

Name: Amrut Suresh Mirji
 Mobile+91-8095982788
 Mail: amrutmirji98@gmail.com

WorkExperience
Having 4+ years of extensive IT experience in Software Development domain lifecycle as Build and Release Engineer , Continuous Integration and Delivery Configuration Management, BuildReleaseManagement andCloudservicesandContainerization.
ExperienceSummary
- ExperiencedinGit,GIT Hub,GIT Lab&Bitbucket,Jenkins,sonar,Nexus,Ansible,Docker,Kubernetes,andAWS.□ - Havingmulti-culturalworkExperience.□ - AdministeredBitBucket,Jenkins .□ - Worked on Jenkins Groovy Script to create the Jenkins Job.□ - AdministeredKubernetesCluster (EKS Cluster).□ - Implemented CI/CD for Angular application using tools Bit Bucket, Jenkins, Ansible, Sonar,Jfrog and Nginx web server for Dev, Staging & Prod Environments and reduced humaninterventionto10% ofexisting process.□ - Good Interaction with Developers, Managers and Team members to coordinate job tasksandstrong commitment towork.□ - Experienced in using Amazon Web services like EC2, IAM, VPC, VPC , IGW,NAT Gateway, Security Groups, NACL, S3, Cloud Watch, SNS, EBS volumes, AMI's,ElasticIP's(EIP), Keypairs,Autoscaling,Elasticload balancingandRoute53.□ - WorkedonCI/CDImplementationusingBITBUCKET,Jenkins,Maven,Nexus,Ansible, DockerandKubernetes.□ - GoodKnowledgeinwritingJenkinsfile,Dockerfile,AnsiblePlaybooks& Kubernetesmanifestfiles.□ - ExperiencedwithApplicationServerslikeNginx,Apache/Tomcat.□ - ExperiencedinusingNexus ArtifactRepositoryforMaven,NPMandDocker□ hostedbuilds. - Worked in container-based technologies like Docker, Kuernetes. - ExperiencedindeployingJava,NodejsandangularApplications.□ - BasicKnowledgeonInfrastructureasCode(IAC)Terraform.□ - KnowledgeonmonitoringtoolsPrometheus&Grafana.□ - ExperiencedinworkingwithTicketing&TrackingtoolslikeJIRA &RedMine,.ADO□
WorkExperience:Full-Time
- Worked as Software Engineer-DevOps in Girmiti Software PVT LTD from May 2021 to March 2024. Working as as DevOps Engineer- in AMITI Technologies PVT LTD from Aug 2024 to Till Today.
WorkExperience:Full time

TechnicalSkills	
Area	ToolsandTechnologies
Operatingsystems	Centos,RHEL,Ubuntu,Windows&AmazonLinux
Web/ApplicationServer	Apache,Tomcat&Nginx.
SCMandBuildTools	GitHub,GIT BitbucketandMaven
ContinuousIntegration	Jenkins
CloudServices	AWS EC2,VPC,WAF SecurityGroups, IGW, ECR,ECS.NAT,AutoScaling,ELB,S3,CloudWatch, Load Balancers, kubernetes service etc...
ConfigurationMa nagementtool	Ansible
Containerizationtool	Docker
OrchestrationTools	Kubernetes
MonitoringTools	ELK, Prometheus & Grafana
ArtifactoryTools	Nexus
Ticketingtool	JIRA,Red Mine
ScriptingLanguages	YAML,Groovy,shell,
ProjectSummary:	
ProjectName: PAYMENT GATEWAY	
Duration: October 2021 to JANuary 2022.	

Roles&Responsibilities	• Collaborate with teams to Design and plan the infrastructure architecture, ensuring high availability and scalability • Implement infrastructure as code to automate the provisioning and configuration of resources. • Set up CI/CD pipelines to automate software build, testing, and deployment processes. • Establish monitoring and alerting systems to ensure infrastructure health and efficient troubleshooting. • Respond to incidents, troubleshoot issues, and ensure disaster recovery and data backup. • Installed and configured Jenkins for Automating Deployments and providing an automation solution • Integrated GIT into Jenkins to automate the code check-out process used Jenkins for automating Builds and Automating Deployments. • Developed build and deployment scripts using MAVEN as build tools in Jenkins to move from one environment to other environments. • Creating startup and docker.sh script for starting of applications. • Created python script to make the environments UP and Shutdown. • Implemented Infrastructure automation through Ansible for auto provisioning, code deployments, software installation and configuration updates.
	Worked on Container management using Docker by writing Docker files and set up the automated build on Docker HUB and installed and configured the required configuration and pushing to ECR and deploying in AWS ECS clusters for UAT, Preproduction and Production environments • Designed and implemented scalable, secure cloud architecture based on Amazon Web Services, Managed AWS ECS cluster for Auto Scaling, application load balancing. • Using SNS for notification memory utilization for the cluster for mails, mobile texts • Using WAF allowed the IP's and security connections from the outside for production environment and added condition host/path based to browse the applications.□
Environment	Linux,Git,Jenkins,Ansible,Docker and AWS.

ProjectName: ISSUANC E	
Duration: Februray 202 2 to march 2024.	
Roles&Responsibilities	• MigrationSourceCodeRepositoriesfromGitHubtoBitBucket□ • AdministrationofGit,Sonar&Jenkins&ansible.□ • ResponsibleforgettingaccesstoDevTeamforallthetools.□ • Implemented & Supporting CI/CD for Front End Angular application using tools Bit Bucket, Jenkins, Ansible, Sonar, AWS, and appache web server for Dev, Staging & Prod Environments.□ • Managed and supported AWS services IAM, ec2, SecurityGroups, VPC, VPC Peering, AMI's, S3, Load Balancer, AutoScalingandCloudWatch.□
Environment	Linux,GIt,Jenkins,Ansible,Sonar,Docker,Tomcat andAWS.

ProjectName: OPENLANE	
Duration: August 2024 till Today	
Roles&Responsibilities	• Maintaining servers and FTP for the new incidents happened form client slide • Creating the ADO pipelines for deployment of new version of application • Creating terraform script to create the new resource's in AWS through ADO pipelines. • Implemented & Supporting ADO CI/CD for kubernetes deployment for UAT,Pre-Prod and Productions using Helm charts • Managed and supported AWS services IAM, ec2, SecurityGroups, VPC, VPC Peering, AMI's, S3, Load Balancer, AutoScalingandCloudWatch.□
Environment	Linux,GIt,ADO ,Ansible,Docker, andAWS.

Personal Details:

DOB: 13 Jul 1998

Marital Status: Single

Location: Whitefield, Bengaluru.
