

Sabarinathan S

Mobile: +91 7708145255

Current Location	Chennai	Highest Degree	<i>B.E Computer Science and Engineering</i>
Preferred location	Chennai, Bangalore		
Pervious Organization	Sebone Technologies <i>Member Technical Staff(contract)</i>	Contact details	<i>Email: sabari.tcbm@hotmail.com (alternate: sabarinathan4@gmail.com)</i>
Date of Availability	immediate	Total Expériences	<i>10.11years</i>

Professional Summary: -

- Over 11 years of experience in product design and development, ensuring compliance with quality standards. Proficient in advanced product development methods, testing, and QA
- 5 years of experience in OOAD & C++ and over 2.5 years in C, specializing in product design, development, and testing.
- Expertise in domains such as medical devices (infusion pumps), automotive (infotainment systems), and industrial systems (air pressure/temperature measurements).
- Proficient in networking testing and QA, with experience in network testing and cloud web security testing

Skills summary: -

Languages: C, C++, RTOS, MS SQL, Perl, Python(basic)

Operating Systems: Windows 10, Windows CE Embedded, uC/S-III, t-kernal, OSEK, QNX.

Embedded Linux, Unix (Fundamentals)

Protocols: TCP/IP, Socket, Ethernet, SOAP/xml, SPI, I2C,UART, Modbus, CAN, A2DP, AVRCP, HFP, WAN

Design Tools: EA (Enterprise Architect), Rational Rose, MS Visio

Programming Concept: Data Structures, VC++, MFC/Win32, QT/QML, OOPs, RTOS (Micrium OS2, QNX, T-Kernal, OSEK), Rest API, OAuth libraries

SOC: IMX53, ARM7, Acordo2(STM32), Intel-Broxton

Tools: Visual Studio (2019/2022/2023), Ubuntu22.0,QT Creator IDE 5.2, GDB/GNU, IAR Embedded Workbench, Linux &Ubuntu, Eclipse IDE, Green Hills Multi IDE, VS Code, Lauterbach TRACE32, eBinder, j-link Segger tools

SW and PM Tools: Polarian, DOORS, Atlassian, JIRA, Jama, CM Synergy/Visual Source Safe, BABOK

Unit Testing Tools: Google Test, CppUnit, Unit Testing,Regression Testing,Manual Testing,Automation Testing

Static Analysis Tools: Coverity, QAC

Automation & CI/CD Tools: Jenkins, Azure DevOps, Perforce, Parasoft

Version Control Tools: Git/GitHub, and Bitbucket, SVN, Perforce, TFS (Azure DevOps)

Industry standards: MISRA and ISO 26262

Academic Credential:

- **2000-2004:** Bachelor of Computer Science & Engineering (B.E),
- *Adhiyamaan College of Engineering, Hosur, Periyar University, Salem. CGPA: 72.5*
- **1998-2000:** +2, Senior Secondary, Pattukkottai, State Board of Tamil Nadu.

Certifications: -

- *Microsoft certified professional Windows Embedded CE 6.0*
- *ADET: Advanced Diploma in Embedded Technology (Orane Embedded Academy, 2005)*
- *Windows Embedded CE 6.0 Training (2005)*
- *eACT – VxWorks Software Product Sales & Support (Malaysia, 2007)*

Trainings: -

- Technical Lead-Technical-Certification
- Software and Agile Foundation
- Medical Quality Management Systems
- Technical lead

<u>Project Details:1</u>	
Company: Sebone Technologies Ltd, Bangalore	Client: Radiometer
Project : IoT, AQT Analyzers	Duration : 23 rd Oct 2024– 31 st Jan 2025
Description: IoT	
Platform: Windows CE, MFC, Microsoft Azure, CppUnit	
Tools: Microsoft Azure Cloud, SQL Server, Visual Studio 2010, Visual Studio 2017	
Programming Language: C++, MFC,VC++	
Protocols used: TCP/IP	
Role: SOWARE ENGINEER	
Responsibilities:	
• Analyze and estimate the system requirement for a given source code. • estimate system requirements for a given existing source code. • AQT Analyser to send patient result data to Azure Cloud, based on its features and requirements. Perform Unit Testing and generate the JSON output format result file. • Analyze and estimate system requirements for given source code, Coding, Unit Testing,	

<u>Project Details:2</u>	
Company: HCL Technologies Ltd, Chennai	Client: Smiths/ICU medical
Project : CADD SOLIS	Duration : 28 nd Feb 2022 – 30 th Apr 2024
Description: CADD Solis projects which is used in Infusion pumps, which helps to provide the medication, other nutrition's through veins. Mainly worked on MSS Administration and PEG 2.4 Graphics implementation.	
Platform: SMA_SW_NPD_CADD SOLIS Remediation	
Tools: Visual Studio2022, QT, IAR Embedded Workbench 9.20, Microsoft Azure, CI/CD pipeline, Helix Perforce, GIT	
Programming Language: C, Embedded C ++,uC/OS-II, VC++	
Protocols used: TCP/IP, Ethernet, SPI, I2C.	
Role: SOFTWARE ENGINEER	
Responsibilities:	
• Analyze and estimate the system requirement for a given source code. • Development-Coding, Testing, Embedded HMI, GUI development, Static Analysis, Team Lead • Unit Testing, Static Analysis	

<u>Project Details:3</u>	
Company: HCL Technologies Ltd, Chennai	Client: Baker Huges
Project : Adapt Sustenance	Duration : 02 nd Aug 2022 – 31 nd Jan 2022
Description: ESD RPM firmware maintenance, ESD 3701/ (Emergency Shutdown Device)	
Platform: MSYS MINGW64, MC300V2	
Tools: QNX RTOS & VS2017	
Programming Language: C Programming	
Protocols used: Modbus.	
Role: SYSTEM ENGINEER	
Responsibilities:	
• Analyze and estimate the system requirement for a given source code. • RPM firmware maintenance source code based on its features and requirements. • Static Analysis, Coverity, Unit Testing for RPM firmware code in FPGA device • Regression Testing done For RPM input & output.	

<u>Project Details:4</u>	
Company: HCL Technologies Ltd, Chennai	Client: OSRAM
Project : STDF Parser_	Duration : 06 nd Jul 2021 – 1 nd Aug 2021
Description: Std_V4_Reader	
Platform: MSYS MINGW64, MC300V2	
Tools: Qt 5.15.2 (GCC 10.3.0, 64 bit)	
Programming Language: C ++ Programming	
Protocols used:	
Role: SYSTEM ENGINEER	
Responsibilities:	
- Analyze and estimate the system requirement for a given source code. - STDFV4Reader to design and develop STDF parser source code based on its features and requirements. - Unit Testing for STDF parser and done the output format CSV file.	

<u>Project Details:5</u>	
Company: Uttunga, Bangalore	Client: Fluke
Project : FlukeMax (Telemetry)	Duration : 01 nd Dec 2018– 30 th Aug 2019
Description: This QT Dbus Middleware client application is related to the Temperature measurement, Calibration where users can use windows and Linux machines & support Mobile OS	
Platform: FlukeMax device	
Tools: QT Creator IDE 5.2, Visual Studio2013 G-Test, JIRA, MS Visio	
Programming Language: C, C ++, RTOS	
Protocols used: Modbus, TCPIP, SOAP, xml	
Role: Technical Leader	
Responsibilities:	
- I'm responsible for the implementation of customized requirements. - Onboarding Project teams, identify and evaluate the team technical skills. - Updated the design as per client requirements. - Development of C++ Modules includes Temperature measurement object library support Calibration. - Development support, support sprint planning PM, Managed the Sprint breakup activities in the common development environment. - Responsible for reviewing the development standard, testing standard & process.	

<u>Project Details:6</u>	
Company: Augusta Hi-Tech, Coimbatore	Client: Sun RADON
Project : RMSBT-IIOT(Telemetry)	Duration : 21 Mar 2018– 30 Oct 2018
Description: Generate and manage CO2, temperature, pressure, air pollution control continuous Radon Monitoring report generation, manage all inspection reports from one place, Support desktop & Mobile OS.	
Platform: continuous Radon Monitoring device	
Tools: QT Creator, Android Studio, xCode11	
Programming Language: C ++, JSON, QT, QML, Rest API, OAuth	
Protocols used: TCPIP, Ethernet, SPI, I2C.	
Role: SOFTWARE ENGINEER	
Responsibilities:	
- IIoT- GUI design and develop Bluetooth application, - QML: C++ using QML, Qt libraries. - One RADON for mobile and cloud-enabled application integration. - Integrated Rest API's make the application dynamic. - Developed for Android & iOS mobiles. - Updated the design as per client requirements. - Developed software modules using C++ and Qt/QML for a UI-based Android mobile application. The application connects with an IoT device and communicates with a cloud server. The module includes UI	

development, functional implementation for CO2, temperature, pressure, air pollution control APIs, Bluetooth communication for send/receive, and server connectivity via REST API. Additionally, implemented login and social login using QT-OAuth libraries.

Project Details:7

Company: UST Global, Penang Malaysia	Client: MOTOROLA
Project : Motorola- MTP Bluetooth, Tetra	Duration : 01st Dec 2016 – 28 Feb 2018
Description: Motorola MTP, MXP radio used for security and emergency workers communication with responders.	
Platform: Motorola MTP, TETRA Radio	
Tools: Green Hills IDE, Visual Studio2015, Ubuntu, Motorola IDE	
Programming Language: C, C++, Python (test scripts), Embedded Linux, J-link Segger Tools	
Protocols used: BLE, BT, UART, SPI	
Role: SYSTEM ENGINEER	
Responsibilities:	
- Analyze and estimate the system requirement for a given source code. - Design & develop new library from GATT API, push data to receiver device. - Responsible for reviewing the development standard, testing standard & process. - UART device driver development using Embedded Linux kernel support CSR11. - debug existing features, analyze the issue, resolve. - Testing- Manual & Automation. - Build software development guidelines, standards document templates, quality reports & testing methodologies. - Perform end-to-end Unit Testing of security and system access protocols. - Build integration approach & strategy document, test plans, test templates, test cases, test conditions, test data, traceability matrix, expected results, and automated scripts.	

Project Details:8

Company: Sasken, Bangalore	Client: Volvo, Delphi, Automotive
Project : IHU 4.0 Automotive Infotainment (Telematics)	Duration : 02 Aug 2015– 30 Jun 2016
Description: Std_V4_Reader	
Platform: Meccel Betula BT Stack, Bluetooth Module 4.0 (CSR11), Intel-Broxton –Automotive Board	
Tools: Qt 5.15.2 (GCC 10.3.0, 64 bit)	
Programming Language: C ++ Programming	
Protocols used: CAN, SPI, CANoe, Meccel Betulla BT Stack, Bluetooth Module 4.0 (CSR11) Connection Manager, HFP, PHONEBOOK, MAP Genivi-IPC (DBUS, Common API/Franca IDL)	
Role: LEAD ENGINEER	
Responsibilities:	
- Analyze and estimate the system requirement for a given source code. - Developed a responsive and user-friendly Connection Manager, HFP, PHONEBOOK - MAP Genivi-IPC (DBUS, Common API/Franca IDL) interface developed. - Responsible for reviewing the development standard, testing standard & process. - Perform acceptance, black box, compatibility, conformance, functional, integration, load. - Build software development guidelines, standards document templates, quality reports & testing methodologies. - Agile Scrum Tools, GIT, Polarian, EA- UML Modeling. - Perform end-to-end testing and system access protocols. - Updated the design as per client requirements.	

Project Details:9

Company: Gimper SZ Technology pte ltd, Singapore	Client: Desay, Automotive, Singapore
Project : LCR LowCostRadio (RN1)	Duration : 01 Nov 2014– 30 May 2015
Description: Bluetooth application low-cost radio used for CAR Audio/Video/ HFP, PHONEBOOK, MAP uses.	

Platform: A&W (BT Stack)
Tools: IAR Embedded Workbench, Eclipse IDE, Trace32,
Programming Language: C Programming
Protocols used: A&W
Role: SOFTWARE ENGINEER
Responsibilities:
- Analyze and estimate the system requirement for a given source code. - Worked closely with A&W (BT Stack Team, Taiwan) for LCR demo, API clarifications, Integration. issues onto Hardware platform and regular updates project. - Callback function used for calls BT A&W Stack API functions and do implementation based on BT requirements - Responsible for reviewing the, Unit Testing standard & process.

<u>Project Details:10</u>	
Company: Total Ebiz Solutions pte ltd, Singapore	Client: Transit link, Singapore
Project : AVM++	Duration : 01 Feb 2012– 30 Oct 2013
Description: This project supports for Singapore Govt.Transitlink applications, Smart Card for Add Value Machine (AVM+)	
Platform: AVM+, BLS GPS Simulator	
Tools: Visual Studio 6.0, COM, Oracle 10i, Crystal Reports, Visual Studio .Net 2008,	
Programming Language: VC++, MFC, C++, SQL, SOAP,xml Oracle DB Programming	
Protocols used: A&W	
Role: SOFTWARE ENGINEER	
Responsibilities:	
AVM+ Development:	
- Analyze and estimate the system requirement for a given source code. - Developed frontend client application in C++ to support Windows OS, based systems in MRT stations. - Implemented GUI using Win32 programming for functionalities such as Top-Up, Penalty Fees, Claims, Nets Top-Up, adult and senior citizenship concession top-up, and child concession. - Integrated these features through the payment gateway of the NETS payment system. - The web server backend application runs on each application backend. - Utilized XML, C++, and COM for the web server application.	
BLS and GPS Simulator Software:	
- Created a BLS-GPS simulator for automatic upstaging and calculating Fare System Amount Top-Up from the card reader. - System Analysis & Software Maintenance: The following software components were worked on for QA, maintenance, modification based on customer requests, bug fixes, and deployment to all MRT stations throughout the island: - Support for fixing a web server application for claims and penalty fees. - Utilized MFC, VC++, C++, and COM.	

<u>Project Details:11</u>	
Company: Spyro Technology, Singapore	Client: Continental Automotive, Singapore
Project : DPCA (Infotainment Navigation System)	Duration : 01st Nov 2010– 30 Nov 2011
Description: DPCA BT firmware & Application used for CAR radio audio, video, phone call over mobile phone of user.	
Platform: Automotive infotainment	
Tools: Rational Rose, Visual Studio 2005, Lauterbach Trace32, GHS Multi IDE, CANoe, Windows CE 5.0 SDK	
Programming Language: C, C ++ OSEK(RTOS) Programming	
Protocols used: CAN.	
Role: Developer	
Responsibilities:	

Analyze and estimate the system requirement for a given source code.
firmware maintenance source code based on its features and requirements.
Design, develop A2DP, AVRCP, HFP, WAN source code based on its features and requirements
Unit Testing for BT firmware code in IMX53 device.

Degree/Certificate	Discipline	Institute/University	Year of Passing
10 th Secondary - Others	Not Applicable	Five Star Matriculation school, Pattukottai, TN.	30 Apr 1997-(58%)
12 th -Senior Secondary - Others	Maths, biology	Govt Boys high School, Pattukottai, State Board, Tamil Nadu.	31 Mar 1999 -(70%)
Graduation - BE	Bachelor of Computer Science & Engineering	Adhiyamaan College of Engineering, Hosur, Tamilnadu, India/Periyar University	31 May 2004 – (72%)
Diploma, Bangalore	Embedded Systems	Orane Technologies, Bangalore-6 months training.	31 Oct 2004

Personal Profile
Nationality: Indian
Date of Birth: March 25, 1982
Marital Status: Married
Passport Number: S6583371
Employee Code:51956781
Reason for Change: I am seeking a role that offers a clear path for career advancement. With over 11 years of experience, I am ready to take on more strategic responsibilities and contribute to the success of the organization at a higher level.
Languages Known:
Tamil
Hindi (basic)
English (professional)
Professional History:
2004-2005: Embedded System Training
2006-2009: Software Sales and Windows Mobile Application Testing (worked in Bangalore & APAC region)
2008: Worked in Windows Mobile Testing
