Project Details

Project Name	Infosys - Investment Banking Domain Project
Technologies	Java, Spring Boot, Microservices, Spring JDBC , React JS
Description	This is investment solution banking application and it is already developed in struts framework. Now it is migrating from struts to spring boot with distributed architecture as it was single module application. I have worked for migrating and developing new REST services to make it independent. Along with that frontend for this application is migrating from JSP to React JS so working with end to end flow as developing REST and consuming in UI framework.
Responsibilities	- Migrating Struts framework code into Spring Boot and Microservices application - REST Api Development - Unit testing by using JUnit & Mockito - Improve code quality, code coverage using SonarQube - Application deployment.

Project Name	CVPL
Technologies	Java, Spring Boot, Hibernate, JSP, Html, CSS, Bootstrap, JavaScript, jQuery, Ajax , MySQL
Description	This is ERP web application for online Goods and Food orders. So that Buyers will be able to process the order easily and CVPL team will manage it completely on the system. This platform will provide different types of User Roles on Web Application Like Admin , Buyer , Sales , Purchase , Finance , Warehouse & Logistics.
Responsibilities	- Requirement Understanding - Code development & unit testing - Database Design - Application deployment.

Project Name	Gateway - Visitor Management App
Technologies	Java, Spring Boot, Hibernate, MySQL
Description	This android application was developed to manage the visitor which comes into society. This application provides great features to resident of society like expected visitor, emergency contacts, etc. Gateway is an Application for managing the resident and visitors of Society. This Application will replace the current manual system of paper based process of registering visitors and will also add some new features to make the process easy for both resident of the society and the visitors. Maintain info of all resident in society.
Responsibilities	- Rest Api Development - Developing Swagger documentation - Database Design - Application deployment.

Project Name	Sellease
Technologies	Java, Spring MVC, Spring JDBC, JSP, Html, CSS, Bootstrap, JavaScript, jQuery, Ajax, MySQL, Jasper Report
Description	Sellease is online Ecommerce Web base ERP application to maintain all jewellery business related transaction. It helps in creating and maintaining data related to customer, sales, purchase, suppliers, metal types & more. Uniquely designed Dash board helps you in retrieving data like item wise monthly sale/order, direct sale, purchase order , etc. One can get complete reports on Customer details, Orders, Sales, delivery reports, etc.
Responsibilities	- Requirement Understanding - Code development & unit testing - Database Design - Jasper Reports development

Personal Details

Date of Birth	17 th May 1993
Gender	Male
Languages Known	English, Hindi, Marathi.
