📍 Bangalore

Diwakar Reddy Repati

DevOps Engineer

SUMMARY

Result-oriented DevOps Engineer with extensive experience in managing cloud-based technologies, configuring, and deploying infrastructure and services. Proficient in implementing core DevOps concepts such as containerization, virtualization, version control, and cloud computing. Skilled in DevOps practices, automation testing, and developing efficient CI/CD pipelines to drive project excellence and deliver outstanding results.

KEY SKILLS

Git/GitHub

Docker

Kubernetes

Jenkins

CI/CD Pipelines

AWS (EC2, EBS, EFS, S3, VPC, ELB, Auto Scaling, IAM etc.)

Nexus

Maven

Ansible

SonarQube

Linux

Groovy

PowerShell

Python

PROFESSIONAL EXPERIENCE

Tata Consultancy Services

Aug '21 - Present

Project Name: NXP Semiconductors

Bangalore

Experience: 3.7 years

- Create and maintain fully automated **CI/CD pipelines** using **Jenkins, Git, Maven, nexus, Ansible** for automated build and release processes across **SIT, UAT, and Production environments**, ensuring seamless and reliable deployments.
- Managed **GitHub repositories** with branching, merging, and tagging strategies for organized collaboration and release management.
- Utilized AWS CloudWatch and other cloud-based solutions for system **performance monitoring and troubleshooting**.
- Implemented **Git hooks** to trigger **Jenkins builds** automatically and automated manual tasks using **Python and Groovy**.
- Collaborated with cross-functional teams to ensure seamless project delivery in an Agile environment.
- **Built, containerized, and deployed** applications using **Docker**, and **orchestrated container** clusters using **Docker Swarm**.
- Contributed to infrastructure automation using **Ansible** and managed infrastructure components for scalability, high availability, and security.
- Set up **Kubernetes Ingress** and **Ingress controller**, and configured application monitoring using Prometheus and Grafana.
- Deployed, managed, and maintained scalable applications on **AWS**, ensuring high availability, performance, and security.
- Designed and developed **test automation artifacts** (scripts, functions, scenarios, and processes) for simple to complex automated testing situations using various tools (e.g.: IGNIO).
- Created **Groovy, PowerShell, IWorkflow and bash scripts** for automation, testing, and monitoring, leading to a maximum reduction in monitoring defects and improved software quality.

- Identify and proactively resolve performance and scalability issues, ensuring optimal **application performance** and user satisfaction.
- Collaborate closely with other team members and stakeholders, fostering effective communication and successful project outcomes.
- Troubleshooting and debugging the application use cases. Utilized **Service now** for efficient bug tracking and resolution, contributing significantly to the bug reporting and fixing process.

EDUCATION

- AnanthaLakshmi Institute Of Technology And Sciences(B.Tech) - Obtained 81% marks
- Sri Sai Junior college(12th) - Obtained 93% marks
- Chennaraju Palli ZPHS(SSC) - Achieved a CGPA of 9.5

INTER PERSONAL SKILLS

- Demonstrated ability to quickly learn new concepts and skills
- Strong time management skills

AWARDS / ACHIEVEMENTS

- **Star of the Month Award**, Award for **Excellence**, Beyond **Performance** Award.
- Received the prestigious '**On The Spot Award**' from Tata Consultancy Services for providing outstanding support.
- Contributed to Tata Consultancy Services being honored with the '**Star Team Award**' for the dedication and support of its employees.

CERTIFICATIONS

AWS Certified: AWS Cloud Practitioner (CLF-C02)

AWS Certified Cloud Practitioner (CLF-C02) with expertise in cloud computing, architecture, and security, leveraging knowledge of AWS services to drive cloud-based solutions.
