

NAME: AJAY KUMAR D

RESUME

Mail Id: ajaykumardurgam92@gmail.com

Phone Number: +91-6301129070

Education Details

B.tech – Metallurgical and Materials engineering from RAJIV GANDHI UNIVERSITY OF KNOWLEDGE TECHNOLOGIES Basar.

Key Expertises

Having **around 6 years** of experience in Devops Tools like GitHub, Jenkins, Jfrog, Ansible, Docker, Kubernetes, AWS, SonarQube, Jira, Shellscript, Groovy, Python Script, Linux, Terraform, Python programming and Having knowledge on Mysql.

Experience Summary

- Worked as a senior engineer for **L&T TECHNOLOGY SERVICES**, Bangalore from November 2021 to 2024 Jul16.
- Worked as a software engineer for **TECHMINDS IT SERVICES PVT LTD**, Bangalore from Feb 2018 to Mar 2021.

Work Summary

- Having **around 6 Years** of work experience in **DevOps/ Build & Release Engineer**.
- Expertise in using **MAVEN** and **ANT** as build tools for the building of deployable artifacts (jar, war & ear) from source code.
- Build, Configure, Manage and Coordinate all **Build and Release Management activities**.
- Involved in handling the Hardware setups and Debugging the issues in it.
- Worked on Automated build & Release process.
- Maintain Build and Release Tools and migrate to new tools as needed.
- Having Good knowledge and Experience on **Docker**.
- Having In-depth understanding of the principles and best practices of Software Configuration.
- Troubleshooting and problem solving of **Linux/UNIX** servers, debugging OS failure.
- Experience in installation of **Docker** and Configuring **Kubernetes** and **Terraforms**.

- Experience in working on source control tools like **GIT**.
- Experience in setup and configure **Ansible**. And installing applications using **Ansible**.
- Experienced with **AWS** Cloud platform and its features, which includes **EC2, S3** etc.
- Extensively worked on **Jenkins**, for continuous integration and for End to End automation for all build and deployments.
- Automated nightly build, test, and reporting mechanisms.
- Worked on server machines with platforms like **windows64, windows32 and linux64** to test and resolve the new release for group build issues, test failures, build breaks, integration issue.
- Having In-depth understanding of the principles and best practices of Software Configuration.
- Experience in setup **Continuous Integration** and **Continuous delivery** pipelines in **Jenkins**. Using Continuous Delivery to handle releases in all pre-production environments.
- Expert in deploying the code through web application servers like **Apache Tomcat**
- Ability in development and execution of **Shell Scripts**.
- Ability in managing all aspects of the software configuration management process including code compilation, packaging / deployment / release methodology, and application configurations.
- Experience in working with Tracking Tools, **JIRA**.
- Experience in Deploying to and administering in the use of **Tomcat, JBoss** and **Apache web server, Jenkins, GIT**.

NAME: AJAY KUMAR D

Operating system	Linux and Windows family
Hardware setups	HARTS setups
Version Control tool	GIT
Build Tools	Ant and Maven
Ticketing Tools	Jira
Scripting Languages	Shell script
Application server	Tomcat and JBoss
Webservers	Apache
Cloud	AWS
Containerization tools	Docker and Kubernetes
Database	Oracle
Server	Apache , Tomcat
Cloud infrastructure tools	Terraform
Configuration tools	Ansible
Programming languages	Python

Skills

Project Details

Project 5

Project Name	ModemSDK_5G_WWAN_Linux	Duration	16 months
		Team Size	2

Description	This project is Telecommunication project. Here we used to Test the Modems on different type of networks. this project is in Linux Environment. These Modems used to test on Harts Hardware setups.
Client	intel
Role & Responsibilities	Role: Senior Devops engineer Contribution: • I have Handled three Projects in Intel client. • Two projects were in Linux Environment. • One project in windows Environment. • Configuring a system, Management of Plugins and Nodes, Creating & Scheduling jobs, viewing the system logs using Jenkins. • Build, configure, Manage and Coordinate all Build and Release Management activities. • Involved in fixing the Build failure issues and given fixes for build failures. • Experience in creating new stages in JENKINS CI/CD pipeline. • Used Git Hub for Source code Management. • Maintained and administered GIT source code tool, Created Branches, Labels and performed Merges in GITHUB. • Used JIRA for issue reporting. • Used JFROG Artifactory Tool for Maintaining and storing Binaries. • Involved in Developing the Shell script for Test cases Automation. • Involved in Modifying the Groovy script for the CI/CD Process improvement as per the client requirement. • Involved in setting up the HARTS hardware setups for testing the binary. • Experienced in Debugging the Test case failure which is occurred on Hardware setups. • Experienced in log analysis for Hardware testcases failures. • Worked on fixing the Testcase failures. • Have knowledge on Automation process for running the Test cases on Hardware setups.
Technology & tools	• GitHub, Jenkins, Docker, JFROG, Kubernetes Linux(OS), Jira and HARTS Hardwares

Project 4

Project Name	ModemSDK_4G_WWAN_Linux	Duration	2years 2months
		Team Size	2
Description	This project is Telecommunication project. Here we used to Test the Modems on different type of networks. this project is in Linux Environment. These Modems used to tested on Harts Hardware setups.		
Client	intel		
Role & Responsibilities	Role: Senior Devops engineer Contribution: - Configuring a system, Management of Plugins and Nodes, Creating & Scheduling jobs, viewing the system logs using Jenkins. - Build, configure, Manage and Coordinate all Build and Release Management activities. - Involved in fixing the Build failure issues and given fixes for build failures. - Experience in creating new stages in JENKINS CI/CD pipeline. - Used Git Hub for Source code Management. - Maintained and administered GIT source code tool, Created Branches, Labels and performed Merges in GITHUB. - Used JIRA for issue reporting. - Used JFROG Artifactory Tool for Maintaining and storing Binaries. - Involved in Developing the Shell script for Test cases Automation. - Involved in Modifying the Groovy script for the CI/CD Process improvement as per the client requirement. - Involved in setting up the HARTS hardware setups for testing the binary. - Experienced in Debugging the Test case failure which is occurred on Hardware setups. - Experienced in log analysis for Hardware testcases failures. - Worked on fixing the Testcase failures. - Have knowledge on Automation process for running the Test cases on Hardware setups.		
Technology & tools	GitHub, Jenkins, Docker, JFROG, Kubernetes Linux(OS), Jira and HARTS Hardwares		

Project 3

Project Name	[M2_7560_R+&M2_7560_V2] WW AN 4G Windows	Duration	1 year
		Team Size	3
Description	It is a telecommunication project.we used to Test the Modems on windows environment on 4G network. These modems used to test on HARTS Hardware Setups.		
Client	Intel		
Role & Responsibilities	Role: Senior Devops Engineer Contribution: • Configure a system, management of plugins and Nodes, creating &scheduling the job, viewing the logs using the Jenkins • Build, configure Manage and coordinate all Build and Release Management activities. • Involved in fixing the build failure issues and given fixes for build failures. • Used UTP for issue reporting ticketing tools. • Used JFROG Artifactory Tool for Maintaining Binaries. • Involved in Developing the shell script for Testcases Automation. • Involved and modifying the Jenkins jobs as per the Client requirement. • Involved in setting up the Harts hardware setup for testing binary. • Experienced in debugging the Testcase failure, which is occurred on Hardware setups. • Experienced in log analysis for Hardware Testcase failures. • Involved in SCM activities as per client requirement and fixing the issue on time. • Experienced in CL/CD Mainline Monitoring.		
Technology & tools	Jenkins, Git, UTP, Hardware setups and Jfrog.		

Project 2

NAME: AJAY KUMAR D

Project Name	NBS Project	Duration	1year
		Team Size	5
Client	Tech Mahindra (NBS project)		
Role & Responsibilities	Role: Devops engineer Contribution: • Configuring a system, Management of Plugins and Nodes, Creating & Scheduling jobs, viewing the system logs using Jenkins. • Experienced in deploying micro service applications using Docker. • Hands on experience in Amazon Web Services (AWS) provisioning and good knowledge of AWS services like EC2, S3. • Good understanding of Docker composes files and deploying services using stack deploy. • Used JIRA for issue reporting. • Managed build results in Jenkins and deployed using workflows. • Involved in setting up container orchestration such as Kubernetes. • Writing Kubernetes manifest files for Deployments in Kubernetes cluster. • Experience in implementing Continuous delivery framework using Jenkins, Maven, Docker Wrote Ansible Play-Books for deploying the applications using Ansible. • Developed Ansible scripts for an automated server provisioning. • Provisioning Kubernetes Clusters and deploying applications on Kubernetes. • Managed Entire chef Configuration management tool for provisioning the cloud infrastructure. • Work on maintaining Kubernetes Clusters and Kubernetes Services. • Maintained and administered GIT source code tool, Created Branches, Labels and performed Merges in GIT. • Provide troubleshooting and timely resolution of system, network and infrastructure problems. • Monitoring Remote Hosts/Servers and Services using Nagios Server.		
Technology & tools	• Web Services, GIT, MAVEN, Jenkins, Docker, Kubernetes, Oracle 11g, Linux, Apache & Tomcat		

Project – 1

Project Name	Highmark Project	Duration	2Year 1months
--------------	------------------	----------	---------------

		Team Size	4
Client	Tech Mahindra		
Role & Responsibilities	Role: Devops engineer Contribution: • Creating CI/CD pipelines by integrating Git, GitHub, Maven, Jenkins, Chef, Monitoring Tools and AWS (provisioning). • Develop, deploy, and maintain automation for applications in the AWS environment. • Expertise in creating DevOps strategy in a mix environment of Linux (RHEL, CENTOS, UBUNTU) servers along with Amazon Web Services. • Created release branches in GIT by GIT Administration including branching, reporting and assisting with project and end user support. • Maintaining Kubernetes Clusters and Kubernetes Services. • Hands on experience working with configuration management tools like Chef and Ansible. • Experience in merging the code from one branch to another branch and resolving conflicts. • Involved in setting up container orchestration such as Kubernetes. • Creating and maintaining the repositories in Git. • Installed and Configured Jenkins for Automating Deployments and providing a automation solution. • Knowledge on handling Amazon Cloud Computing. • Configuring and enabling the SonarQube through Jenkins pipeline jobs. • Enabling the SonarQube quality gates for the modules of the project to maintain the Stability of the code quality. • Configuring security groups and grouping the servers depending on the applications. • Developed recipes, Installed and configured Chef for automated infrastructure deployment of applications. • Uploading cookbooks to chef server and managing those cookbooks. • Resolving issues related chef infrastructure. • Experience in Automation Build Tools like MAVEN and creating packages like WAR, EAR, JAR.		
Technology & tools	• Web Services, GIT, MAVEN, Jenkins, Docker, Kubernetes, Oracle 11g, Linux, Apache & Tomcat
