award) for 4 years in a row(2019-22)
- ❖ **SPOT award** (Team level Quarterly award): Won several times.
- ❖ **Pat on the shoulder award** (POTS): Won several times.
- ❖ **BES-PE presentation award**
- ❖ Received appreciation from Japanese counterparts (Department Head and Ecu project manager) for **successful execution of Nissan V6 project** in stringent timeline.
- ❖ **Voted top performer** of the quarter several times.
