

YASHWANTH GODARI

Manual & Automation Tester

📍 Hyderabad, IN ✉ Yashwanthgodari@gmail.com ☎ +91 7730031253

PROFILE

- **Around 5** years of Strong technical background with expertise in **Manual & Automation** testing
- Strong knowledge in Software development Life Cycle (**SDLC**), Software Testing Life Cycle (**STLC**) through understanding of System requirement Specifications, Functional specification
- Expertise in Test Automation using **Selenium with Java**, Good in **locating strategies** and dynamic **x-path** approaches
- Experience in Page Object Model (**POM**) usage, hands on experience in **TestNG** Framework Good in **Core java** Strings, Arrays, **OOPS Concepts**, Collections and Exception handling, able to write the programs
- Experience in TestNG, **Hybrid**, Page Object Model, **BDD Cucumber** Frameworks Good in
- **API testing** concepts, hands on experience on Rest API using **POSTMAN** tool for manual testing and around comfortable with **RestAssured** automation
- Good in Database concepts and **SQL queries**, able to create the queries and understand the query
- results and perform **Database testing**. Good in Database **Joins**, Constraints and Sub Queries
- Experience in **Banking / Insurance / E-Commerce** domains
- Experience in UI testing in various environments like SIT and UAT
- Experience in sub task in using HP ALM as Test Management Tool and **JIRA** for logging defects
- Experience in **Agile** with scrum methodology, Requirement Traceability Matrix
- Experience in Integration and System Testing, Creating and reviewing the test cases Good in Test Automation job execution, monitoring the results , Debugging and fixing the issues
- Good team player with excellent written and verbal communication and interpersonal skills
- Good in Selenium locating strategies and able to come up with dynamic x-path approaches, Ability to come up with best approaches
- Good in Root Cause Analysis (**RCA**) , debugging the failures and fixing the issues Experience in JIRA & ALM for Test Management and good in End to End Defect management
- Experience in **Agile Scrum Methodology**, good in agile ceremonies like sprint planning, daily stand-up, sprint demo, retro meeting

- Self-motivated, energetic and highly ethical in all work related assignments thus able to immediately contribute to corporate goals and objects
- Good written, communication, interpersonal skills, proven team player with an analytical mind bent to problem solving and delivering solutions. Having Experience Agile Life Cycle Model

PROFESSIONAL EXPERIENCE

Info Ville Solutions

12/09/2018 – 20/10/2023 | Bangalore, IN

Sr Automation Engineer

- Led initiatives to identify and rectify inefficiencies in workflows, implementing automated solutions that reduced error rates
- Collaborated closely with multidisciplinary teams, and fostering cohesive teamwork to achieve project milestones within stipulated timelines

EDUCATION

Bachelor of Technology

2018 | Hyderabad, IN

Sri Indu College

SKILLS

Programming Language (Core Java, SQL) | **Database** (SQL Server, Oracle)

Office Packages (MS Office)

Automation Testing Tools (Eclipse-IDE, Selenium Web Driver, Maven, TestNG. BDD Cucumber)

Operating System (Windows , Mac)

Defect tracking and management tools (Jira, ALM)

PROJECTS

4. Pinnacle Automation

Project 4

Client : PNC Bank, USA

Environment : Java, Oracle

Testing Skill : Database Testing & Selenium Automation

Reporting Tool : ALM

Role : Team Member

"Pinnacle Banking is an all-encompassing software solution, revolutionizing consumer banking by bridging it directly to users' desks. Its three modules ensure security through password-protected access, showcase diverse bank services like investments, loans, and credit cards, allowing for online application submissions. Additionally, it facilitates secure fund transfers, inquiries, and admin functionalities for branch management, ATM monitoring, and resource allocation." *Roles and Responsibilities:*

- Reviewed Business Requirement and Software Specification Requirements, Prepared Test Plan and Test Cases
- Developed Test Scenarios and Test Procedures based on the test requirements
- Created Test Cases manually for Functional testing based on the Functional areas and Use Case documents
- Created, maintained and updated Test strategy, Test conditions, Test cases and Regression testing based on business requirement
- Prepared automated scripts for Maintenance and Regression testing
- Performed Back end testing using SQL queries to access the main database
- Created scripts using Selenium web driver and performed automated Regression Testing
- Involved in daily Sprint Planning, Scrum meetings, Sprint Retrospective meetings
- Implemented Automation frameworks using Selenium WebDriver and JAVA
- Involved in designing TestNG, Data driven and Page Object Model Framework
- Involved in API testing using Postman tool & automation using Rest Assures Services
- Used Excel Apache POI API for data driven
- Used extent reports for reporting the results
- Involved in creating test scripts using different locators and selenium methods
- Involved in updating the tasks in JIRA

Involved in Integra on, System, Regression Testing

3. Insurance Management System [IMS]

Project 3

Client : TUInfotech

Environment : Java, SQL Developer

Operating system : Windows

Testing Approach : Manual Testing, API testing & Selenium Automation

"This web-based application aims to streamline insurance processes, allowing customers convenient access to policy information such as policy amount, premium dates, and bonus details via a user-friendly mobile front-end. Its primary objective is to enable customers to pay premiums seamlessly, either through any branch or online platform. The system's administrator, functioning as the super user, holds responsibility for defining policies, managing billing invoices, and setting policy terms and amounts." *Roles and Responsibilities:*

- Involved in understanding the requirements and developed the script using Selenium Web Driver
 - Analyse the feasible scenarios for automation in the application
 - System Integra on Testing and Regression Testing of the developed code
 - Raised the issues as and when identified, to the system developers
 - Responsible for GUI, Functional & Regression testing
 - Understanding the Requirements and Functional Specifications of the application
 - Provided Test Results (Screen shots) for some of the major modules
- Verification of the fixed issues identified in testing phase

2. E-commerce Project

Project 2

Client : POA Gateway, Mumbai

Testing Approach : Manual Testring, API testing & Selenium Automation

Tools Used : Selenium WebDriver with BDD Cucumber framework **Role**

: Test Engineer

"POA Gateway stands as an all-in-one Ecommerce platform, dedicated to academic essentials ranging from school books, uniforms, to trendy college bags, sports gear, and more. Offering an effortless shopping experience, it enables customers to browse and purchase academic necessities from the comfort of their homes. With a customer-centric approach, it also ensures hassle-free returns and exchanges, ensuring satisfaction even after purchase."

Roles and Responsibilities:

- Understanding the Requirements and Functional Specifications of the applicationInvolved
- in Automation Environment setup using Eclipse, Java, Selenium Web Driver jars and TestNG
- Designed Test cases Using Selenium Web driver and TestNG
- Enhanced Test cases using Java programming. features and TestNG Annotations.
- Execution of Selenium Test cases and Reporting defects
- Involved in Regression Testing using Selenium
- Experience in debugging and modification of existing scripts
- Prepared and sent daily reports – test execution report and bug report to management
- Responsible for sending progress reports on the weekly basis and resolving technical issues

Taken part in peer review of the test cases, bug. review and QA weekly status meeting.
Defects creating and tracking in team using issue tracking sheet

1. WMRS (Wireless Messaging & Routing System)

Project 1

Client : Neustar, USA

Testing Skill : Manual testing & Selenium Automation

Domain : Telecom

Role : Team Member

"NeuStar's WMRS service is pivotal in facilitating the seamless routing of SMS and MMS messages across mobile operators, content providers, and aggregators, streamlining messaging routing and billing. Integrated within 3Cinteractive's platform, WMRS database swiftly identifies message destinations for subscribers, ensuring efficient and cost-effective delivery. Operational since 2003, WMRS manages routing information for hundreds of millions of monthly SMS and MMS messages, ensuring their successful delivery." *Roles and Responsibilities:*

- Understanding the requirements and business of the application
- Creating Test Scenarios, Test Cases, test data for the application
- Building the test scripts using selenium webdriver
- Testing activities included Functional, Retesting, Regression testing.
- Identifying X-PATH expressions for dynamic object
- Prepared the required Test scenarios and Test Cases
- Involved in reviewing the test scripts as per the requirement specifications
