

Profile summary

- 6+ years of strong professional experience in Data Base Design, Data warehouse, Application Development using Oracle 12c/11g, SQL, PL/SQL, and Oracle Data Integration.
- Good Knowledge in PL/SQL, SQL.
- Exposure on HTML, CSS and Java Script.
- Conducted Oracle database and SQL code tuning to improve performance of the application, Used Bulk binds, in-line queries etc.
- Created oracle Tables, views, Constraints, synonyms, Sequences.
- Developed and maintained database solutions for critical business applications, resulting in improved data accuracy and efficiency.
- Collaborated closely with software engineers and business analysts to gather and refine requirements, ensuring database solutions aligned with business goals.
- Experience in Design, Development, Implementation and support as Oracle Developer in Production and Development using Oracle Tools.
- Strong technical expertise in creating and maintaining database objects - Tables, Views, Materialized Views, Indexes, Sequences, Synonyms, Database Links and Database Directories.
- Extensive experience in developing PL/SQL Stored Procedures, Functions, Packages, Cursors, Collections (Nested tables), Records, Object types and Database Triggers.

Education

Completed **B.E.(ECE)** In C.K College of Engineering and Technology with **7.2 CGPA** in 2014.

Experience

Company Name : **Intuit, Bangalore.**
Experience : Jul 2018 to till Date.
Designation : PLSQL Developer

Project #1

Arlington Banking Systems

Client : Techno Securities, New York.

Duration: FEB 2022 – Current

Project Description:

It's an Internet-Enabled Application with a database backend, provides an extensive range of functions and data access within all key investment activities such as Trade Processing, Investment Management, Cash Processing, Regulatory reporting and inquires & reports. It also fully supports domestic and international securities trading in Equity.

Responsibilities

- Coordinated with the front-end UI developer team to provide them with the necessary store procedures and packages insight into the data.
- Created indexes on the tables for faster retrieval of the data to enhance database performance.
- Creation of database objects like tables, views, materialized views, procedures and packages using oracle tools like Toad, SQL Developer and SQL* plus.
- Handled errors using Exception Handling extensively for the ease of debugging and displaying the error messages in the application.
- Involved in the continuous enhancements and fixing of production problems. • Extensively used bulk collection in PL/SQL objects for improving the performance.
- Work closely with business analysts, accountants, and other stakeholders to gather and understand system requirements.
- Document technical specifications, database designs, and operational procedures.
- Provide training and support to end-users on APS functionalities.

Environment: Oracle 11g, SQL Developer.

Project #2

Accounting Process System (APS)

Client: Bank of America – Florida.

Duration: OCT 2018 – NOV 2021

Project Description:

It's a converting of the Legacy system to Integration Disbursement system (IDS), which provides an extensive range of functions and data access within all key investment activities such as Loan, Sub-loan, Grant, Cash Processing, Voucher Regulatory reporting, and Interface & reports.

Responsibilities

- Coordinated with the front-end design team to provide them with the necessary stored procedures and the necessary insight into the data.
- For Interface Module Creating of database objects like tables, views, procedures, Collection using oracle tools like SQL Developer.
- For Report Module Designing Front end and Backend as well using Jasper report.
- Optimize PL/SQL queries and scripts for better performance in handling large financial datasets.
- Monitor and resolve database performance issues, such as slow-running queries and deadlocks.
- Work closely with business analysts, accountants, and other stakeholders to gather and understand system requirements.
- Document technical specifications, database designs, and operational procedures.
- Provide training and support to end-users on APS functionalities.
- Provide on-call support to resolve critical issues in the APS environment.
- Regularly update and maintain the APS to incorporate changes in accounting policies or business needs.
- Ensure timely backup and recovery plans for the database.

Environment: Oracle 11g, SQL Developer, Jasper iReport.

Project#3

Cascaded Invest Banking

Client : Lazard Bank

Duration: Oct 2023 to till now

Responsibilities:

- Involved in writing and optimizing PL/SQL packages, procedures, and triggers for various investment banking applications.
- Designed and implemented advanced database queries using Oracle SQL to support real-time trading systems and data analysis.
- Worked closely with the database administration team to ensure data security and backup in Oracle 12C environments.
- Created efficient PL/SQL scripts to handle high-volume financial transactions and reports in the investment banking sector.
- Utilized Oracle APEX for building web-based tools that enable users to monitor investment portfolios and transaction histories.
- Troubleshoot database performance issues and provided tuning solutions to optimize trading and portfolio management systems.
- Developed Shell Scripts in a UNIX environment to automate routine maintenance tasks and alert systems for proactive database monitoring.
- Collaborated with the IT and business teams to implement solutions aligned with business requirements in trading, asset management, and risk management.
- Write unit tests for PL/SQL code to validate functionality and prevent defects.
- Conduct integration testing to ensure seamless interaction between the database and other system components.
- Participate in user acceptance testing (UAT) to confirm the system meets accounting requirements.

Core qualifications

Databases	: Oracle 10g/11g, 12c, MS-SQL Server 7/2000, MS Access.
Language	: Java Script, HTML, CSS.
Scripting	: SQL, PL/SQL, UNIX Shell Scripting.
Tool	: TOAD, SQL Developer, SQL Navigator, SQL Plus
Operating Systems	: Windows 2000/NT/XP/7/98 and UNIX.

Declaration

I hereby affirm that the details furnished above are true to the best of my knowledge.
