

Amar Dutta Pattanaik

React JS Front End Developer with 5 years of overall experience

PROFESSIONAL SUMMARY

With a solid 5 years tenure as a **React.js Developer**, I've been at the forefront of developing Project Management Applications and Internet Banking Websites for seamless user experiences. My expertise lies in UI development using React.js and Redux, where I've consistently delivered top-notch solutions. My dedication to crafting user-friendly interfaces and my involvement in creating secure online banking platforms underscores my commitment to driving innovation and excellence in the web development space.

KEY STRENGTHS

React.js: Expertise in building scalable and performant web applications using React.js, including hooks, context API, and Redux for state management.

UI/UX Design Integration: Proficient in turning design mockups and wireframes into pixel-perfect, responsive interfaces that enhance user engagement and satisfaction.

Component Reusability: Skillful at developing reusable components and libraries to improve development efficiency and maintainability.

Performance Optimization: Experienced in optimizing application performance by minimizing render times, reducing unnecessary re-renders, and implementing lazy loading techniques.

Collaboration: Effective communicator and team player, with a proven track record of collaborating with designers, product managers, and backend developers to deliver high-quality solutions on time.

Testing: Proficient in unit testing with tools like Jest and Enzyme to ensure robust and reliable code.

Version Control: Familiarity with **Git and GitHub** for efficient code versioning and collaboration.

Responsive Design: Experience in building responsive web applications that provide a consistent user experience across various devices and screen sizes.

Continuous Learning: Committed to staying current with industry trends and best practices, and always eager to learn and apply new technologies and tools. Passionate about creating exceptional user interfaces and solving complex technical challenges, I am ready to contribute my expertise to your team and help deliver outstanding React-based solutions. Let's collaborate to build engaging web applications that exceed user expectations and drive business success.

PROJECTS

Sales Force Tool

TECHNICAL SKILLS

JavaScript, React JS, HTML5,
CSS3, Bootstrap, Material UI

Tools: Jira, GitHub

EXPERIENCE

Flamboyanz Software PVT LTD, Bengaluru

Software Engineer

February 2019 - March 2024

As an Software engineer at Flamboyanz Software PVT LTD in Bengaluru, I actively participated in various software development projects, gaining valuable hands-on experience and enhancing my skills in the field of software engineering.

LANGUAGES

English, Kannada, Odia, Bengali

EDUCATION

VTU— B.E(CSE) 2017

CERTIFICATION

Node.js Developer Course at Felight
August 2023 - Current

understanding document of Client requirements, based on login the employee can add his daily wise task done and he can change the added details. Employees can view the task status which he did. Admin has full control of the sales force tool.

Key Responsibilities:

- Customization of Sales Force Tool
- Front-End Development
- Implementation and Deployment
- Bug Resolution
- User Interface Development

Contributions and Achievements:

- Enhanced Customer Experience
- Technology Integration
- Problem-Solving

Project Duration: 10 Month

Team Size: 10

Tools Used:

- HTML5, CSS3, JavaScript, Bootstrap, React js, Redux.

Task List Tracker(TLT)

Description:

TLT is a popular task and project management tool designed to streamline collaboration and improve productivity for individuals and teams. It offers a user-friendly interface and a range of features to help user organize, track, and complete their tasks efficiently

Key Responsibilities:

- Customization of Task List Tracker
- User Interface Development
- Implementation and Deployment
- Bug Resolution

Contributions and Achievements:

- Enhanced Customer Experience
- Technology Integration
- Problem-Solving
- Supporting Sustainability and Reliability

Project Duration: 9 Month

Team Size: 12

Tools Used:

- React JS, JavaScript, Oracle HTTP Server (OHS), Jira, Visual studio code

TATA Motors - Customer Portal

Description:

The customer portal is an application developed to initiate, process and maintain the customer, contract and payment details of an employee and customer in TATA Motors, uploading of contract, customers and payment excel sheets, Allowing the customers to see contract status wise details, allows the user to do all the formalities required for customer and admin.

- Application development
- React Development
- Technology Insights
- Collaborative Problem-solving

Contributions and Achievements:

- Enhanced user Experience
- Technological Proficiency
- Deeper understanding of React JS
- Contributed to Industry-Leading solutions

Project Duration: 1.7 Year

Team Size: 15

Tools Used:

- React Js, JavaScript, HTML, CSS, Bootstrap, ReactJS, Redux
