 [linkedin.com/in/zoheb-shaikh](https://www.linkedin.com/in/zoheb-shaikh)
 NIBM Road, Florena Society,
Flat-B/201, Kondhwa, Pune.

SKILLS

- Python
- Keras
- Scipy
- Django
- MySQL
- R
- Tensorflow
- Pytorch
- Flask
- Qlik Sense
- Linear Regression
- Polynomial Regression
- Ridge
- Lasso
- ElasticNet
- Logistic Regression
- SVM
- Naïve Bayes
- K-Nearest Neighbors
- Decision Tree
- Random Forest
- XGBoost
- Gradient Boosting
- AdaBoost
- Hierarchical Clustering
- K-Means Clustering
- Linear Discriminant Analysis
- Principal Component Analysis
- Convolutional Neural Network (CNN)
- Long Short-Term Memory (LSTM)
- Recurrent Neural Network (RNN)
- Natural Language Processing (NLP)

AWARDS

DX India Solution Thon

Tieto, 2019 (Winner)

Applause Award (5 times)

Cognizant 2011 - 2014

Summary

Zoheb Shaikh is a result oriented professional with 10+ years of good working experience on Data Analysis, Data Visualization and Machine Learning using Python Libraries – Numpy, Pandas, Matplotlib, Seaborn, Plotly, Bokeh, Scikit-Learn, TensorFlow and Keras. Looking to leverage my knowledge and experience into a role as Data Scientist/ Machine Learning Engineer.

EXPERIENCE

Lead Software Engineer

TietoEvy

October 2014 - Present

- Developed Credit score card generation functionality using Weight of Evidence method and Logistic Regression with AUROC of 0.86 for Norwegian local bank to help increase customer base.
- Developed LDA topic model to create group of incidents and predict similar incidents to get past assignee and possible solution. Reduced initial response time for new similar incident by 70%.
- Developed NLP Sequence to Sequence model for Finnish to English translation using existing human translation for insurance domain. The model is used to predict the translations for new documents which would save cost of human translators.
- Conducted hypothesis testing for evaluating system performance improvement. F-test to check for variance and then a T-test hypothesis with a significance level of 0.05 to determine if the post improvement parameters are statistically significant.
- Developed Clustering model to segment Credit Card Customers and Recommend Card Up gradation, Specific offers, Fraudulent Transactions, Customer Buying Capability and Trends using K-Means clustering and TensorFlow.
- Identified employees who have a probability greater than 0.8 for leaving the organization by developing a XGBoost model evaluated on F1-score and generated a report of attributes that affect the employee attrition using Lime library.

EDUCATION

Post Graduate Diploma in Applied Statistics (Pursuing)

University of Kolhapur

Bachelor of Engineer / Electronics & Telecommunication

University of Pune

Master of Business Administration / Financial Management

University of Pune

CERTIFICATION

Data Science with Machine Learning and Python

Coding Nest

Data Scientist with R

Data camp

- ProMatch product provides an efficient real-time multi-product/multi-instrument reconciliation and matching platform for banks with seamless integration between different matching modules.
 - Analysis and documentation of existing ProMatch modules – Accounts, Confirmations and Pre-Advice.
 - Interaction with Business Analyst and Design team to gather requirements for development of new module Securities; perform reconciliation of swift message MT535.
 - Impact Analysis, Coding, Testing, Reviews.

Associate

Cognizant Technology Solutions September 2010 – October 2014

- CRDB project handles the Client and Account data for Wealth Management department of bank. Financial Advisors are the major platform users. Additionally, other projects communicate with CRDB for all the Client and Accounts information.
- The DMS System is the main document tracking application. Its primary purpose is to record the existence of accepted documents, either at the branch or home office, and to help the branch application to identify missing documents.
 - Innovation and performance improvement in existing system
 - Analysis and documentation of current application processes
 - Interaction with client to gather requirements for enhancement tasks
 - Impact Analysis, Coding, Testing, Reviews
