ABINASH BASTIA

Profile

Having 3.11 years of extensive experience in the area of software Automation & Automation script development. Having good hands on experience in Software Automation using Selenium Web Drivers & Testing REST APIs using python, Request library & SQL for web-based portals. Experienced in defect logging, tracking, & reporting using JIRA.

Work Experience

TECH MAHINDRA- Since Aug 2021

Projects 1 : VASARI

This is an eCommerce application that allows users to subscribe to the Printers. Customers can place an order for the printer through the Magento portal by providing their personal details. The service is subscription-based, where users pay a monthly fee for the printer and can manage their subscription through the UCDE portal. Key features include the ability to update shipping and billing addresses, cancel subscriptions, request refunds, handle delinquency, and request printer replacements.

- Proficient in developing automation scripts for web applications using Python, Selenium WebDriver, BDD, Pytest & Robot framework.
- Skilled in creating custom XPATH and CSS locators for identifying web elements.
- Maintained and updated automation test scripts on GitHub and executed test cases within the Azure DevOps pipeline.
- Strong expertise in Object-Oriented Programming (OOP), file processing, exception handling, and regular expressions.
- Experienced in API testing with Postman, including working with RESTful APIs and JSON as the protocol.
- In-depth understanding of HTTP methods such as GET, PUT, POST, and DELETE.
- Proficient in using Postman for REST API testing and following Agile and V-Model methodologies for the Software Quality Assurance (SOA) process.
- Extensive experience in executing a wide range of test cases, including regression, negative, smoke, re-testing, and ad-hoc testing.

Project2: PORTSMAN

Portsmann runs a fast-paced e-commerce platform dedicated to automating the testing of its online retail environment. The focus is on delivering a flawless shopping experience by reducing bugs, optimizing performance, and ensuring the reliability of critical features such as product browsing, search functionality, cart management, and the checkout process.

- Analyzing the user stories assigned to me by performing feasibility check
- Implemented end-to-end web application testing using Playwright with Python, ensuring robust cross-browser compatibility and streamlined automation workflows.
- Developing reusable functional components in the framework.
- Writing feature files for various test scenarios and doing Test scripts Result Analyzing and Defect reporting using JIRA defect management tool.
