

WORK EXPERIENCE

Electrical Design Eng. Sun Mobility

-  6 OCT 2024- Present
 - Working on the **Man ual Quick interchange Station** (Charger)
 - Done the DV (Design Verification) of **Exicom and Delta** charger.
 - Participate in prototype **testing and validation** to ensure designs meet safety, performance, and regulatory standards.
 - Evaluating the charger under **various load conditions** to ensure it meet specifications.
 - Collaborating **with mechanical engineers, software developers, and product managers** to integrate the charger into larger systems

Electrical Engineer (Log9 materials)

-  1 April 2024 – 30Sep. (Project 1)
 - Routing, branching and parking of wiring harness the **4-wheeler battery pack**.
 - Creating a whole **wiring layout as per the BMS**.
 - Responsible for the selection of the **connector, wire, terminal, connector for the electrical devices, covering type**, etc.
 - Worked on the **Aeidth and Orion BMS**.
 - Done testing and Validation of the BMS.

Electrical Engineer (Log9 materials)

-  15 December 2022 – 31 March 2024 (Project 2)
 - Design the whole **electrical architecture** for 1 and 2-kW fuel cell Battery.
 - Make the **wire harness** for the system
 - Participated in design reviews and provided feedback to design teams to enhance component **reliability and manufacturability**.
 - Developed and implemented a preventive **maintenance plan** for electrical systems.
 - Selection of suitable components for the system like **DC-DC converter, Battery, SMPS, Inverter, Wires**, etc.
 - Conducted comprehensive electrical testing to ensure the **reliability and functionality** of the overall system.
 - Maintain engineering records such as **testing, BOM, and documentation**.
 - Played a key role in integrating electronic components within the embedded systems of the Flow Batteries.
 - Hand-on experience with testing of **component analysis, testing, PCB assembly, and soldering**.
 - Worked on **CAN, UART, I2C, SPI, and USB communication protocols**.

Electrical Intern, Baner Powerhouse

-  1 June – 30 June 2017
 - Baner Powerhouse is a hydel power project situated at the bank of Baner River, operated by the Himachal Pradesh State Electricity Board.
 - Learned about technical aspects of the **turbines operating** at the powerhouse.
 - Learned about components of the switch yard **like relays, switchgear, transformer, and circuit breaker**.

SKILLSET

- Strong analytical and problem-solving skills to address complex engineering challenges.
- Ability to work well in multidisciplinary teams and lead projects as required.
- Expertise Work Delivery**
 - Ability to work independently and meet strict deadlines.

EDUCATION

Bachelor of Engineering, Electrical Engineering

Shoolini University of Biotechnology and Management Science

 Aug 2019 – June 2022, CGPA: 7.8

Diploma in Electrical Engineering

 Aug 2015 – June 2018, CGPA: 6.5

TECHNICAL SKILLS

PROFICIENT

Electrical Schematic, Solid works, Batteries, Testing and Validation, Research, Communication,

INTERMEDIATE

PCB Design, Communication Protocol

BEGINNERS

CATIA

RESEARCH AND PROJECTS

Publish a Research Paper

IoT Based Soil Monitoring System

 Sep 2021 – May 2022

Done research on different types of soil with the help of IoT and different testing equipment.

Lead the Final Project

“Water Quality Measurement Using GSM”

 May 2022

Lead Project:

 February 2022

Lead the team in front of MSME, seeking funding for the "Power Supply for Computer Desktop CPU with Backup" project, showcasing its market demand, financial viability, and the team's expertise.

ACHIEVEMENTS

- Pro9er award for Contributed significantly to the development of a 16 kWhr flow battery, playing a key role in both technical execution and project coordination

- Secured First place in Inter college Debate Competition.

Awarded with the best performance candidate of the sprint of the final year batch.

CORE SKILLS

- Expertise in Electrical Schematic Design**
- Testing and Validation of the system
- Technical Understanding of 2D drawing**
- Wiring Harness for the System**
- CAD Software: Solid works and AutoCAD
- Expertise in BOM and technical documentation.

INTERESTS

- Reading Novels and Books
- Writing Blogs and Articles
- Fitness
- Travelling
