

EDUCATION

Bapuji institute of Technology
Bachelor of Technology in Mechanical (BTech in ME)

Davangere, Karnataka, India
Graduated - August 2021

SKILLS SUMMARY

- **Languages** : JavaScript, c#, HTML5, CSS3, Python, SQL, Typescript
- **Frameworks** : React.js, Redux, Node.js, Express.js, Micro Front End, Django, Tailwind, Material design,
- **Databases** : MongoDB, Oracle RDBMS, SQL (MySQL, PostgreSQL), NoSQL (MongoDB, Firebase)
- **Deployment Tools** : Netlify, Vercel, AWS, Google Cloud Platform (GCP), AWS, Azure
- **Tools** : Node, Jest, kafka, Vite, Git, DevOps, GitHub, VS Code, Kubernetes, CI/CD pipeline, RESTful API
- **Soft Skills** : Excellent communication Skills, Collaboration & Teamwork, Problem-Solving, Mentorship & Leadership, maintainable, and testable code, sense of ownership and integrity.
- **Version Control** : Git, GitHub, GitLab
- **Agile Methodologies**: Scrum, Kanban
- **Code Quality & Best Practices**: Modular Architecture, Clean Code, SOLID Principles

WORK EXPERIENCE

Full Stack Developer | Optimuslogic systems July 2022 – Feb 2025

- **Developed and maintained** scalable web and desktop applications using modern technologies, ensuring high performance and maintainability.
- **Designed and implemented** reusable and modular frontend and backend components using React.js, Node.js, and TypeScript.
- **Developed backend services using Python Django**, leveraging server-side logic for optimized performance.
- **Designed and implemented AWS Lambda functions** for serverless computing, reducing infrastructure costs and improving scalability.
- **Built and optimized** RESTful APIs and GraphQL schemas to enhance data flow efficiency across applications.
- **Led and mentored junior developers**, reviewing code and guiding best practices to improve team efficiency.
- **Utilized Python and JavaScript** to develop backend services, automate tasks, and improve system performance.
- **Deployed and managed cloud-based applications** using GCP (or AWS), ensuring scalability and reliability.

Full Stack Developer | Micron Technology (Contract – Pay role with Optimuslogic systems) July 2022 - June 2023

- Worked in Haps hardware management application, which is responsible for testing the functionalities of different testcases related to Nand memories.
- **Ensured accessibility, performance, and responsiveness** in frontend applications using modern UI/UX practices.
- **Developed backend services using Python Django**, leveraging server-side logic for optimized performance.
- Contributed to the **design and optimization of microservices architecture**, improving scalability and maintainability.
- **Collaborated with cross-functional teams**, including Product Managers, Designers, and QA engineers, to deliver impactful features.
- **Implemented CI/CD pipelines and deployment strategies**, ensuring smooth and consistent software releases.
- **Followed Agile development methodologies**, including Scrum and Kanban, to manage project workflows efficiently.

Junior Developer Intern | IIT Hyderabad Nov 2021 - June 2022

- Worked as Research intern under professor GVV.Sharma(EE dept) IIT Hyderabad.
- **Mentored fellow intern engineers**, guiding them on best coding practices, system architecture, and debugging techniques.
- **Advocated for technical improvements**, contributing to discussions on best practices, scalability, and security enhancements.
- **Worked with SQL and NoSQL databases**, ensuring efficient data storage, retrieval, and processing.
- **Followed Agile development methodologies**, including Scrum and Kanban, to manage project workflows efficiently.

PROJECTS

Appycloud | Full Stack Developer March 2024 - Present

- Developed and maintained a cloud-based platform that enables seamless deployment of static websites and serverless functions. Integrated with **GitHub** for automatic deployments.
- **Tech Stack**: React.js, Node.js, TypeScript, Vite, Tailwind CSS, Radix-UI, Redis, AWS-SDK
- **Roles & Responsibilities**:
 - Built a highly responsive **React.js** frontend with optimized performance.
 - Developed a backend using **Node.js** for handling deployment logic.

- Integrated **Redis** for caching and **AWS SDK** for cloud resource management.
- Implemented **CI/CD pipelines** for automated testing and deployments.
- Led a **team of 6 developers** to enhance features and fix bugs efficiently.

HapsOnCloud | Full Stack Developer

July 2022 – June 2023

- Developed a full-fledged web application to manage user data, including authentication, payments, and state management.
- **Tech Stack:** React.js, Node.js, Django, PostgreSQL, Redux, AWS S3, Firebase Auth.
- **Roles & Responsibilities:**
 - Designed and implemented a scalable **React.js frontend**.
 - Developed a **Django backend** for efficient data processing and authentication.
 - Integrated **payment gateways** and secure user authentication with Firebase.
 - Managed **state management** using Redux and implemented **JWT-based authentication**.
 - Worked in a **team of 5 developers** over a **1-year duration**.
 - **Led and mentored junior developers**, reviewing code and guiding best practices to improve team efficiency.

Field Reports | Lead Full-Stack Developer

July 2023 – February 2024

- Built a **SaaS application** for reports generation and pdf management, where users can create their own reports using by just drag and drop options
- **Tech Stack:** React.js, Node.js, FastAPI, PostgreSQL, TypeScript, Jest, AWS Lambda
- **Roles & Responsibilities:**
 - Developed the **React.js frontend** with a clean UI and smooth user experience.
 - Built the **FastAPI backend** for handling financial transactions and user data securely.
 - Integrated **React Testing Library and Jest** for unit testing and frontend validation.
 - Implemented **database optimization** for fast data retrieval and transactions.
 - Led a **team of 4 developers** and collaborated with product managers and designers.
 - Provided **technical leadership and mentoring** by conducting knowledge-sharing sessions and assisting team members in debugging and performance tuning.
