EDUCATION DETAILS

Bachelor of Technology

Sree Venkateswara College of Engineering
Program :- ECE
Year of Pass :- 2018 - 2021
Percentage :- 63.85%

Diploma

Loyola Polytechnic College, Pulivendula
Program :- ECE
Year of Pass :- 2015 - 2018
Percentage :- 74.94%

SKILLS

- Penetration Testing, Cloud Security (Azure, AWS, GCP), Vulnerability Management, Static and Dynamic Application Security Testing
- Threat Modelling (STRIDE, MITRE, PASTA)
- SOC, SIEM, Secure SDLC and Security Standards (OWASP, CWE, NIST CSF, OSSTMM), Security Tools (SIEM, Malware Analysis, Network Simulation).
- Network Security (Firewalls, VPN, Routers)
- Programming (Java, C, JavaScript)

About Me

Experienced security professional with 3 years of expertise in penetration testing and security assessments across various platforms including Cloud, API, network, web, and mobile applications (Android and iOS). Skilled in a broad range of security methodologies and tools, with a strong background in cloud security and vulnerability management. Strong experience and expert-level knowledge of Architecture review, Application threat modelling, code review.

WORK EXPERIENCE

FEB 2022 – MAR 2025

Worked as a Security Associated System Engineer – Security Test Engineer at **TATA Consultancy Services (TCS)** Hyderabad, from Feb – 3rd – 2022 to Mar – 11th – 2025.

PENETRATION TESTING

- Conducted thorough penetration tests on Cloud, API, network, web, and mobile platforms.
- Experience in working across a wide range of application security programs and tools including Static Application Security Testing (SAST), Software Composition Analysis (SCA), Interactive Application Security Testing (IAST), and Dynamic Application Security Testing (DAST).
- Performed manual and automated source code reviews and identified vulnerabilities in languages including C, Java, JavaScript.

CLOUD SECURITY TESTING

- Extensive experience with Azure, AWS, and GCP security tools and resources.
- Implemented and managed security solutions for Azure (Firewalls, NSG/ASG, VPN, etc.) and AWS (EC2, WAF, GuardDuty, ELB, Auto scaling, EC2, EBS, RDS, Route53, S3, Cloud Watch, IAM, VPC, AWS CLI, SQS, SNS, etc).
- Experience in security for docker, container, microservices, kubernetes
- Troubleshooting VPN and Firewall-related workflows.

CLIENT RELATIONSHIP

Done Vulnerability Assessment and Penetration Testing for Server, Router, Switches, Web Application and Mobile Application in the following domains:

- Government Administration
- Power Distribution
- Banking Financial Services and Insurance
- Defense
- PSU

HOBBIES

- Playing Cricket
- Listening to Music
- Reading Books
- Writing Stories

LANGUAGE

- Telugu
- Hindi
- English

- Launch Virtual Private cloud (VPC), create subnet in the VPC, launch EC2 instance and RDS database
- Instances, configure and maintain route table, internet gateway within the VPC.
- Create IAM rules with required policies, Configure SNS, SQS as per requirements
- Create S3 buckets with required configuration.

NETWORK SECURITY TESTING

- IDS/IPS Implementation: Implemented IDS/IPS solutions that detected and prevented multiple network-based attacks, enhancing overall network security.
- Segmentation Strategy: Developed and implemented network segmentation strategies, reducing the impact of potential breaches and limiting lateral movement
- Protocols: Familiarity with web application security standards and protocols (SSL/TLS, OAuth, SAML, SSO).

ROLES AND RESPONSIBILITIES

- Conducting penetration tests on web applications, APIs, and Network to identify security weakness.
- SAST & DAST to ensure secure development Practices.
- When & doing pen test, I utilizing the tools like Burp suit, Nessus, SQL Map, Nmap, and Kali Linux for security assessment and vulnerability exploitation.
- collaborating with development team to provide remediation Guidance & security recommendations.
- conducting the security audits, risk assessments, to improve the organization's security posture.
- Implement a wide range of available security automation tools.
- Set up the appropriate practices around application security, infrastructure/network security and security operations.
- Set up a formal process for vulnerability detection/prevention, threat analysis and penetration testing.

DECLARATION

I hereby declare that above information are to best of my knowledge and belief. I bear the responsibility for the correctness of above mentioned particulars.
