

RabalSetia
Sr.Java/J2EEDeveloper
9878666714

Email:rabalsetia25@gmail.com
www.linkedin.com/in/rabal-setia-7a3444166

PROFESSIONALSUMMARY:-

- **6.4years** of experience in analysis, design, development, implementation and maintenance of applications using Java/J2EE Technologies like **Servlets**, JSPs, Hibernate, Spring, **Spring Boot**, **Microservices**, **Docker** and Struts, with knowledge of SDLC concepts.
- Experience in developing the application with **Agile Methodology**.
- Experience with developing and designing web application based on **Spring** including **Spring MVC**, **Spring Security**, **Spring Data** with extensive practice in configuration, integration and implementation.
- Experience in using **Hibernate** for the **Object Relational Mapping (ORM)** to transfer and connect the database and also used Hibernate for mapping Java classes with database using HQL.
- Experience in **Amazon Web Services** provisioning and good experience on AWS services like EC2, S3
- In depth knowledge on core java concepts such as **OOPS**, **Collections**, **Exception handling**
- Excellent experience on **J2EE design patterns**
- Exposure to **XML**.
- Experience in deploying web and **J2EE** enterprise applications on **Apache Tomcat**
- Extensive experience in **SQL** programming language in Oracle
- Experience in development of logging standards and mechanism based on Log4j.
- Experience in software configuration management using **Git** and **SVN**.
- Experience in writing Build Scripts using **MAVEN** and using CI (Continuation Integration) tools like Jenkins.
- Experience in working on operating systems like Windows.
- Implemented **Unit Testing** using **JUnit**
- Possesses strong interpersonal skills, the ability to interact with people Confidential all levels, and strong communication and presentation skills

TECHNICALSKILLS:-

Skill Set:

<u>Programming Languages</u>	C, Java/J2EE, SQL, PL/SQL
<u>Java APIs</u>	J2EE, EJB, Servlets, JSP, JSTL, Custom Tag Libraries, JAX-RPC, JDBC, RMI, JNDI, JMS, JAXB, JUnit, AWT, Swing, SOAP, Rest API
<u>Frameworks</u>	Spring, Hibernate, Struts, Angular JS, Angular 4 , React
<u>Scripting Languages</u>	JavaScript, jQuery
<u>UI/Web Technologies</u>	HTML/HTML5, XML, CSS/CSS3, JSP, Boot Strap, JSON
<u>Web/App Servers</u>	Apache Tomcat, Web sphere, Web logic, JBOSS
<u>IDE's/API's</u>	Visual Studio, Eclipse, Net beans, IntelliJ
<u>RDBMS</u>	SQL Server, Oracle, Postgres SQL, Mongo DB
<u>Operating Systems</u>	Windows, Unix, Linux (Ubuntu, Red Hat)
<u>Version Control</u>	SVN, GITHUB, Jenkins
<u>Methodologies</u>	Agile, Waterfall
<u>CI/CD</u>	Docker, Jenkins, AWS

Others Software Skills/tools used	MS Office, Visio, Adobe Photoshop, Git, JIRA,
--	---

EDUCATION:-

B.Tech–Chandigarh University, 2017

CERTIFICATION:-

OCJP1.6Certification

WorkExperience:-

- Working as a java developer in Sandhu Brother private limited (remote Newzealand) From Nov 2022 totill
- Working as a java developer in Tuespot solutions private limited from May 2021 to Oct 2022.
- Worked as a Java developer in National School of Education Board from Aug 2017 to April 2021.

PROFESSIONAL EXPERIENCE:

Product Orogoo (Job Seeker Platform Development (Company Hiring System)) Nov 2022 – till now

Role: Back-end/ Full-stack Developer

It is a job seeker developed for hiring for the company . It has been divided into three modules.

I was developed in JSP and Servlets and Database, Mysql,Aws cloud , kafka ,Docker ,Angular.

- Developed a comprehensive job seeker platform for company hiring processes, divided into three modules.
- Utilized JSP and Servlets for server-side development and MySQL database for data storage and retrieval.
- Leveraged IBM **WebSphere** application server for deploying and managing Java EE applications.
- Integrated IBM **DB2** database management system for efficient data handling.
- Deployed the application on **AWS** cloud infrastructure, ensuring scalability, reliability, and security.
- Implemented Kafka for real-time data streaming and **Docker** for containerization of application components.
- Designed and developed the frontend **using Angular framework**, ensuring high performance, responsiveness, and scalability.

Responsibilities:

- Developed and maintained frontend components using **Angular 4** framework, ensuring high performance, responsiveness, and scalability.
- Collaborated with backend developers to integrate frontend components with Java-based backend systems, APIs, and Databases.
- Implemented user interface designs provided by **UI/UX designers**, ensuring consistency with design mockups and specifications.
- Wrote clean, modular, and well-documented code following best practices and coding standards.
- Optimized frontend code for performance and efficiency, considering factors such as browser compatibility and caching.
- Worked closely with **QA engineers** to test and debug frontend functionalities, identifying and resolving issues promptly.
- Participated in code reviews to ensure code quality, readability, and adherence to coding standards.
- Stayed updated with the latest trends and advancements in frontend development technologies and practices.
- Collaborated with cross-functional teams, including product managers, designers, and backend developers, to deliver high-quality software solutions.
- Provided technical guidance and mentorship to junior frontend developers, sharing knowledge and best practices.
- Contributed to the continuous improvement of development processes, tools, and methodologies.
- Communicated effectively with team members and stakeholders, providing regular updates on project status, challenges, and solutions.

Environment Struts 2, JSTL, HTML, Production Support, JSP, Log4J, Hibernate, Design Patterns, WebSphere Application Server, DB2, Oracle, MySQL, Tomcat Application Server, and Oracle,Java.

Product NBSE –Exam Panel

June 2021 to Oct 2022

Role: Back-end/ Full-stack Developer

Responsibilities:

- Involved in all phases of **Software development life cycle**.
- Will review the code in **Bit-Bucket** and push the code into Development and QA and then will help to testers for doing the **SIT** in **QA**.
- Involved in **UAT** with Business analyst and business team in **Staging Environment** before **Production**.
- Investigating **production issue** like **performance, configuration** etc.
- Developed UI automation for **Node JS, Angular 6, Microservices** have been built using **Spring Boot, Netflix OSS, Spring cloud and deploying to AWS Cloud**.
- Involved in the development of Credit Card support using **ETS APIs**. Integrated the Credit Card functionality with POS
- Used Spring Batch to process to update the DB column state.
- Developed user interface using **JAVA Server Pages(JSP), HTML** and **JavaScript** for the Presentation Tier.
- Used **Microservices** architecture, with Spring Boot-based services interacting through a combination of REST and **Apache Kafka message** brokers and leveraging **AWS to build, test and deploy micro services**.
- Implemented Microservices with Spring Cloud provided library services like **Netflix Eureka Naming Server, Netflix Ribbon and Feign Client** as a Rest client to map response to the client bean.
- Used Spring Core Annotations for Dependency Injection Spring DI and Spring MVC for REST API s and Spring Boot for **Microservices**.
- Worked on creating **Microservices, API, and created Docker Files** for different **Microservices**. Worked on Swagger API and auto-generated documentation for all REST calls.
- Planned, constructed and iterated upon a contacts management single-page application (SPA) and custom REST API using **AngularJS, DB2, Node.js, and Express.js**.
- Built custom Angular Directives and Services for single-page web application for agile-based team.
- Implemented reactive **Angular 4** components using **RXJS**.
- Developed service infrastructure components in **Angular 4 /Typescript** for a unified web UI initiative
- Involved in writing automated test scripts using java and executed it through **Selenium Cucumber**.
- Used **Spring Boot**, which is radically faster in building cloud **Microservices** and develop spring, based application with very less configuration.
- Design common framework for **REST API** consumption using **Spring Rest** Templates.
- Developed **Spring boot** application for writing web services.
- Developed **RESTFUL** Web Services, which are consumed by several clients like **Mobile, Tablet**, as well Web.
- Design application using **Spring MVC, JSP, JSTL** and **AJAX** on the presentation layer, the **business layer** is built using spring and the **persistent layer** uses Hibernate.
- Extensively used **Spring IOC**, configured Application Context files and performed database object mapping using **Hibernate** annotations.
- Utilized **Angular.JS** framework to bind **HTML5** template (views) to JavaScript object (models).
- Worked with **Angular.JS** applications for customer facing software using modern JavaScript development techniques and responsive design methodology.
- Involved java **Multithreading** to cascade multiple changes on multiple records in only one transaction and developed a **batch process framework**.

Environment Struts 2, JSTL, HTML, Production Support, JSP, Log4J, Hibernate, Design Patterns, WebSphere Application Server, DB2, Oracle, MySQL, Tomcat Application Server, and Oracle,.

Client: Admission Panel

June2020 –April 2021

Full Stack Java Developer

Responsibilities:

- Involved in the implementation of design using vital phases of the Software development life cycle **SDLC** that includes **Development, Testing, Implementation** and **Maintenance** Support.
- Used **AgileScrum** methodology for **iterative** incremental software development
- Implemented **Java 1.8** features like **Lambdaexpressions, Java Optional, Stream API** for **Bulk data operations** on **Collections**, which would increase the **performance** of the Application.
- Used **Microservicesarchitecture**, with **SpringBoot**-based services interacting through a combination of **REST** and **Apache Kafka** message brokers and leveraging **AWS** to build, test and deploy micro services.
- Implemented **Microservices** with **SpringCloud** provided library services like **NetflixEurekaNamingServer, NetflixRibbon** and **FeignClient** as a **Rest** client to map response to the client bean.
- Applied **J2EEdesign patterns** like **Singleton, Data Transfer Object DTO, Data and Business Object VO** during the development of components.
- Used **Visio** to prepare **Flow Diagram, Class Diagram** and **Sequence Diagram**.
- Implemented **Spring MVC** flow to interact with different modules and extensively used **Spring AOP** and **Dependency injection** during various modules of project.
- Used **Spring Data JPA** as **ORM** tool for data related functionalities, persistence layer and implemented transactions.
- Involved in creating **POJOO objects** and mapped using Spring Data JPA Annotations.
- Implement **Lombok API** annotations to generate boilerplate code for **POJOobjects**.
- Used Spring Core Annotations for Dependency Injection **Spring DI** and **Spring MVC** for **RESTAPI s** and **Spring Boot** for **Microservices**.
- Composed and executed **MongoDB** scripts to insert and update **NoSQL**database; automating data changes and reporting.
- Designed a web application to query raw **JSON** files for Data **Analysis** Team. Developed the front-end by **Html, CSS, JavaScript**, back-end by **Golang** and **ApacheDrill**.
- Responsible for Configuring **Apache Kafka** Consumer and Producer metrics to visualize the Kafka System performance and monitoring.
- Extensively used the **Java collection Framework** Classes for Holding the Application objects.
- Designed Frontend with in Object Oriented JavaScript framework like **Angular.JS, Node.js**. Used building rich internet applications, **backbone JS Require JS** to optimize in-browser use, to load the module, and to improve the Speed.
- Built Web pages that are more user-interactive using **AJAX and JavaScript**.
- Participated in development of a well responsive single page application using **JSF** framework and JavaScript in conjunction with HTML5, CSS3 standards, with front-end UI team.
- Designed and developed the UI using **spring** view component, **JSP, HTML5, CSS 3.0, JQuery**and **AngularJS**.
- Used **spring** validator framework for client side and server side validation. Also implemented dynamic loading of JSP's using **AJAX**.
- Implemented **AngularJS** controllers, custom directives, filters to maintain each view data. Implemented Angular Service calls using **Angular Factory**.
- Planned, constructed and iterated upon a contacts management **single-page application (SPA)** and custom **RESTAPI** using **AngularJS** and **Express.js**.
- Built custom **Angular 11**Directives and Services for single-page web application for agile-based team.
- Implemented reactive **Angular 11**components using **RXJS**.
- Developed service infrastructure components in **Angular2/Typescript** for a unified web UI initiative
- **Accrue** version control system has been used to check-in and checkout the developed artifacts.
- Worked on creating **Microservices, API**, and created **Docker** Files for different Microservices. Worked on **Swagger API** and auto-generated documentation for all **REST** calls.
- Used Zipkin to trouble shoot problems in micro-services architectures.
- Created advance **SQL** scripts in **PL/SQL** Developer to facilitate the data in/out flow in **Oracle**
- Created **StoredProcedures** in **Oracle** using **PL/SQL, TOAD**.
- Extensively involved in a **Docker** deployment pipeline for custom application images in the cloud using **Jenkins**.
- Used the **Docker** container system with the **Kubernetes** integration.
- Worked in **TDD** environment used **MOCKITO** to develop test cases for java bean components and test them through **JUnit** framework. In addition, used Code coverage plug-ins like **SonarQube** to improve the coverage and quality of code, Implemented **Jasmine** and **Karma** frameworks for UI test cases.
- Implementing automated performance test process using Load Runner.
- Enhanced the **performance** of the application by identifying the bottlenecks and providing advanced **performancetuning**.
- Developed **JMeter** scripts for **load testing**.

- Logging framework **Log4J** is used with **SL4j** annotations to log messages. Used **Gradle** for integration and building of the project.
- Used Stash repository for **Git** version control, **JIRA** tracking tool for assigning and defect management.

Environment: Java 1.8, J2EE , Java 11 , Spring 4, Spring JPA, Spring boot 1.1.5, JSF, Spring cloud, Spring Security, Hibernate, JavaScript , Angular 2/4, Golang, ReactJS, HTML 5.0/4.0, CSS, Ajax, JQuery, Swagger API, Lombok API, JBoss, Eclipse, Kubernetes, Docker, Gradle, Stash, log4j, JUnit, XML, Web Services, SOAP, WSDL, JAX-RS, Splunk, Apache Kafka, MongoDB, Windows XP, Design Patterns, AWS, WebLogic10.2, SQL, PL/SQL, TOAD, Oracle 10g, DB2, Docker, Maven, Jenkins, Cobertura, Sonar, WinSCP, Putty, Log4J, JUnit, Mockito, LoadRunner11.5, Jersey, JSON, XML, Selenium Cucumber, EXT JS, Express JS 4.x, NodeJS, Typescript, ES7.

Client: GCR Application

Aug2017-May2020

Role: UI (Front end)/ Full-stack Developer

- Worked on the document upload to Google Drive using Google Drive APIS
- Designed layouts, user interfaces (UI), and user experience (UX) designs.
- Converted all designs to the Angular platform, ensuring seamless integration and functionality.
- Implemented bay monitoring learning systems to continuously improve the efficiency of car park operations.
- Create Ticket interface to manage the issue for query and solve it.
- Managed end-to-end software development life cycle, overseeing all phases from inception to deployment.
- Conducted code reviews on BitBucket, facilitating smooth transitions of code to Development and QA environments, and providing support to testers during System Integration Testing (SIT) in QA.
- Collaborated with Business Analysts and business teams during User Acceptance Testing (UAT) in Staging Environment prior to Production rollout.
- Investigated production issues, including performance and configuration issues, to ensure seamless operation of software systems.
- Utilized Spring Batch for efficient database column state updates.
- Developed user interfaces using JAVA Server Pages (JSP), HTML, and JavaScript for the Presentation Tier.
- Implemented Microservices architecture with Spring Boot-based services, leveraging REST and Apache Kafka message brokers, and deploying on AWS.
- Created Docker Files for various Microservices, implemented Swagger API for auto-generated documentation of REST calls.
- Constructed custom Angular Directives and Services for agile-based teams, implementing reactive Angular components using RXJS.

Environment:Java 1.8, J2EE, Java 8.0, , Java 11 Spring 4, Spring JPA, Spring Boot 1.1.5, JSF, Spring Cloud, Spring Security, Hibernate, JavaScript, Angular 2/4, HTML 5.0/4.0, CSS, Ajax, jQuery, Swagger API, Lombok API, JBoss, Eclipse, Kubernetes, Docker, Gradle, Stash, log4j, JUnit, XML, Web Services, SOAP, WSDL, JAX-RS, Splunk, Apache Kafka, MongoDB, Windows XP, Design Patterns, AWS, WebLogic 10.2, SQL, PL/SQL, TOAD, Oracle 10g, DB2, Maven, Jenkins, , Sonar, WinSCP, PuTTY, Log4J, JUnit, Mockito, LoadRunner 11.5, Jersey, JSON, XML, Selenium Cucumber, EXT JS, Express JS 4.x, NodeJS, TypeScript, ES7.
