SUMMARY

- Senior TIBCO Developer with more than ten years of working experience in financial, publishing, e-commerce, electronic, manufacturing and chemical industry. Eight years experiences of Service-Oriented Architecture (SOA), Enterprise Application Integrations (EAI) and Business Process Management (BPM) include TIBCO Business Works, TIBCO Designer, TIBCO Administrator, TIBCO Adapter, TIBCO EMS (Enterprise Message Service), TIBCO Rendezvous, TIBCO Hawk, Integration Manager, File adapters, ADB (Oracle) Adapter, IBM Mainframe Adapters, TIBCO iProcess Engine, iProcess Decision Server and iProcess Monitoring.
- Involved in full life cycle of project development, technical and functional support for including analyzing, functional design, technical design, coding, testing, debugging, installation, documentation and migrating into development, testing and production environments through PVCS, Kintana, Mercury ITG (Information Technology Governance) and HP PPM (Project Portfolio Management)
- Numerous programming skills and experience in database, operating system (UNIX and LINUX) and networking including TIBCO Designer 5.5, TIBCO BusinessWork 5.3, TIBCO HAWK 4.7, TIBCO Depository 4.1, TIBCO RENDEZVOUS and TIBCO Administrator 5, TIBCO Integration Manager 4.1, TIBCO Adapters (File 5.2, ADB 5.5 and Oracle 5.3), PL/SQL Packages, Procedures and Functions, Oracle Reports 6i and Forms 6i, Oracle Workflow, Form's Personalization, XML publisher, TOAD, SQL Navigator, SQL plus, Oracle triggers, Oracle Discover 2000 and Oracle Enterprise Manager 1.6 to 2.0.
- Hands on programming experience with Oracle Application Object Library AOL, Oracle Alerts, Oracle System Administration and Oracle Application Open Interfaces, Oracle Workflow, Oracle i-Payment Server 3.0, C, C++, UNIX, LINUX shell programming, Window NT, TCP/IP, FTP, Window NT server 4.0, MS IIS Server, MS Proxy Server 2.0, Oracle Enterprise Manager 2.0, Stronghold Apache Web Server, ATG Dynamo Application Server 4.0, Web trends Report Server, Client-Server computing, Socket and RPC and 3-Tier Architecture.
- Hands on experience with Dynamo 4.0 Application Server programming for e-Commerce based B2C e-Retail applications.
- Customizing and extending Oracle Applications Programs in Oracle Financial 11i for General Ledger GL, Account Payable AP, Account Receivable AR, Order Entry OE, Oracle Configurator and Inventory INV, Oracle Purchasing PO, Cash Management CM, Fixed Asset FA, BOM modules including forms modification, reports, flex field implementation, Form's Personalization, PL/SQL concurrent

- programs, Oracle Alerts, Oracle Triggers, Oracle Workflow, XML Publisher, BI Publisher ad hoc reports and queries using TOAD, SQL Navigator.
- Responsible for programming and technical and functional support for Oracle Order-To-Cash process including Order Entry, Revenue Recognition Assignment, Launch Pick Release, Ship Confirm, Receivable Interface for OE, Revenue Recognition, Auto Invoices, Auto Receipts, Auto Commitments and Settlements, Interface Sales to Royalty, GL Interface, Import into GL, Journal Post for GL, creating inventory items, costing, standard pricing lists, on-hand quantities, internal inventory transactions for INV, AP invoice, AP check printing, AR invoice, AR Remittance, AR statement, AR Dunning Letter, Credit and Collection Legal notice.

EXPERIENCE

02/08 – Pres.

Humanscale Corp, Piscataway, NJ

Senior TIBCO Developer

- Designs and develops TIBCO programs between Oracle Financial 11i and Mainframe System for GL, AP, Sales with TIBCO Designer, TIBCO EMS, TIBCO ADB adapters, TIBCO File adapters and TIBCO BusinessWork5.3 and TIBCO Administrator.
- Designs and develops Customer Credit Check Service Process by creating HTTP receiver, SOAP (**Simple Object Access Protocol**) Retrieve Resources, write to log and Send HTTP response activities. Creating abstract WSDL (**Web Services Description Language**), concrete WSDL file based on XSD (**XML Schema Definition**) schema and building the process.
- Publish the service to UDDI (**Universal Description, Discovery and Integration**) server.
- Designs and develops Purchase Order process by creating JMS connection, JMS Queue Receiver activity, Read PO file activity, Parse PO XML activity, Group the XML reading and parsing activities, invoke sub process order activity and Write to Log for error handling.
- Designs and develops Web Service program to process web order entry information into Oracle by using TIBCO Business Work. Using SOAP resources

7/01 – 02/08.

The McGraw-Hill Companies, Hightstown, NJ

Senior TIBCO/ ORACLE Developer

Responsible for programming and technical and functional support for Oracle Order –To-Cash processes including Order Entry, Demand Interface, Pick Release, Ship Confirm, Receivable Interface for OE, Auto Invoices, Auto Receipts, Auto Commitments and Settlements, GL Interface, Import into GL, Journal Post for GL, creating inventory items,

costing, standard pricing lists, on-hand quantities, internal inventory transactions for INV, Custom program to process Return from Account Receivable to iPayment. Involved in full life cycle of project development, technical and functional support for Oracle Applications 11i including analyzing, functional design, technical design, coding, testing, debugging, installation, documentation and migrating into development, testing and production environments through PVCS, Kintana, Mercury Information Technology Governance and HP Project Portfolio Management

- Also works on TIBCO Applications including Integration Manager, File adapters, ADB Adapter and Business Work development.
- Designs and develops executable and concurrent programs with Oracle Reports 6i and Oracle Forms 6i and integrating them with Oracle Financial Applications modules such as GL, AP, AR, OM, INV, PO, CM and FA.
- Develops custom interface programs such as packages, procedures and functions with PL/SQL for inbound and outbound interfaces through Oracle APIs between Oracle Financial Applications 11i(OM, GL, AP and AR), TIBCO Applications and Royalty Systems.
- Designs custom database objects such as Tables, Views, Indexes and Sequences for Oracle Financial Applications Release 11i.
- Customizes and extends Application Programs in Oracle Financial 11i including forms and reports modification, value sets creation, flex field implementation, and concurrent programs.
- Designs value sets and values for parameters of concurrent programs.
- Registers Oracle Forms, Functions, Menus and Responsibilities into Financial Applications and assigning them to different Oracle users.
- Designs and implements descriptive Flexfields for Oracle Financial Applications Release 11i for GL, PO, AP modules.
- Designs and develops TIBCO interfaces between Oracle Financial 11i and the Royalty System for GL, AP, Sales, Royalty Expense to Global Data Warehouse, Revenue Recognition to Global Data warehouse with TIBCO Integration Manager, TIBCO EMS, TIBCO ADB adapters, TIBCO File adapters and TIBCO BusinessWork5.3.
- **McGraw-Hill has outsourced the department.**

2/00 – 7/01

WallStreetRarities.com, New York

Senior Developer Analyst / Oracle Consultant

- Installed Oracle Enterprise Manager 2.0, configuring and managing Oracle Enterprise Manager 2.0 including Oracle Application Manager, Oracle Concurrent Manager, Oracle Capacity Manager, Oracle Performance Manager, and integrating them with Oracle 8i database,

Oracle Application Server 4.0 and Oracle Applications 11 AP, AR, GL, INV and OE

- Responsible for system administration and setup custom responsibility, custom menus to ensure the security for WSR Oracle Applications
- Set up user accounts and responsible for all users in WallStreetRarities.com for production, testing and development environment
- Involved in the development, technical and functional support for Wall Street Rarities Business-to-Customers on-line trading systems including designing, coding, testing, debugging and implementing custom programs with Oracle Financial Applications Release 11.0.3
- Developed concurrent programs with Oracle Developer 2000 1.6 including Reports 2.5 and Forms 4.5 and integrating them with Oracle Applications GL, AP, AR, OE and INV.
- Developed custom interface programs such as package, procedures and functions with SQL plus, PL/SQL for inbound and outbound processes between Oracle Financial Applications Release 11 and custom development Web Store.
- Involved in the implementation of Oracle i-Payment Server 3.0 on Oracle Application Server 4.0, CyberCash Merchant Connection Kit and integration with Oracle Financials such as AR and OE
- Developed automatic transaction process for credit cards Visa, Master, American Express, Discover etc authorization and Address Verification System AVS for different customer s shipping and billing address for B2C online orders through Oracle i-Payment 3.0, CyberCash Merchant Connection Kit and Citibank
- Developed concurrent programs in AR to do automatic credit card refunds for customer returns
- Monitored, troubleshoot and solved problems for WSR s Web Store, Stronghold Apache Web server, ATG Dynamo Application Server, Oracle Application Server, i-Payment Server and Webtrends Report Server.
- Monitored, controlled and provided technical support for the smooth business process of credit card transaction in CyberCash for Wall Street Rarities.
- **Company downsized staff due to financial problems.**

2/99 – 2/00

Siemens Companies, Florham Park, NJ

Senior Programmer Analyst

- Involved in all phases of development projects including designing, coding, testing, debugging and implementing custom programs with Oracle Financial Applications.
- Developed concurrent programs with Oracle Developer 2000 1.6 including Reports 2.5 and Forms 4.5 and integrating them with Oracle modules such as GL, PO, AP and CM

- Designed custom database objects such as Tables, Views, Indexes and Sequences for Oracle Financial Applications Release 11
- Developed custom interface programs such as packages, procedures and functions with SQL plus, PL/SQL for inbound and outbound processes between Oracle Financial Applications Release 11 and IBM BPCS in UNIX working environment.
- Customized and extended Application Programs in Oracle Financial Release 11 including forms and reports modification, value sets creation, flex field implementation, and concurrent programs.

EDUCATION

New Jersey Institute of Technology

M.S., Computer Science

Louisiana Tech University

M.S., Chemical Engineering

Peking University, China

B.S., Applied Chemistry

CERTIFICATION

- Certificate of Extend Oracle Applications Release 11i
- Certificate of Oracle Applications System Administration Release 11i
- Certificate of Define Flexfields Release 11i
- Certificate of Completion for BW611 TIBCO BusinessWork5.3 Integration Boot Camp
- Certificate of Completion for BW621 TIBCO Enterprise Architecture and Integration Boot Camp
- Certificate of ATG Dynamo Application Server 4.0, ATG Dynamo Personalization Server 4.0

TECHNICAL SUMMARY

Programming Oracle Forms 6i, Oracle Reports 6i, TOAD, PL/SQL, SQL plus, SQL Loader, Oracle Developer 2000, Oracle Enterprise Manager 2.0, Oracle i-Payment Server 4.0, TIBCO BusinessWork5.3, TIBCO Integration Manager 4.1, TIBCO Adapters (File5.2, ADB5.5 and Oracle5.3), TIBCO Designer5.5, TIBCO BusinessWork5.3, TIBCO HAWK 4.7, TIBCO Depository 4.1, TIBCO RENDEZVOUS And TIBCO Administrator5.4, C++/Turbo C++, HTML, UNIX programming, Oracle JDeveloper, JAVA JDK2.0, JAVA Servlets, JAVA JHTML, ATG Dynamo Application Server 4.0, Window NT server 4.0, MS Proxy Server 2.0, Stronghold Apache Web Server, Web Trends Report Server

O/S UNIX IBM AIX, SunOS, SVR4, 4.4BSD, Sun Solaris, HP UNIX, Windows, MSDOS

Databases Oracle, SQL, PL/SQL, MS Access

Networking TCP/IP protocols, client-server computing, Socket, Remote Procedure Call, 3-Tier Architecture
