

Amarnath

Software Engineer

Bengaluru | 7416156704 | amarnath56704@gmail.com

Career objective:

With 5.9 years of experience in the IT industry, including a strong focus on Python, Django, and AWS, I am eager to bring my skills and expertise to contribute effectively to new challenges and opportunities. My background includes extensive work as a software engineer, where I have developed and implemented innovative ideas to drive organizational growth. I am now seeking a challenging work environment that allows me to leverage my technical skills in Python, Django, and AWS to further enhance my professional growth and contribute to the success of the organization.

Professional Summary:

- **Systems Analysis:** Analyzed system requirements specifications and engaged in client interactions during this phase.
- **Frontend Development:** Designed application front-end using HTML, CSS, AJAX, JSON, and JQuery.
- **Backend Development:** Worked primarily with Active Records.
- **Application Design:** Played a key role in analysis and design of application features.
- **Secure Communication:** Designed and developed client-server communication using secured web services.
- **UI Creation:** Created user interfaces with JavaScript and HTML5/CSS.
- **Dashboard Development:** Developed and tested multiple dashboard features using Python, Bootstrap, CSS, JavaScript, and JQuery.
- **Backend Development:** Developed backend programs in Python.
- **Feature Creation:** Created consumer-focused features and applications using Python and Django, implementing test-driven development and pair programming.
- **UI Standards:** Applied user interface guidelines and standards using HTML, CSS, JavaScript, and JQuery.
- **Validations:** Executed client-side validations with JavaScript and server-side validations with Django and other frameworks.
- **UI Development:** Designed and developed user interfaces using HTML, AJAX, CSS, and JavaScript.
- **Performance Enhancement:** Enhanced performance through a modular approach and built-in methods.
- **Caching System:** Improved the caching system for test web servers.
- **Unit Testing:** Developed and executed unit test cases for various testing tools.
- **SQL Queries:** Created SQL queries for performing CRUD operations.
- **Code Reuse:** Boosted code reuse and performance by leveraging various design patterns.
- **Data Manipulation:** Implemented Python code for data retrieval and manipulation.
- **Web Scraping:** Employed the BeautifulSoup library for web scraping.
- **Database Queries:** Executed MySQL database queries using the Python-MySQL connector and MySQL DB package.
- **AWS Services:** Proficient in AWS services such as EC2, VPC, Snapshot, S3, IAM, Route 53, RDS, SNS, CloudWatch, and Lambda.
- **Network Architecture:** Experienced in setting up optimal network architecture using services and resources (VPC, security groups).

- **AWS Cloud Environments:** Created and maintained diverse AWS cloud environments, including EC2 instances, RDS databases, S3 buckets, IAM, and Route 53.
 - **Linux Administration:** Administered Linux OS user management and file permissions.
 - **DNS Architecture:** Designed DNS architecture using ELB, Route 53, and CloudFront.
 - **Source Code Management:** Experienced with source code management systems like Git and GitHub.
 - **Agile Environment:** Familiar with working in an Agile environment.
 - **CI/CD Implementation:** Implemented CI/CD models using Jenkins, creating build jobs and setting up distributed builds and deployments.
 - **Team Collaboration:** Proven team player with strong communication and problem-solving skills, and an ability to quickly adapt to new skills based on business demands.
 - **User Experience:** Enhanced user experience.
-

Technical Skills:

- **Scripting Languages** : Python
 - **Web Frameworks** : Django, Flask
 - **Databases** : MySQL, SQL, PostgreSQL
 - **Front-end Technologies:** HTML, CSS, JavaScript, jQuery
 - **Cloud Technologies** : AWS (EC2, S3, Elastic Beanstalk, Route 53, VPC, IAM, Lambda, etc.)
 - **Web Application Server:** Apache Web Server
 - **Version Control Tools** : Git, GitHub
 - **Continuous Integration Tools:** Jenkins
 - **Container Technology** : Docker
 - **Operating Systems** : Redhat, Windows
 - **Code Quality Assurance Tool:** SonarQube
-

Experience:

CUSTOLOGIX SOLUTIONS (INDIA) PRIVATE LIMITED

Software Engineer | Vendor Management System (Simplify VMS) | November 2021 – March 2025

Description:

Simplify VMS is a robust platform designed to manage contingent workforces efficiently. It streamlines processes like vendor onboarding, compliance tracking, real-time reporting, and workforce analytics, all while reducing costs and improving hiring outcomes. This system is ideal for organizations seeking seamless management of external talent and vendor relationships.

- **Front-end Development:** Developed the application front end using HTML, CSS3, Bootstrap, AJAX, JSON, and JQuery.
- **Django Rest Framework:** Implemented logic for Django Rest framework.
- **Requirements & Documentation:** Experienced in writing and reviewing requirements, architecture document plans, design, and maintenance.
- **Web Applications:** Proficient in developing web applications and implementing the Model View Template (MVT) architecture using server-side applications.
- **Django Modifications:** Extensively modified Django.

- **AJAX Utilization:** Used AJAX to update small parts of web pages by sending requests to the server, avoiding the need to reload the entire web page.
- **Cross-platform Collaboration:** Collaborated with peers across product domains for cross-platform development.
- **Consumer-focused Development:** Created consumer-based features and applications using Python, Django, HTML, and pair programming.
- **Source Code Management:** Hands-on experience with source code management systems such as Git and GitHub.
- **Application Analysis & Design:** Involved in the analysis and design of application features.
- **Team Collaboration:** Effective team player with strong communication and problem-solving skills, and an ability to quickly adapt to new skills based on business demands.
- **Validations:** Performed client-side validations using JavaScript and server-side validations using various frameworks like Django.

CUSTOLOGIX SOLUTIONS (INDIA) PRIVATE LIMITED

Software Developer | Novartis | March 2020-November 2021

Description:

Novartis has implemented innovative projects to enhance healthcare delivery and patient support. Their **Patient Support System** on AWS streamlines medication access and ensures better workflows, improving the patient experience. They also contribute to the **open-source community** through Drupal modules like the Clinical Trials module, aiding data integration and management. Additionally, Novartis uses **Salesforce technologies** to develop global quality management systems, fostering innovation while maintaining compliance.

- **Django Rest Framework:** Implemented logic for Django Rest framework.
- **Team Collaboration:** Worked with internal teams to convert end-user feedback into meaningful improvements.
- **Web Applications:** Extensive experience in developing web applications and implementing Model View Template (MVT) architecture using server-side applications.
- **Object-Oriented Development:** Hands-on experience in object-oriented development, code optimizations, code refactoring, and web development.
- **Django Modifications:** Extensively modified Django.
- **AWS Cloud Environments:** Created and maintained various AWS cloud environments for web application development, including EC2 instances, RDS databases, S3 buckets, IAM, and Route53.
- **Debugging & Troubleshooting:** Responsible for debugging and troubleshooting web applications.
- **Source Code Management:** Hands-on experience with source code management systems such as Git and GitHub.
- **Backend Programming:** Developed backend programs in Python.
- **Feature Development:** Created consumer-focused features and applications using Python and Django in a test-driven and pair programming environment.
- **Application Analysis & Design:** Involved in the analysis and design of application features.
- **Team Collaboration:** Effective team player with strong communication and problem-solving skills, and an ability to quickly adapt to new skills based on business demands.
- **Validations:** Performed client-side validations using JavaScript and server-side validations using various frameworks like Django.

CUSTOLOGIX SOLUTIONS (INDIA) PRIVATE LIMITED

Software Developer | Weston College | July 2019- February 2020

Description:

Weston College undertakes innovative projects aimed at enhancing education and vocational training. These projects focus on creating state-of-the-art learning environments, upskilling individuals through initiatives like Skills Bootcamps, and fostering strong employer and community engagement to support brighter futures for learners.

- **Django Rest Framework:** Implemented logic for Django Rest framework.
- **Team Collaboration:** Worked with internal teams to convert end-user feedback into meaningful improvements.
- **Web Applications:** Extensive experience in developing web applications and implementing Model View Template (MVT) architecture using server-side applications.
- **Object-Oriented Development:** Hands-on experience in object-oriented development, code optimizations, code refactoring, and web development.
- **Django Modifications:** Extensively modified Django.
- **AWS Cloud Environments:** Created and maintained various AWS cloud environments for web application development, including EC2 instances, RDS databases, S3 buckets, IAM, and Route53.
- **Debugging & Troubleshooting:** Responsible for debugging and troubleshooting web applications.
- **Source Code Management:** Hands-on experience with source code management systems such as Git and GitHub.
- **Backend Programming:** Developed backend programs in Python.
- **Feature Development:** Created consumer-focused features and applications using Python and Django in a test-driven and pair programming environment.
- **Application Analysis & Design:** Involved in the analysis and design of application features.
- **Team Collaboration:** Effective team player with strong communication and problem-solving skills, and an ability to quickly adapt to new skills based on business demands.
- **Validations:** Performed client-side validations using JavaScript and server-side validations using various frameworks like Django.

Education:

- Master of Technology in Electronics and Communication Engineering, graduated with first-class distinction from JNTUH in 2015, Telangana.

Declaration:

I assure you that the above information is accurate to the best of my knowledge. Given the opportunity, I am confident I will prove to be a valuable asset.
