SUMMARY:

Highly knowledgeable, detail-oriented, results-driven IT management professional with experience in the Software Development Life Cycle (SDLC) methodologies, project management (PMI) methodologies, defining scope, tracking risks, quality assurance, validation of data, documenting procedures, process narratives and control reviews. Qualifications in Information Security, IT operations, infrastructure/server support, risk assessment and mitigation. Understanding of general computer controls and application control concepts, and SOX standards.

Knowledgeable in process mapping, business process engineering, Six Sigma tools and techniques. Experienced in Identity Management, Software Development, Global Banking, Brokerage, Healthcare, and Insurance industries. Excellent coaching, mentoring, and motivational skills.

PROFESSIONAL ACCOMPLISHMENTS:

- Knowledgeable in Project Management essentials and critical deliverables of SDLC utilizing PMI methodologies and best practices
- Six Sigma-Black Belt trained, expert in root cause analysis and implementing solutions
- Excellent communication skills with all levels of professionals. Effective time management, organizational and writing skills
- Efficient in interacting with C level professionals, Clients, and Vendors
- Extensive Industry knowledge to define requirements or specifications for technical developments (SDLC)
- Successful migration of nine (9) Commercial Banks to new platform
- Reviewed the Access and Authentication procedures of Enterprise wide (57,000 Users) Directory of Applications
- Analysis of system controls, user authentication and authorization of client access to internal systems
- Reduced back office cycle time to 65% via standardization of data of multiple external protocols and common internal standards utilizing Six-Sigma tools and methodologies
- Standardized and implementing project methodologies internally resulting in 50% reduction in planning and requirement gathering phase
- SME in the areas of provisioning / deprovisioning processes of Identity Management (CRUD cycle)
- Experienced in data analysis, data validation, process modification, and root cause analysis
- Implemented output controls, e.g. authentication / authorization of output by the system, while maintaining accuracy and completeness of output reports
- Conducted JAD sessions, SME inputs using Delphi techniques, Discovery workshops
- Audited vendors' process to ensure validity of data transmitted, and assessed the functionality of workflow to minimize risk and potential losses.

Systems, directories, and software:

Oracle Identity Management (OIM,OVD, OID) Sun Identity Management (IdM), Sun Role Manager (RBAC/VAAU), AD, LDAP, Unix, Exchange, IMAP, CPCS, Crystal Reports, MS Project, MS Office, MS Access, MS Outlook, Visio, Lotus Notes, Enterprise Architect, Flash Macromedia, Team Dynamix, DOORS. PeopleSoft 8.0, 9.0, PeopleSoft (Workflows, Data Management, Crystal Report Writer), PeopleSoft Campus Community (Campus Portal Security, Roles and permissions, Single Sign on)

Hardware: AS400, MS Windows PC, VPN Client.

Experiences:

IT Consulting: 1/2009 – Current:

ARC: Six-Sigma project with American Red Cross of North NJ for the Chapter's process consolidation and alignment post merger of 3 Chapters. Assignment included process work flow analysis, re-design, project plans and reporting.

Ritu G. Chopra
Email: Ritugchopra@yahoo.com
Phone: (908) 472-5157

MTC: Assignments held for Web portal / LMS system and training programs development including design analysis, content development for Learning Management System. Consulting to design and develop management training modules, and conducting demos with business development team.

Identity Management Project Manager (BCBS of New Jersey) 07/2008 – 12/2008:

Sun Identity Management Project:

- Responsible for managing a development team consisting of 12 resources in deploying a Sun Java Identity Manager 7.1 full lifecycle implementation
- Supplied project guidance for provisioning workflows, physical architecture and design
- Resources provisioned to include Active Directory, Sun Role Manager 4.0.3 (Vaau /RBACx). QBlue, NMS
- As a Senior Project Manager, was engaged in for PEOPLESOFT upgrades for Sun IdM compatibility

Symantec (Vontu) Data Protection Project:

- Managed a full lifecycle of Data Protection infrastructure project consisting of a team of 25 resources in deploying Symantec (VONTU 9.0) Discover, Monitor and Prevent Tool to monitor confidential data from leaving the Organization
- Base lined SOX, HIPAA, and GLBA policies group, exact data matching detection method, severity and exceptions, automated and smart responses, private vs. shared reports, incident remediation
- Worked with several technical and business units to assess business needs and implementation strategies to monitor sensitive data
- Accomplished project goals on time under budget with successful implementation.

SUN Role Manager (RBAC /VAAU):

- Evaluated current role development and assignment processes, created gap analysis, instituted short term process improvements for manual role assignment
- Base lined enterprise roles and analyzed toxic combinations , SoD reports, and restricted roles by analyzing Human Resource and target platform reports
- Worked with Auditors and internal security and role management personnel to streamline existing manual processes, tasking and form based Role request system provided by Sun Java Systems Identity Manager implementation.
- Worked with business to redefine the role governance process and business for modification, approval and removal of roles.
- PeopleSoft Upgrades from 8.4 to 9.0, BI, SOX Compliance.

Mycroft-Talisen Inc.: 07/2007 – 4/2008:

IT Project Manager: (Higher Ed Identity Management Projects: Princeton University, UMASS, UMaine, and Lansing Community College)

- Requests For Proposal, Statement Of Work reviews for Oracle (OIM) and Sun (IdM) Identity Management Projects with Higher Ed clients
- Developed project plans, resource forecasts, and cost estimates
- Conducted demos, discovery workshops to define client's business requirements
- Analysis and assessment of clients' internal business practices
- Developed Business Logic & Business Rules to automate New Hires complete lifecycle (CRUD) management
- Documented Current State, Requirements and Use Case documents
- Maintained projects change requests and prevented scope creeps
- Published weekly status reports to Project Stakeholders
- Assessed internal business practices and conducted root cause analysis to mitigate risks and control project development costs
- Co-authored and implemented PMO development and delivery strategies by streamlining and standardizing internal methodologies
- Created re-usable templates to leverage standard documentation for Identity Management (Provisioning /Deprovisioning) processes resulting in 50% reduced cycle time during planning and requirements phase
- Trained and mentored new hires.

Lead Business Analyst- Mycroft: (Xerox, Discover SUN (IdM) projects)

Applications: Mainframe, Site Minder, Lotus Notes, S3, Exchange

Ritu G. Chopra
Email: Ritugchopra@yahoo.com
Phone: (908) 472-5157

Documented Current State / Discovery documents, Requirements, Use Cases, Flow Diagramming, Data Mapping and Business Logic, developed test strategies Test Plans, Implementation Guides.

Independent Consultant- Project Manager (Hess Corp. & APS): 10/2006- 6/2007:

- Provided expertise in developing and designing modules for technical training courses of accounting and reconciliation software applications
- Designed and developed customized project management courses for over 100 HR personnel
- Performed production data analysis of developing reporting modules
- Documenting User-Guides and Release Notes for software application.

CheckFree – CIS Inv. Serv. NJ - 9/2005 – 9/2006

Project Lead -Recon Tool Project (Web Application):

- Conducted complexity analysis and documented project roadmaps for a Web application
- Leveraged communication between business lines, technical teams, and client's end users
- Analysis of business process for Recon Tool software application, and its' automation by utilizing Six Sigma initiatives in improving business model
- Documented BRD / FRD using Use Case (UML) methodologies
- Standardization of data reporting by applying business logic to multiple external protocols and common internal standards in back office operations' reporting requirements
- Monitored output controls, errors, and exception handling procedures to prevent business risk
- Assisted in enhancement of APL- Legacy System's Trading Tools to improve business model
- Access and Identity management, validation and authentication of application users.

Project Lead -NAWF Project (Web Application):

- Documented business - functional requirements, and use cases using UML methodologies
- Created and implemented Business Rules for Broker dealers and Financial Advisors
- Monitored output controls, errors and exception handling procedures to mitigate business risk
- Managed communications between stakeholders and development teams
- Supported project management activities in managing triple constraints
- Access and Identity management, validation and authentication of application users.

Project Lead -MSP Project (Mainframe Application):

- Knowledgeable in Multiple Strategy Portfolios and UMA's set up procedures for high net worth accounts of brokerage clients
- Supported MSP Project Management teams in Implementation and initial client setup in development systems
- Defined Scope, objectives, business and functional requirements.

Deutsche Bank, NJ - 7/2000-9/2005

Project lead - Identity Management Project:

- Conducted research and analysis of Organization wide Directory of Applications for Identity Management and Role Management
- Analysis of system controls, user authentication and authorization
- Data security analysis, procedures for documentation control
- Audited vendors' business processes and documentation
- Development tracking and reporting during migration phase
- Authentication of client access to data and image files
- Analysis, monitoring, documenting and reporting Service Level Agreements
- Coordination of information and project status for senior management reporting.

Lead Analyst - CPCS Platform Migration Project:

- Successful implementation of 9 commercial banks' Check Migration project from CPCS to AFS platform throughout all phases of Software Development Life Cycle
- Supported PMO in data collection, business specifications, ongoing project analysis and data validation
- Implemented client and regulatory service enhancements for current systems
- Leveraged communication to negotiate conflicts between internal IT depts. and vendor
- Reported finding of validation issues and timely resolution of errors detected during User Acceptance and DR testing to prevent business risks and ensure operational efficiencies

Phone: (908) 472-5157

- Managed communicated with support teams at remote sites
- Provided production support to end users, operations, and various business lines
- Liaison between technical teams and operations / business lines
- Developed and published various project status reports, maintained issue database for management reporting.

Business Analyst - Adjustment Express Project:

- Developed use cases / test cases, test plans, correspondence templates for a Web application, 'Adjustment Express' to be used by research and various other departments to replace a mainframe system
- Conducted UAT and DR, BCP testing, and reported results within stakeholders across business lines, IT and application vendors
- Liaison between technical development team and user groups
- Assisted in implementation and end-users training of 'Adjustment Express'
- Requirement gathering for Research and Investigations of forged endorsed, altered, and fraudulent instruments to prevent money laundering tracking system
- Assisted in Regulatory and Compliance enhancement of the application.

Prior Experiences: 4/1990-07/2000:

Companies: PNC Bank, Allemrica Financial, New York Life, Health South.

Held various positions of increasing responsibilities including Technical Consultant, Marketing Consultant, Internal Auditor, and Account Manager Positions.

Education:

Bachelors of Commerce (Honors): DAV College, New Delhi University

Major: Business Management, Accounting, Marketing, and Finance.

Project Management Professional (PMP) training – Avtech Institute Of Technology, South Plainfield, NJ,
- Deutsche Bank (IIL)

Six-Sigma Black Belt training - MCC- Edison, NJ

Professional Organizations Affiliations:

Member – PMI (Project Management Institute)

Member – ASTD (American Association of Training and Development)
