Career Objective:

Having 4+ years of experience in Administration/Maintenance and Implementation of databases in Microsoft SQL Server. I was actively engaged in database administration and proficient in use of administrative tools. My expertise includes Setting up Disaster Recovery Plans, High Availability Configurations and Database Performance Monitoring, Database Troubleshooting skills.

Professional Experience:

- **Upgradation, Migration of SQL Server from SQL 2005/2008/2012 – SQL 2019 On-Premises**
- **SQL Server 2005/2008/2008R2/2012/2014/2016/2017/2019 Installation & Configuration.**
- Implementation of **SQL Logins, Roles and Authentication Modes**
- Fixed the issues of **Orphan users & Orphan logins**
- Experience in database backups (**mirror backup, copy-only backup, striped backup**), **point in time recovery**, disaster recovery and restore procedures.
- Fixed system DB corruptions **Master, Model, MSDB, TEMPDB & Resource DB.**
- Configuring Database Mail along with Alerts and Operators.
- Configuring **HADR like Log Shipping, Mirroring, Clustering, Always-On AG & Replication.**
- Handling advanced **Always-On AG scenarios** like Failover, **adding new data/log files**, configuring **Read-Only Routing, listeners and backup** configurations
- Configured Transactional, **Snapshot, Merge, Peer-To-Peer & troubleshooted Replication.**
- Creating/Managing Clustered & Non-Clustered Indexes including Filtered/Column Store
- Resolving Blockings and Deadlocks using Extended Events and giving recommendations on Isolation Levels/Indexes to avoid/minimize blockings/deadlock

MS SQL server Databases Administrator

NTT DATA INFORMATION PROCESSING SERVICES-

July 2021 to till date

(Fidelis Technology services Pvt Ltd)

- Provide 24/7 production support and on call support for SQL server databases.
- Resolve and provide the solution for the assigned tickets within the defined priority.
- Performed installations of **SQL server 2012,2014,2016 and 2019 on windows servers.**

- Apply latest service packs and hot fixes released.
- Handling space management issues like **Log File Full, Data File Full, TEMPDB Full.**
- **Troubleshooting 100% CPU, memory** by using perfmon counters and DMVs.
- Recommending developers isolation levels like Read Uncommitted, Read Committed, Repeatable Read & Serializable as per their requirement.
- Troubleshooting slow performing queries, Application slow, DB slow situations
- Involved in Installing **SQL Server and its service packs** and client installations
- Checking the status of **backup, troubleshooting the failed backups** and restoration
- Handling Outage Notifications, production maintenance/production down issues
- **Log-Shipping scenarios 14420, 14421, failover, switchover, adding file & troubleshooting.**
- Apply latest service packs and hot fixes released
- On-Call responsibilities for Production database systems
- Creating Indexes on tables to improve the performance as per Dev/App teams
- Recovering the databases from backup in disaster situations
- Performing SQL server daily health check and preparing a report based on it

MS SQL server Databases Administrator

Hive loop Technology Pvt Ltd -April-2019 -April-2020

(Fretus Folks India Pvt Ltd, Folks PVT LTD, ACHA FOR U HR SERVICE)

- experience in IT Industry working as a DBA in Administrator.
- Had done various projects for Backup and recovery, Installation, Configuration, Migration, upgrade, Disaster recovery, cloning, patching, Performance Tuning.
- Excellent experience in Installation and configuration of different databases on Operating Systems AWS/Azure & Windows platforms.
- Planned and scheduled the (Full/Diff/Log) backups as well
- Experience in management tools like SSMS, service now, perfmon, Azure /AWS Portal.
- Provided 24x7

Microsoft Azure (IaaS):

- Creating Azure **Virtual Machines/ Azure SQL database's** both **Windows/Linux** and installing SQL Server.
- Configured Always-On AG with listeners and **load balancers** in Azure VMs
- Exporting **BACPAC** from Azure SQL Databases.

- Taking On-Prem backups to Azure Blob Containers.

Amazon cloud (AWS):

- Creating a DB instance and **multi-AZ DB cluster** instance connecting and configuration the **RDS instance**.
- Taking **snapshot** and **restoring new RDP instance**.
- Backing up and restoring the DB instance
- Managing a DB instance like stopping, starting, modifying a DB Instance and Modifying Multi AZ DB cluster.

Skills

- Database : SQL Server 2005, 2008R2, 2012, 2014, 2016,2019
- Operating Systems : Windows 7/8/10, Windows Server 2008R2/2012/2016/2019
- Tools : SSMS, Perfmon, Profiler, Configuration Manager, Azure & AWS portal

Education

Bachelor of Technology (E.C.E) from Jawaharlal Nehru Technological University Anantapur (in Jan-2019)
