Dedicated Project Management professional with history of meeting company goals utilizing consistent and organized practices. Skilled in working under pressure and adapting to new situations and challenges to best enhance the organizational brand.

Employment History

- Receipt of forecast/Demand from customer, loading demand into the ERP tool (BAAN) for MRP run and system drive.
- Facilitating change requests to ensure that all parties are informed of the impacts on schedule and budget.
- Commit deliveries for the POs based on the Critical to Bill and manufacturing lead time.
- Monthly Sales Plan, New Product/Project Introduction, Delivery Scheduling, Customer Interaction, Project cost management, Achieving KPI, Engineering Change Order Management.
- Review of open order delivery dates to focus on time delivery.
- Handling of Miscellaneous Billing which includes NRE, Inventory carrying cost, PPV & Freight cost.
- Consolidate claims in the claim tracker, follow up with customer for PO, generate invoice and update the claim status to finance on monthly basis for systematic closure.
- Drive complete Cross functional team to achieve the Customer requirements on time from remote area.
- Manage day-to-day operational aspects of the project.
- Frequent Follow up & Closure of AR/AP.
- Coordination of all Customer reports. Ensuring reports prepared by appropriate CFT Owner are issued to Customer on time.
- Supports GAM with price and quote reviews.
- Manages business to increase profitability and minimize the risks.

- Responsible for production planning and scheduling based on material coverage and customer urgency
- Interacting with program, warehouse, production, & QA
- Responsible for all production issues.
- Understanding of production process & procedures.
- Monitoring daily outputs, line balancing to optimize output & taking care of daily issues.
- Work order management, Capacity review, WIP balancing and operator utilization.
- Compare production order against PO (SO/Forecast).

English

- Preparing production reports like weekly KPI, monthly inventory analysis report.
- Provide customer updates on regular basis.
- Prepare a forecast plan on the monthly basis and work for the next month revenue.
- Plan and target for closing the monthly revenue and customer requirements without any backlogs.

Engineer at Amphenol ICC, Kochi

Sep 2018 — Mar 2019

- Studied wide ranges of connectors.
- Prerequisites analysis done in other integrated systems like document management system (Windchill), pricing management system (ModelN) for data population and product study.
- Uploaded various connectors through Magento platform into our website.

Education

Jul 2014 — Apr 2018

B.Tech - Electronics & Communications
Viswajyothi College of Engineering and Technology, M.G University, Muvattupuzha

May 2012 — Mar 2014

Higher Secondary Education
ST. ANTONY'S G.H.S.S, Ernakulam

Certification And Training

Apr 2019 — Jun 2020

Completed training on Embedded System - Vector India Institute, Bangalore

Vector Project: Automated Safety System For Automobile

Description: This project is about designing an automated safety system for automobile using AT89C52 microcontroller. This system includes alcohol detection, automated headlight intensity setting and obstacle detection in reverse gear.

Roles and Responsibilities:

- Experience in 8051 Microcontroller.
- Interfacing HC-SR04, LCD, MCP3204 to the system.
- Familiarized with SPI, I2C, RTC, LDR, timers, UART, PWM.
- Code analysis and bug fixing.
- Meet memory optimization of device at the code level.
- Adequate knowledge of reading schematics and data sheets for components for integration of IC to code.

Academic Project

B.Tech Main : Smart Shopping System

Description: This project was implemented to make the shopping easy without wastage of time. The proposed system is helpful for avoiding queues in shopping malls for billing while constantly cross-checking the budget. Anti-theft system was also implemented.

B.Tech Mini : Automatic Water Level Indicator without an MCU

Description: This project is used to indicate the level of water in the overhead tank. Large amount of wastage of water can be prevented by using this project. It is best economical, affordable and durable energy solution to common people.

Declaration

I hereby solemnly affirm that all details furnished above are true to the best of my knowledge.
