

RESUME.

ZARANAPPA

Mob: +919620255032

E-maid: zaranesh@gmail.com

Objective:

To join an Organization where I can put my analytical and critical thinking skills in to use and Where there is a change to contribute and grow with the Organization.

PROFILE SUMMARY:

10+ years of experience in assembly, rework and lab technician in Digital, Analog, High speed and Memory boards.

Firsthand experience with rework of BGA for memory products like mobiles, laptops and hard drives.

Exceptional knowledge and ability to read complex assembly drawing, blueprints and schematics.

Electrical test and precision measuring instruments.

Highly skilled in SMT and Through-hole components.

Good experience in Production, R&D team supporting them on board assembly, rework and testing.

Familiarity with test and measurement instruments like Multimeters, Oscilloscopes, Signal generator and Power supplies.

Perform other activities as needed to support the Manufacturing team worked on EMS service strong awareness of AS9100C and ISO9001 standards and procedures.

Taking Entire care of Reliability Chamber Lab, which includes lab maintenance, Inventory management, Testing and Hardware follow-up, & Improvements in tasks where we can access things easily.

Expert in Operating and managing various Environmental & Reliability testing chambers and Equipment's

Excellent communication skills and enjoys operating in a quick-paced work environment.

➤ **WORK EXPERIENCE:**

**Sr. Lab-technician (Aug 2020 to till date) Tessolve semiconductor Pvt, Ltd, Bangalore
(Client place: Maxlinear Technologies Pvt, Ltd Bangalore)**

Worked as on-board rework of BGA for RF Chip products, BGA re-balling using stencil and manual method.

Used ZM-R720A Machine for BGA rework.

Developing Test Setup & involved with initial testing and debugging for FR Chip products. Used Flex TC Temperature forcing system for Thermal Test.

Knowledge of using advance Electronic Instruments such as Digital multimeter, Function Generator, Signal Generator, spectrum analyzer, Oscilloscope and Source meters, DC power Supply etc.

Good at documentation, reporting and maintaining lab inventory.

➤ **WORK EXPERIENCE:**

**Lab-technician (July 2019 to July 2020) Tessolve semiconductor Pvt, Ltd, Bangalore
(Client place: SanDisk / Western Digital)**

Worked as on-board rework of BGA for internal memory products, BGA re-balling using stencil and manual method.

Used Ersat Hybrid Rework System HR600 for BGA rework.

Developing Test Setup & involved with initial testing and debugging for memory products. Used Temperature forcing system for Thermal Test.

Knowledge of using advance Electronic Instruments such as Digital multimeter, Function Generator, Oscilloscope and Source meters, DC power Supply etc.

Good at documentation, reporting and maintaining lab inventory.

Knowledge of Prototype soldering with the using of BOM and manual soldering of SMD chip components.

Taking Entire care of Reliability Chamber Lab, which includes lab maintenance, Inventory management, Testing and Hardware follow-up, & Improvements in tasks where we can access things easily.

Loading Memory Chips for Reliability testing of and environmental testing of devices like (Baking & cycling).

LAB Inventory maintenance, Inventory control, planning and management, Equipment calibration planning, scheduling. Environmental Chambers operation & preparing the documentation and tracking.

Doing PC, hardware and software setups for testing equipment's

All types of SMT and TH components rework and analyzing the test failure cards with the using of schematic diagram.

PCB assembly, Testing, Manual Insertion, Box build.

➤ **Lab-technician (April 2011 to December 2018) Tessolve semiconductor Pvt, Ltd, Bangalore
(Client place: Texas Instruments India Pvt, Ltd, Bangalore and Samsung Semiconductor R&D Bangalore)**

Well experienced on multi-layer PCB SMD & PTH reworks.

Experience on wiring harness like RF-cables, Molex power cables, Data cables & etc.

Prototypes of cards Assembly.

Specialized in assembly of critical packages like TSSOP, TSOP, QFN, QFP, BGA, ASP High-speed connectors etc.

Good Exposure with Semiconductor SMD 01005,0201,0402 and 0603 package passive components.

TSOP, TSSOP, QFP, QFN, BGA de-capping for failure Analysis and BGA re-balling and PCB track cutting.

Good Experience in use of Soldering, Rework tools & IR BGA Rework Machine, Single layer PCB milling.

Knowledge of schematic, Layout, mentor graphics & Allegro.

Managing engineering lab activities involving ESD, ESH practices, Inventory management, Procurement & Logistics processor.

Lab test equipment's maintenance, arrangement for project needs and getting annual calibration and repair, service from the vendors.

Maintain 5S & ESD Compliance in the lab & associated cubicles.

Management and maintenance of Lab accessories, Maintenance of overall structure of the lab.

Equipment Inventory, Follow up Equipment Calibration dates.
Ensure all lab components are at place and ensure the Quantity of components in the inventory is correct.

Make sure the lab is provided with right equipment for work make sure all the equipment's work properly.

Provide support to teams across to ensure their projects to Moving smoothly.

Worked as assembling, rework and testing support for design and development team, Device (IC) data collections & Responsible for fixing circuit boards at component level.

Replacing small package surface mount parts such as ICs, inductors, capacitors, and resistors, on circuit boards using a rework under microscope.

Build cables harnesses by customers blueprints using crimpers tools, strippers,

Worked on rework and assembly of communication cables like RS232 and Ethernet cables and

Managed the task so preparing documentation like safety logs, rework history status for boards.

➤ **Soldering-Lab technician (July 2008 to September 2009) Schneider Electric India Pvt, Ltd, (American Power Conversion) Bangalore**

Assembling different types of UPS.

Testing (ICT, Hypo terminal test, Final test.) Rework of in-house & field return units.

Testing & Rework of boards.

Wave solder machine operator, Pre-reflow, post re-flow and final Inspection for all products.

Final quality inspection by applying the IPC-610C & IPC-610D standards. NPD-types cards Assembly.

Pre-reflow and Post re-flow inspection in SMT line.

Efficient in X-Ray BGA inspection.

➤ **Production Operator (June 2006 to May 2008) TATA BP SOLAR India Pvt Ltd Bangalore**

Solar model assembly and production line operator.

Manufacturing of solar products like Solar Cells, Modules, Lightening, panels, heater systems etc.

Company

is having Export Manufacturing unit & Major share of the product produced is exported to USA, UK, Australia, and Spain & European Countries. Major business lies in the solar power projects.

TECHNICALSKILLS:

Computer applications experience in Windows-XP, Windows-7, Windows-10, MS-office, Word, Excel and PowerPoint, Motographic, Allegro, OS, S/W, F/W and Prerequisite installation.

EDUCATIONSUMMARY:

1.ITI in "Electronic Mechanic" From Basaveshwara ITC, Basavakalyan, Bidar, Karnataka with first Decision (2005).

Additional Skill:

Good grasping capacity, clarity in explaining concepts. Sense of Responsibility and Diligent worker Initiative-taking Collaborator with Confidence and Commitment.

Training Under-Gone:

- IPC-610C & 610D Standard (American Power Conversion Bangalore).
5s & 6sigma (American Power Conversion Bangalore & TATA BP SOLAR India Pvt Ltd, Bangalore).
- ROHS, NON ROHS (Tessolve semiconductor Pvt Ltd Bangalore & Texas Instruments Pvt Ltd Bangalore).
- Electronic Components Identifications (Tessolve semiconductor Pvt Ltd Bangalore & Texas Instruments Pvt Ltd Bangalore).

PERSONALDETAILS:

Date of birth : 24-08-1985
Father Name : Basappa
Mother Name : Sarasvati
Permanent Address : Basappa Veerbhadrappa Islampure Post, Rajeshwar
Tq,Basavakalyan,Dist,BidarState,Karnataka.
Languages : English,Kannada,Hindi,Marathi.
Hobbies : Browsing, Listening to music, playing Cricket and Yoga.

Place : Bangalore
Date : 01/09/2020

Yours Sincerely,
(Zaranappa)
