Pursue excellence in software quality assurance by employing thorough testing methodologies, aiming to enhance product reliability and client satisfaction through a proactive approach to quality engineering.

PROFILE SUMMARY

As a dedicated QA Leader with 8 years of experience, I specialize in functional, UI, and API testing within Agile/Scrum environments. At Accenture, I have led high-performing QA teams across the full testing lifecycle for mission-critical projects—defining and executing end-to-end test strategies, planning, and defect management to ensure timely and high-quality product releases. I bring hands-on expertise with tools like JIRA, SQL, HP ALM, Qmetry, Postman, and SoapUI, enabling faster resolution cycles and enhanced product stability.

In addition to my strong foundation in manual testing, I have contributed to modern DevOps pipelines by integrating UI and API automation within CI/CD environments. I'm well-versed in risk-based testing, test metrics reporting, and cross-functional collaboration with developers, product owners, and business analysts. By aligning QA efforts with business goals, I consistently deliver measurable improvements in software quality, system reliability, and stakeholder confidence.

WORK EXPERIENCE

Quality Engineering – Team Lead Accenture

May 2017 – Present

- Leading a high-performing team of 7 test engineers, managing the complete QA lifecycle for multiple enterprise-scale projects across diverse domains, consistently delivering 100% on-time and high-quality releases.
- Designing and executing comprehensive test strategies, including detailed test plans and scripts aligned with business requirements, resulting in a 25% improvement in test coverage and overall software quality.
- Driving efficient defect lifecycle management using tools such as JIRA, HP ALM, and Qmetry—reducing issue resolution time by 30% through proactive tracking, prioritization, and cross-team collaboration.
- Spearheading collaboration between development teams, business analysts, and stakeholders to define scope, mitigate risks, and design robust functional testing strategies—achieving a 20% reduction in rework and enhanced delivery accuracy.
- Championing continuous improvement initiatives that streamlined QA processes, resulting in a 15% increase in team productivity and elevated client satisfaction.
- Administering Agile ceremonies such as sprint planning, daily stand-ups, retrospectives, and backlog grooming—ensuring QA alignment with project milestones and business objectives.
- Mentoring and onboarding new team members, fostering knowledge transfer of QA tools, frameworks, and best practices—enhancing team capability and consistency in execution.
- Elicited, analyzed, and documented comprehensive requirements from product owners, leading to the development of a detailed test plan with 200+ test cases for critical functionalities.
- Designing and implementing reusable automation frameworks using industry-standard tools, resulting in a 40% reduction in manual effort and improved testing efficiency for regression cycles.
- Producing detailed test metrics, dashboards, and defect trend analysis to support risk-based decision-making and provide transparency to stakeholders.
- Enhancing test execution speed by identifying bottlenecks, optimizing workloads, and leveraging automation—cutting overall test cycle time by 15% without compromising quality.
- Collaborating with DevOps teams to integrate automated testing within CI/CD pipelines—facilitating faster feedback cycles and streamlined deployment workflows.

ACHIEVEMENTS

- Reduced manual test effort by identifying high ROI test cases and transitioning them into semi-automated validation scripts via API-level testing.
- Conducted cross-team testing bootcamps and QA workshops, elevating testing standards and reducing onboarding time for new QA resources.
- Successfully led a defect escape analysis initiative, reducing production defects in critical modules through targeted improvements in regression and exploratory testing.
- Implemented early test design with story grooming, achieving better coverage and reducing missed test scenarios during sprints.

CORE COMPETENCIES

- Quality Assurance Strategies
- Risk Management Frameworks
- Python Automation
- Software Development Lifecycle (SDLC)
- Cross-Functional Team Collaboration
- Defect Lifecycle Management
- Test Metrics and Reporting
- Agile Methodologies
- Continuous Integration Practices
- Test Case Design and Review
- Cross Functional Team Collaborations

SOFT SKILLS

- Time Management
- Effective Communicating
- Problem-solving
- Result-oriented
- Analytical Thinking

TECHNICAL SKILLS

- JIRA
- SoapUI
- Postman
- HP ALM
- SQL
- Karate DSL
- Qmetry
- Agile Project Management Tools
- API Automation

EDUCATION

- **B. Tech – Civil Engineering** from KIIT University, Bhubaneswar, May 2017

AWARD

- Honored with the Accenture Celebrates Excellence (ACE) Award in 2019 for outstanding collaboration and teamwork.

PERSONAL DETAILS

- **Languages Known:** Hindi, English, Spanish (Beginner)
- **Address:** Bangalore
