## Professional Summary

---

- Having around 3 years of experience in AWS, Linux administration and DevOps Engineer (Azure devops, Azure repos, Git, Docker and Kubernetes).
- Proficient in architecting and automating the AWS infrastructure with Terraform.
- Working experience in building highly scalable infrastructure, build and deployment automation with Azure (CI/CD).
- Experience in DevOps Tools like Azure devops, Docker, & Kubernetes (EKS)
- Proficient in AWS services like VPC, EC2, EFS, S3, ELB, Auto Scaling Groups (ASG), EBS, RDS, IAM, Route 53, Cloud Watch & EKS.
- Experience in Writing AWS IAM policies.
- Having experience in creating custom Docker images using Dockerfile.
- Setup Docker registry to store customized Docker images.
- Hands on experience on Docker Networking,
- Performed container orchestration using Kubernetes
- Good understanding of the principles and best practices of Deployment/Release practices.
- Worked on Azure to implement CI/CD model by creating build jobs, integrating test cases, setting up distributed builds and deployments

## Work Experience

---

- Working as DevOps Engineer in RELIANCE INDUSTRIES LTD, Mumbai from May, 2022 to Till Date

## Education

---

- B.Tech from JNTU Hyderabad.

## Skills

---

|                                |                                   |
|--------------------------------|-----------------------------------|
| <b>Cloud Services:</b>         | Amazon Web Services, AWS-CLI, GCP |
| <b>Continuous Integration:</b> | Jenkins, Azure devOps             |
| <b>Source Control:</b>         | Git, GitHub                       |
| <b>Container Technology:</b>   | Docker, Kubernetes                |

## Project

---

### **Project:**

**Name** : Retail IT Projects  
**Role** : DevOps Engineer  
**Date** : May 2022-Till Date  
**Projects** : RPOS(Retail point of sale), VALUE, SMARTPOINT, SMART BAZAR, PRET, METRO, JEWELS, 7ELEVEN, TRENDS, DIGITAL, FOOT PRINT, ONE CARD, VISION EXPRESS, BRANDS AND HAMLEYS, Adverb(warehouse management), DAS, FNVC, SRM, SCM, PBG-SPMS, RRP2P, REA-SCM, NOA, RAPS, RDIP, MSR, RRWEBAPPS.

**About Company** : This arm of Reliance operates a variety of retail formats, including grocery stores, fashion outlets, and electronics stores. Their clients are everyday consumers shopping for products across these categories.

### **Roles & Responsibilities:**

- Implemented CI/CD pipelines using Azure devOps for multiple projects, ensuring seamless integration and delivery.
- Developed PowerShell scripts and Azure DevOps tasks for automating IIS configurations, such as setting up site bindings, application pools, and security settings.
- Designed and implemented end-to-end CI/CD pipelines in Azure DevOps for deploying IIS-hosted web applications, ensuring automated and reliable deployment processes.
- Automated IIS deployments using Azure Pipelines, incorporating scripts and tasks to deploy applications and configure IIS settings without manual intervention.
- Configured build and release pipelines to automate the build, testing and deployment stages for IIS applications, improving deployment efficiency and consistency.
- Orchestrated Docker containers with Kubernetes, improving application scalability and resource utilization.
- Configured nginx as a load balancer to distribute traffic across multiple application instances, enhancing reliability and performance.
- Deployed and managed Kubernetes ingress controllers (e.g., nginx ingress controller) to manage external access to services and applications within Kubernetes clusters.
- Automated infrastructure provisioning using Terraform, reducing manual configuration errors.
- Handled support issues including CSR/SSL certificate requests, port opening requests, and DNS entries through internal service request ticket raising tools.
- Collaborated with development teams to optimize application performance and troubleshoot production issues.
- Build Tool Installation and Configuration: Installed and configured build tools such as Maven, Flutter for web apps, NPM and Gradle, optimizing build processes and ensuring consistency across projects.
- Azure Pipelines Integration: Automated project creation in Fortify through Azure Pipelines, improving efficiency in application onboarding.
- Static Code Analysis with Fortify: Conducted static code analysis using Fortify, enhancing code quality and security.
- Implemented blackduck for image scanning.
- Installed and configured Liquibase for database version control, integrating it with existing development and deployment pipelines to manage schema changes efficiently.

- Maintained Liquibase changelogs, defining database schema changes and updates in XML, YAML, or SQL formats to track and manage database revisions.
- Integrated Liquibase changelogs with version control systems (e.g., Git), ensuring that database changes are tracked alongside application code and enabling collaboration among development teams
- Responsible for architecting, designing, implementing and supporting of cloud based infrastructure and its solutions.
- Experienced in creating multiple VPC's and public, private subnets as per requirement and distributed them as groups into various availability zones of the VPC
- Created NAT gateways and instances to allow communication from the private instances to the internet
- Created S3 buckets in the AWS environment to store files, sometimes which are required to serve static content for a web application.
- Configured S3 buckets with various life cycle policies to archive the infrequently accessed data to storage classes based on requirement
- File system and NFS Administration on Linux and UNIX server platforms
- User administration and Sudo Administration.
- Package Management with YUM and RPM (Installation, Updating and Rollback).
- Implementing ACL's on OS file systems.
- Writing bash scripts for implementing ACLs on samba shared files
- Scheduling cronjobs for deleting application logs older than 15 days
- Restarts and deployments in production and non-production environment.
- Granting necessary file permissions to read/write files on the application
- Enabling Ports and Services through Firewalls
- Experienced in Performance tuning of Linux servers.
