Software Engineer with 5+ years of experience

Summary

- Having 5+ years of Experience in Software Development Field, Design on different System and Web based applications using Java, J2EE, Spring Boot, Micro Services, Rest API, Spring and Hibernate.
- Expertise in client interaction and customer relationship management.
- A keen analyst and team player with thorough understanding of all aspects of the SDLC/Agile from understanding client requirements through direct client interaction, translating them into technical specifications, and driving their execution.
- Ability and attitude to pick up new technologies quickly.
- Working on maintenance & development projects.

Project experience

1. Project: Verizon My Fio's Application

Duration: Nov 2023 to Jan 2025.

Client: Verizon

Description: Part of a technical team responsible for creating multiple components in Fio's Application. This is a cloud-based Communication application. This application enables the consumers to order online for voice, data and video services. What's next consumer (web/mobile) & SMB is a self-service application for customers to check their order status and make changes to their order like billing address, due date, shipping address, first bill estimation, giving installations instructions to agent and etc. Consumer customer's makes changes to their orders via whatsnext widgets incorporated on other applications like

- MyVerizon Dashboard
- My Fio's App
- Whatsnext Business

Skills Used: Java, Spring, Micro Services, Spring boot, Hibernate, Maven, Jenkins, Jira, Eclipse, Tomcat, Multi-Threading, Angular, Kubernetes, Kafka, Rest API, Junit, Postman, SQL.

Responsibilities:

- Writing the business logic for a given activity.
- Implemented hibernate components.
- Doing the code reviews.
- Test the developer test cases and do the unit testing.
- Good experience in developing the single-page applications using Angular.
- Participated in onsite discussion for the requirement gathering.
- Analyze the system requirements.
- Experience in developing highly interactive web applications utilizing Angular.
- Working with Agile methodology using Jira tool
- Involved in the designing of activities.
- Involved in implementing restful web services.
- Coordinated the Onsite, Offshore teams for Requirements, development, deployment and delivery.

2. Project: Bloomsbury, UK.

Duration: Sep 2022 to Oct 2023.

Client: Self-Serve Platform

Description: It is a Self-Serving Portal for Bloomsbury Publishing Domain; Product owners and Administrators will have role wise access to this Product. Is a Customized Content Management Platform with which Product Owners can design their sites like www.arcadia library online.com, www.bloomsburypopularmusic.com, etc. from scratch like Home Page, Content specific Summary and Detail pages, Header, Footer, etc. to their selected theme, font, and so on. Third party integrations are done with SAMS for user authentication, Cloudnary for copy righted Image Authentication.

Responsibilities:

- Implementing on Spring Boot and Micro services.
- Implementing written Service and Repository interface along with their implementations.
- Injected the Repository into service classes using Spring IOC pattern.
- Getting the requirements from the requirement analysis and Bug Tracking tool JIRA.
- Analyzing the requirements and understanding the requirements by preparing a Requirement Understanding Document.
- Implementing on Spring Data JPA and Restful web services.

Skills Used: Java, Spring IOC, Spring, Spring boot, Micro Services, JPA, Eclipse, Tomcat, Struts, React JS, Node Sparsest API, Maven, Jenkins, SVN, JUnit, SQL.

3.Project: CROL – (Provisioning and Activation) Circuit Move over Length

Client : Novus Telecom

Duration: DEC 2019 to Aug 2022.

Description: Novus Telecom Communications is the latest Voip technology Provider in Canada. It will enable a host of rich multimedia services such as video calling, video on demand, and provide a richer experience for existing services such as mobile internet, mobile TV and MMS, Broadband, Fiber optics technology. Next gen networks operate on technology called High Speed Downlink Packet Access (HSPA). Data is transmitted many times faster than earlier 5G networks. This basically means that, in addition to the earlier audio, graphics, and text, you can now send and receive video content too.

Skills Used:

Java, Hibernate, Spring, Eclipse, React Spring MVC, Spring ORM, HTML, CSS, Java Script, Jira,GIT,JUnit,SQL.

Responsibilities:

- Implementation of Web Pages in JSP using Java Script for validations.
- Implementation of Web Pages using JSP and HTML.
- Implement the code as per design. Developed business logic.
- Develop the site and integrate the dynamic pages with the static designs.
- Used Spring Framework for Dependency injection.
- Implementation of Web Pages in JSP using Spring Form Tag Library.
- Involved in developing JSP forms and navigation using View Resolver.
- Used Spring Hibernate for Querying data from the database.
- Involved in developing Controllers using Spring MVC.

Highlights

- **Skills:**
 - Java stack: core java
 - Frameworks: Spring (boot, core, MVC, ORM), Hibernate, JPA, Struts, Micro Services.
 - Databases: SQL

- IDE: Eclipse, IntelliJ.
- Software engineering practices: J-Unit, JIRA, GIT, SVN
- Build Tool: Maven
- CI/CD Tool: Jenkins
- Application servers: Tomcat, Web Sphere
- Cloud: AWS
- Web technologies: HTML, CSS, Java Scripts/ Servlets, Angular, React JS, JDBC
- Other technologies: Rest API, Postman, Jira, Kubernetes, Kafka, Kibana

Educational Qualification

- **BE** at Gurunanak institute of Technology.

Working Experience

- Worked as a Software Engineer in **HCL Technologies**, from Dec 2019 to till date.
